Secrets in the Snow & Other Christmas Crime Stories Matthew

Booth,2025-09-04 Crime doesn't stop for the holidays as this anthology of gripping Christmas mysteries shows with its baffling robberies, mysterious deaths and family gatherings that go terribly wrong. When snow falls and darkness comes early, it's the perfect setting for murder and intrigue. And when family and friends gather in country houses for jolly festivities, they're certainly not expecting guests and priceless jewellery to go missing. But it's fertile ground for classic crime writers such as Arthur Conan Doyle, G.K. Chesterton and Dorothy L. Sayers, who amongst others are showcased in this nail-biting collection. Part of the Macmillan Collector's Library, a series of stunning cloth-bound pocket-sized classics with gold-foiled edges and ribbon markers. These beautiful books make perfect gifts or a treat for any book lover. The stories in *Secrets in the Snow* and other Christmas Crime Stories have been selected and introduced by writer Matthew Booth. **Snow Leopards in Danger**

Sofia Maimone,2013-08-01 Some people call snow leopards ghost cats because of their mysterious, elusive natures. Found only in the mountain regions of Asia, snow leopards are sleek big cats able to jump from one precipice to the next in search of prey. Their beautiful fur makes them a target for poachers; unfortunately, however, conservation groups today are working hard to make sure these endangered big cats don't disappear forever. This book gives readers a glimpse into the life of snow leopards and the dangers they experience. **The Snow Cone Diaries**

Juan Valdez,2014-05-15 The content in this work is fiction, fiction in the sense that the main character through which the eyes of this metaphysical and philosophical journey are viewed, Charlie, is not a real character nor are his counterparts and foils through which he explores various topics such as love, the meaning of existence or the origins of the cosmos and how our understanding of these abstract ideas have evolved since the dawn of civilization. But like any work of fiction, the characters do have some basis in real experience from which, of course, nothing can be created. The intent of the work is to explore the foundations and evolution of knowledge and the boundaries between reason and faith, boundaries which, from the author's perspective, are not quite as clear as some might have us believe. And the point of going through the exercise, the purpose as it were, is not only for the author to come to a better understanding of how all our modern branches of science hang together, how they have come to be given their socio-political and historical context, but also for others to share in his journey and perhaps learn something along the way. Since the birth of language and thought, even going back thousands of years and even prior to the dawn of civilization itself, mankind has attempted to answer two fundamental questions: questions that have spurred countless creative forces and branches of thought over the centuries, namely, who we are and from whence we came. The answers to these questions, no matter what race, religion or creed the seeker might be or what philosophy or religion they might adhere to, are inextricably linked to each other. This journey of trying to understand our place in the world and the origins of the universe itself is an ageless quest that in many respects distinguishes mankind from the rest of the creatures on the planet. Furthermore, this very same quest to answer the same questions fuels not only scientific development but also is the basis for theology and religion, both approaching the same set of questions with a different set of tools and with a different mindset but both trying to

answer the same set of basic questions as to who we are and how we got here From the authors perspective in order to answer these questions effectively in the Information Age we should have at least some understanding of the history of our answers to these questions as they have evolved over time For we all build our collective knowledge on those that have come before us whether we recognize this or not And in turn that in building this bridge a common metaphor used throughout the work we must leverage the tool of metaphysics a term originally coined by Aristotle but in the context of this work implies a level of abstraction that sits above physics as we understand it in todays world but also provides a conceptual underpinning to all of the branches of knowledge that collectively make up our understanding of the world and our place in it In doing so it is the authors hope that we can not only come to a more complete and fuller understanding of the answers to these basic human questions that have plagued mankind since time immemorial but also at the same time perhaps develop a deeper understanding of the problems of life in the Information Age and how we might best approach them or cope with them in way that not only benefits ourselves as individuals but to society as a whole to which our individual well being depends upon whether or not we recognize it or not
