Phenomenological in depth interviewing of six adult participants located in Los Angeles California and Gainesville Florida informs the creation of narrative data once interpreted reveals education journeys that contain mis educative experiences educative experiences and ultimately educative healing experiences Using Public Pedagogy Social Learning Theory and Self Directed Learning Development as foundational constructs this work aims to contribute to scholarship that brings learning contexts in from the margins of education rhetoric and into the center of analysis by better understanding and uncovering the essence of the learning experience outside of school Additionally it broadens the understanding of Punk engagement in an attempt to have an increased nuanced perspective of the independent learning that may be perceived as more educative than any formal attempt within our school systems
