Forgotten Civilization Robert M. Schoch, 2012-08-10 Scientific confirmation of advanced civilization at the end of the last ice age the solar catastrophe that destroyed it and what the evidence means for our future Demonstrates based on the 12 000 year old megalithic complex of G bekli Tepe that advanced civilization extends thousands of years further back than generally acknowledged Examines the catastrophic solar outbursts that ended the last ice age wiping out antediluvian civilization and incinerating much of the evidence of that period Reveals data that show solar outbursts powerful enough to devastate modern society could return in the future Building upon his revolutionary theory that the Sphinx dates back much further than 2500 BCE geologist Robert Schoch reveals scientific evidence of advanced civilization predating ancient Egypt Sumeria and Greece as well as the catastrophe that destroyed it nearly 12 000 years ago and what its legacy can teach us about our own future Combining evidence from multiple scientific disciplines Schoch shows how the last ice age ended abruptly in 9700 BCE due to coronal mass ejections from the Sun These solar outbursts unleashed electrical plasma discharges upon Earth and triggered volcanic activity earthquakes fires and massive floods as glaciers melted and lightning strikes released torrential rains from the oceans He explains how these events eradicated the civilization of the time and set humanity back thousands of years only to reemerge around 3500 BCE with scattered memories and nascent abilities He explores within this framework how many megalithic monuments underground cities and ancient legends fall logically into place as well as the reinterpreted Easter Island rongorongo texts and the intentional burial 10 000 years ago of the G bekli Tepe complex in Turkey Schoch reveals scientific evidence that shows how history could repeat itself with a coronal mass ejection powerful enough to devastate modern society Weaving together a new view of the origins of civilization the truths behind ancient wisdom and the dynamics of the planet we live on Schoch maintains we must

heed the megalithic warning of the past and collectively prepare for future events *Historical Dictionary of Polynesia*
Robert D. Craig, 2011 The term Polynesia refers to a cultural and geographical area in the Pacific Ocean bound by what is commonly referred to as the Polynesian Triangle which consists of Hawai i in the north New Zealand in the southwest and Easter Island in the southeast Thousands of islands are scattered throughout this area most of which are currently included in one of the modern island states of American Samoa Cook Islands French Polynesia Hawai i New Zealand Samoa Tonga Tokelau Tuvalu and Wallis and Futuna The third edition of the Historical Dictionary of Polynesia greatly expands on the previous editions through a chronology an introductory essay an expansive bibliography and over 400 cross referenced dictionary entries on significant persons events places organizations and other aspects of Polynesian history from the earliest times to the present Appendixes of the major islands and atolls within Polynesia the rulers and administrators of the 13 major island states and basic demographic information of those states are also included *Inventing 'Easter Island'* Beverley Haun, 2008-04-05 Easter Island or Rapa Nui as it is known to its inhabitants is located in the Pacific Ocean 3600 kilometres west of South America Annexed by Chile in 1888 the island has been a source of fascination for the world beyond the island since the first visit by Europeans in 1722 due to its intriguing statues and complex history *Inventing Easter Island* examines narrative strategies and visual conventions in the discursive construction of Easter Island as distinct from the native conception of Rapa Nui It looks at the geographic imaginary that pervaded the eighteenth century a period of overwhelming imperial expansion Beverley Haun begins with a discussion of forces that shaped the European version of island culture and goes on to consider the representation of that culture in the form of explorer texts and illustrations as well as more recent texts and images in comic books and kitsch from off the island Throughout *Easter Island* is used as a case study of the impact of imperialism on the view of a culture from outside The study hinges on three key points an inquiry into the formation of Easter Island as a subject an examination of how the constructed space and culture have been shaped reshaped and represented in discursive spaces and a discussion of cultural memory and how the constraints of foreign texts and images have shaped thought and action about Easter Island Richly illustrated and unique in its findings *Inventing Easter Island* will appeal to cultural theorists anthropologists educators and anyone interested in the history of the South Pacific *Easter Island, Earth Island* Paul Bahn, John Flenley, 2017-09-01 Easter Island isolated deep in the South Pacific and now a World Heritage Site was home to a fascinating prehistoric culture one that produced massive stone effigies the moai and the birdman cult and yet much of the island s past remains shrouded in mystery Where did the islanders come from and when How did Rapa Nui culture evolve over the centuries How and why did their natural environment change over time Paul Bahn and John Flenley guide readers through the mysteries and enigmas of Rapa Nui incorporating the records of early explorers folk legends and archaeological evidence along the way They cover the island s geological and environmental history and explore its flora and fauna illustrating how human actions affected the natural environment of the island This fourth edition

draws in recent DNA studies of ancient human and animal bones as well as plant remains evolving understandings of how the moai were transported and current efforts to reforest the island

