*The Dodo and the Solitaire* Jolyon C. Parish, 2012-12-03 This account of two extinct bird species offers an amazing amount of history references facts maps and illustrations Library Journal The Dodo and the Solitaire is the most comprehensive book to date about these two famously extinct birds It contains all the known contemporary accounts and illustrations of the dodo and solitaire covering their history after extinction and discussing their ecology classification phylogenetic placement and evolution Both birds were large and flightless and lived on inhabited islands some five hundred miles east of Madagascar The first recorded descriptions of the dodo were provided by Dutch sailors who encountered them in 1598 and within a century the dodo was extinct So quickly did the bird disappear that there is insufficient evidence to form an entirely accurate picture of its appearance and ecology and the absence has led to much speculation This extraordinary book pieces together the story of these two lost species from the fragments that have been left behind An up to date and comprehensive review of everything we know about the dodo and solitaire Journal of Vertebrate Paleontology
