### In the beginning

The formation of the Solar System began when a gigantic cloud of dust and gas began to collapse. As it collapsed, it started to spin more and more rapidly, forming a dense, flat disk shape.

This swirling disk of dust is called a **protoprotostar**.

2

### Birth of a star

The enormous cloud collapsed due to gravity and the centre became hotter and hotter until it began to fuse (combine) hydrogen atoms into helium. This released a huge amount of energy, which resulted in a shining star, called the Sun.

3

### The Solar System

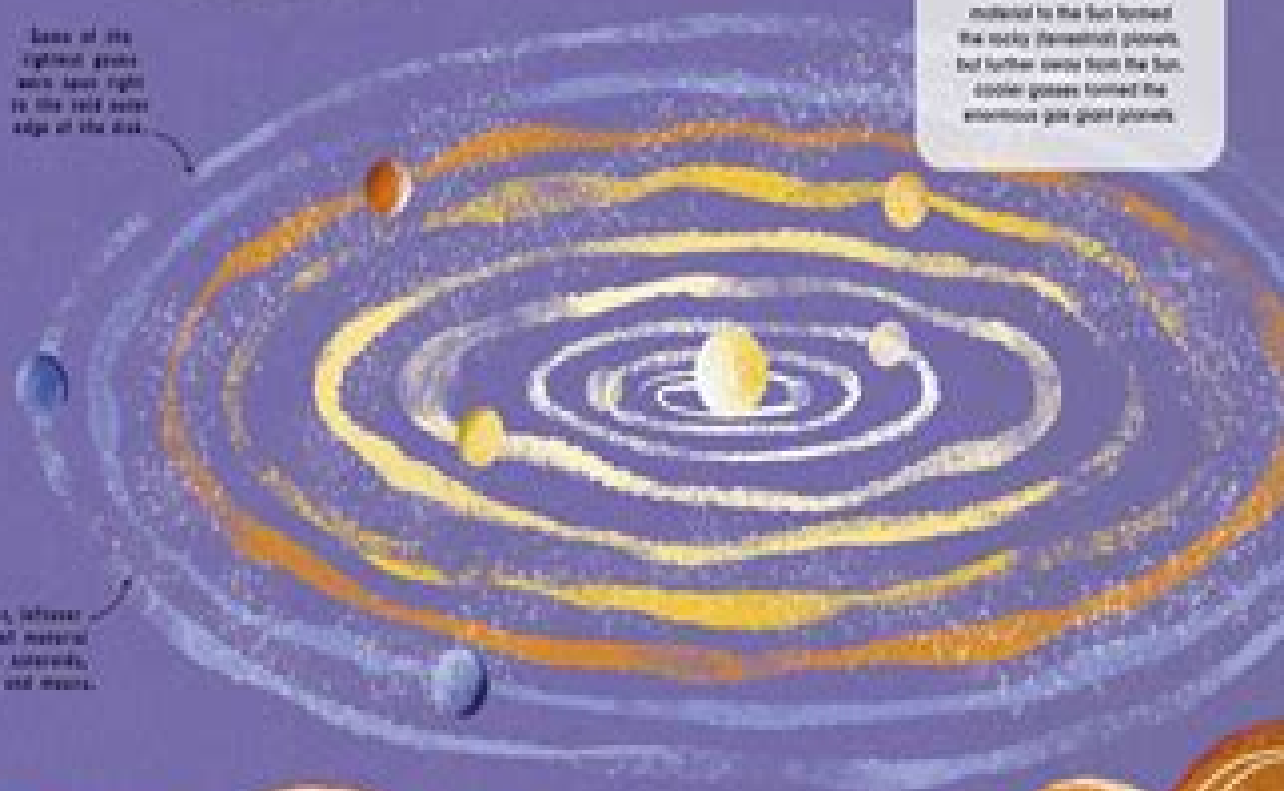

The remaining material from the cloud began to clump together to form planets around the Sun. The closest material to the Sun formed the rocky (terrestrial) planets, but further away from the Sun, cooler gases formed the enormous gas giant planets.

