Glaser, 2022-12-13 Experts all agree that human beings can mitigate climate change by changing how we use energy for heat light movement and production Stewards of heritage sites and collections can engage the public at the grassroots level to raise awareness about the cultural and socioeconomic reasons for past choices that have contributed to climate change This book will help cultural institutions identify ways to interpret new stories through historic places and resources especially if staff have made the commitment to go green Without place based context discussions about energy focus primarily on the science and not the human experience By reminding us of our past practices and values

regarding energy production and use historic places can inspire different ways of thinking about transitioning to different energy sources and question the doctrine that high energy use is necessary for progress Public interpretation can expose the vast energy infrastructure and the impact of energy extraction production and use on place Historic sites offer place based contexts for visitors to interact with and think critically about the processes and the impact of energy development in for example a maritime village This book synthesizes science with the humanities outside of popular media and other politicized spaces to identify different kinds of energy resources in many historic collections or sites It supplements current calls for economic and policy changes because as stewards of historic places we need to do what we can in this all hands on deck moment to prepare for shared stewardship of our future Mystic Seaport Andrew W. German,2005 **Rites and Passages** Margaret S. Creighton,1995-08-25 This book contributes to what has recently been called a new social history of seafaring This new maritime history places sailors themselves at the center not the periphery of the maritime past and explores ways that the history of the sea and the history of the shore have intersected It differs from traditional accounts which celebrate exotic trades powerful merchants maritime technologies and military exploits Drawn on the evidence of nearly two hundred ship logs and sailors diaries Rites and Passages examines American whalemens at the height of the whaling industry in the 1800s and argues that whaling life and culture was shaped by both the American mainland and by the exigencies of ocean life Unlike other published accounts of seafaring this work brings gender into the maritime equation not only with a discussion of the ways that women figured in this male world but also with an examination of the ways that seafaring served as a rite of passage into manhood The Mystic Seaport All Seasons Cookbook Mystic Seaport Museum,1988 This cookbook gives an exciting glimpse into seasonal meal preparation adapted to the ever changing weather patterns of the regional northeast Creativity runs the gamut from the typical pack and go fare of the summer to the fortifying soups and stews savored by a winter s fire Mystic Seaport and the Origins of Freedom!