Ancient Mysteries Peter James, Nick Thorpe, 2007-12-18

What was the Minotaur Did a Welsh prince discover America Did Robin Hood really exist How does the Star of Bethlehem fit into the science of astronomy Is the Vinland Map a fake Can archaeologists use spirit messages to guide their work For centuries philosophers scientists and charlatans have attempted to decipher the baffling mysteries of our past from the Stonehenge to the lost continent of Atlantis Today however DNA testing radiocarbon dating and other cutting edge investigative tools together with a healthy dose of common sense are guiding us closer to the truth Peter James and Nick Thorpe the professional historian and archaeologist team who created the acclaimed Ancient Inventions now tackle these age old conundrums presenting the latest information from the scientific community and the most startling challenges to traditional explanations of mysteries such as The rise and fall of the Maya A lost cache of Dead Sea Scrolls The curse of Tutankhamun The devastation of Sodom and Gomorrah The Nazca Lines These true mystery stories twist and turn like a good whodunit as James and Thorpe present the evidence for and against the expert theories shedding new light on humankind's age old struggle to make sense of the past The authors also make dramatic contributions of their own to the fray demonstrating persuasively that catastrophic events including the collisions of comets with the Earth long ago could explain puzzles that have baffled experts for centuries Ancient Mysteries will entertain and enlighten delight the curious and inform the serious

The Statues that Walked Terry Hunt, Carl Lipo, 2011-06-21

The monumental statues of Easter Island both so magisterial and so forlorn gazing out in their imposing rows over the island's barren landscape have been the source of great mystery ever since the island was first discovered by Europeans on Easter Sunday 1722 How could the ancient people who inhabited this tiny speck of land the most remote in the vast expanse of the Pacific islands have built such monumental works No such astonishing numbers of massive statues are found anywhere else in the Pacific How could the islanders possibly have moved so many multi ton monoliths from the quarry inland where they were carved to their posts along the coastline And most intriguing and vexing of all if the island once boasted a culture developed and sophisticated enough to have produced such marvelous edifices what happened to that culture Why was the island the Europeans encountered a sparsely populated wasteland The prevailing accounts of the island's history tell a story of self inflicted devastation a glaring case of eco suicide The island was dominated by a powerful chiefdom that promulgated a cult of statue making exercising a ruthless hold on the island's people and rapaciously destroying the environment cutting down a lush palm forest that once blanketed the island in order to construct contraptions for moving more and more statues which grew larger and larger As the population swelled in order to sustain the statue cult growing well beyond the island's agricultural capacity a vicious cycle of warfare broke out between opposing groups and the culture ultimately suffered a dramatic collapse When Terry Hunt and Carl Lipo began carrying out archaeological studies on the island in 2001 they fully expected

to find evidence supporting these accounts Instead revelation after revelation uncovered a very different truth In this lively and fascinating account of Hunt and Lipo s definitive solution to the mystery of what really happened on the island they introduce the striking series of archaeological discoveries they made and the path breaking findings of others which led them to compelling new answers to the most perplexing questions about the history of the island Far from irresponsible environmental destroyers they show the Easter Islanders were remarkably inventive environmental stewards devising ingenious methods to enhance the island s agricultural capacity They did not devastate the palm forest and the culture did not descend into brutal violence Perhaps most surprising of all the making and moving of their enormous statutes did not require a bloated population or tax their precious resources their statue building was actually integral to their ability to achieve a delicate balance of sustainability The Easter Islanders it turns out offer us an impressive record of masterful environmental management rich with lessons for confronting the daunting environmental challenges of our own time Shattering the conventional wisdom Hunt and Lipo s ironclad case for a radically different understanding of the story of this most mysterious place is scientific discovery at its very best

Refocusing Ethnographic Museums through Oceanic Lenses
Philipp Schorch, 2020-04-30 Refocusing Ethnographic Museums through Oceanic Lenses offers a collaborative ethnographic investigation of Indigenous museum practices in three Pacific museums located at the corners of the so called Polynesian triangle Bernice Pauahi Bishop Museum Hawai i Museum of New Zealand Te Papa Tongarewa and Museo Antropol gico Padre Sebasti n Englert Rapa Nui Since their inception ethnographic museums have influenced academic and public imaginations of other cultural geographic regions and the often resulting Euro Americentric projection of anthropological imaginations has come under intense pressure as seen in recent debates and conflicts around the Humboldt Forum in Berlin Germany At the same time post colonial renegotiations in former European and American colonies have initiated dramatic changes to anthropological approaches through Indigenous museum practices This book shapes a dialogue between Euro Americentric myopia and Oceanic perspectives by offering historically informed ethnographic insights into Indigenous museum practices grounded in Indigenous epistemologies ontologies and cosmologies In doing so it employs Oceanic lenses that help to reframe Pacific collections in and the production of public understandings through ethnographic museums in Europe and the Americas By offering insights into Indigenous museologies across Oceania the coauthors seek to recalibrate ethnographic museums collections and practices through Indigenous Oceanic approaches and perspectives This in turn should assist any museum scholar and professional in rethinking and redoing their respective institutional settings intellectual frameworks and museum processes when dealing with Oceanic affairs and more broadly in doing the epistemic work needed to confront coloniality not only as a political problem or ethical obligation but as an epistemology as a politics of knowledge A noteworthy feature is the book s layered coauthorship and multi vocality drawing on a collaborative approach that has put the widespread philosophical commitment to dialogical inquiry into seldom practice by systematically co

constituting ethnographic knowledge Further the book shapes an ethnographic kaleidoscope proposing the metaphor of the kaleidoscope as a way of encouraging fluid ethnographic engagements to avoid the impulse to solidify and enclose differences and remain open to changing ethnographic meanings positions performances and relationships The coauthors collaboratively mobilize Oceanic eyes bodies and sovereignties thus enacting an ethnographic kaleidoscopic process and effect aimed at refocusing ethnographic museums through Oceanic lenses **Consequences of Contact** Miki