## The birth of our Solar System

Planet Earth is just a small part of the network of planets, moons, asteroids, and comets that orbit around the Sun, called the Solar System. But how did the Solar System begin? The answer lies in an event that happened around 4.6 billion years ago...

Some of the lightest gases were spun right to the cold outer edge of the disk.

Smaller, leftover pieces of material became asteroids, comets, and moons.

**Symbolism of the circle dance of the planets around the Sun-God** Helena Petrovna Blavatsky,2019-09-17 The world is asked to believe that while the Planetary Angels of the Church are divine Beings the genuine Seraphim these very same angels under identical names and planets are the false Gods of the Ancients The circle dance of the planets prescribed by the Amazons for the Mysteries is called lascivious when performed by the Pagans but not

King David's reprehensible dance during which he uncovered himself before his maid servants in a public thoroughfare. It was David who introduced Jehovistic worship into Judah after sojourning so long among the Tyrians and Philistines where these rites were common. Having borrowed Osiris from the Egyptians, the Church Fathers thought little of helping themselves to his brother Typhon. The seven branched chandelier of the Israelites as well as the wanderers of the Greeks had a far more natural meaning, a purely astrological one to begin with. But symbol for symbol we prefer the sun to a candlestick. One can understand how the latter came to represent the sun and planets but no one can admire the chosen symbol. There is poetry and grandeur in the sun when it is made to symbolise the Eye of Ormuzd or of Osiris. One must forever fail to perceive that any particular glory is rendered to Christ by assigning to him the trunk of a candlestick in a Jewish synagogue. The chandelier represented the motion of the seven luminaries describing their astral revolution. To the right and the left of that candelabrum projected six branches each of which had its lamp because the Sun placed as a candelabrum in the middle of other planets distributes light to them. There are two suns, a sun adored and a sun adoring. There are seven series of Cosmocratores which are double: the higher ones are commissioned to support and guide the superior world, the lower ones the inferior world. The Zoroastrians, Mazdeans and Persians borrowed their conceptions from India; the Jews borrowed their theory of angels from Persia; the Christians borrowed theirs from the Jews. The Zoroastrian Aryans transformed the Devas, the bright Gods of India, into daevas or devils. It was their Karma that in their turn the Christians should vindicate on this point the Hindus. Then Ormuzd and Mithra became the daevas of Christ and Mikael, the dark lining and aspect of the Saviour and Angel. The day of the Karma of Christian theology will come in its turn. Hence the latest interpretation by Churches that the seven branched candlestick represents the seven Churches of Asia and the seven planets which are the angels of those Churches. And yet in the face of all this evidence, sun, moon, planets are shown as being demoniacal before and divine only after the appearance of Christ. Then Jehovah then is made to be the Sun and thence also the Christ of the Roman Church. The only point of difference between the exotericism of the Latin Church and that of the old Astrolators lies in the entirely arbitrary interpretation of emblems, symbols, allegories and even names which have been shown to be identical in both.

*Amazing Space Mysteries and Marvels* Gayathri Ponvannan, 2020-02-25. It rains diamonds on Saturn. And on Jupiter. And on Neptune too. A comet once fell into the sun and came out of the other side. Some stars turn into black holes. Humans have been gazing at the skies for ages trying to figure out just what lies beyond us. Over the years we have calculated the speed of light, the brightness of stars and the size of galaxies. We have landed spacecraft on our moon and on Saturn's moon too. We have even sent probes that are currently travelling beyond the solar system complete with messages for aliens. From the Big Bang to the Big Freeze, from the greatest theories to the weirdest mistakes, from the far reaches of the universe to our closest celestial neighbours. *Amazing Space Mysteries and Marvels* covers stars, moons, planets, comets, asteroids, meteors, galaxies, black holes and many more out of the world topics that will make you go ooh and aah.
