Solving the Mystery of the Biblical Flood William Scott Anderson, 2001-11 This is a very unique book that for the first time puts forth a new theory on how a recent global flood as described in the Bible may have occurred that is both plausible and scientifically sound The author treats Noah s flood as a scientific mystery story which he then proceeds to solve by examining the clues found in the geological record and human history building a theory that is in harmony with the biblical record of an earth wide deluge and with what we know about the geology of the earth In this detailed and well referenced book common objections to the biblical deluge are examined and answers are found that satisfy both a literal interpretation of scripture and a scientific examination of the facts This book is compelling as the author proves what many have come to view as mere myth is actually a historical event well supported by scientific evidence The author also presents the results of his research on detecting recently deposited micro marine fossils left by the flood in soil samples Presenting solid Paleoclimatological evidence of the deluge this book may require rewriting many currently used textbooks Sure to be considered very controversial this is a must read for any one interested in geology or the biblical deluge Written for the general public and the more geologically inclined as well this book is a seamless merging of a literal reading of Genesis with what geology knows about the earth 305 pages 20 B W illustrations index

Pangaea Flood Mystery Solved Norman Grayson, 2017-01-25 Ever notice on a world map how all the continents look to have once fit together in one large piece that has since broken up Pangaea Flood Mystery Solved sets out a long overdue

picture of Earth's ancient history Taken from global historic records archaeology geology oceanography and fossil record it strips away the nonscientific beliefs that have previously obscured the real facts allowing a more comprehensive picture to emerge from the genuine puzzle pieces that once composed Earth's single continent of Pangaea From the dawn of time man has asked where we came from and why we are here Why have no definitive answers ever been found for these questions And why do religious and evolutionary beliefs constantly clash Could both be wrong Without accurate historical records humanity loses its true sense of identity So what is the real scientific answer for man's origin and earth's ancient history
