for generations Just who or what is causing the commotion is a mystery There are stories that suggest that the Moon is home to extraterrestrials theories that it is not a natural satellite tales of anomalous lights and tales that NASA astronauts saw extraterrestrial ships and ruins of an ancient civilization there There is a rumor that Apollo 13 was saved by extraterrestrials Another story states that there are extraterrestrial bases on the Moon There is even a tale that states that a part of the kingdom of Atlantis was once located there Some even believe that there are cities beneath the surface of the Moon There is an interesting account of a government employee using remote viewing as a means of seeing what is on the Moon His experience is eye opening This is just a sample of the information that will be in The Encyclopedia of Moon Mysteries Secrets Conspiracy Theories Anomalies Extraterrestrials and More For example did you know that Aristotle and Plato wrote about a time when there was no Moon They even gave a name of an ancient tribe of people that lived during that moonless period several of the NASA astronauts reported seeing UFOs while traveling to the Moon the Moon might be hollow Apollo 10 astronauts heard strange space music when traveling on the far side of the Moon strange and unexplained lights have been seen on the Moon for centuries there are said to be ruins of structures on the Moon there is an ancient tale that suggests that the first human was created on the Moon that radio signals have been detected coming from the Moon that famed astronomer Sir John Herschel saw unidentified lights above the Moon during an eclipse that ancient Bolivian symbols tell us that the Moon came into Earth's orbit around 12 000 years ago a psychic was used by the government to relay information about the Moon The book is separated into A to Z sections for easy reference and reading Tall Tales about the Mind and *Brain* Sergio Della Sala, 2007-01-11 Does listening to Mozart make us more intelligent Is there such a thing as a gay gene Does the size of the brain matter Does the moon influence our behaviour Can we communicate with the dead Can graphology tell us anything about a person's character Is the human brain clonable What role do dreams have in cognition Can mind conquer matter and diseases Are out of body experiences possible Can we trust our intuitions To some the answer to all these questions might well be a resounding no but to many people these represent serious beliefs about the mind and brain beliefs that drive their everyday behaviour beliefs that cost them huge amounts of money Whole industries have developed founded on these dubious claims about the mind and brain Even major corporations have dabbled with assessment methods such as those advocated by graphology accepting and rejecting candidates on the basic of their handwriting Expectant parents buy books and tapes by the dozen showing them how to improve the intelligence of their child by playing them classical music People subscribe to expensive therapies founded on beliefs rather than science or risk their health buying books that tell them how they can conquer illness through positive thinking perhaps at the expense of more scientifically proven treatments Tall Tales about the Mind and Brain presents a sweeping survey of common myths about the mind and brain In a lighthearted and accessible style it exposes the truth behind these beliefs how they are perpetuated why people believe them and why they might even exist in the first place Death By
