knowledge cultural enthusiasts or anyone curious about India's esoteric traditions The Aghori Tradition unveils the mysteries of a path that sees no dualities and reveres the sacredness of existence itself *Brahman→E = MC2 (Science and the Mystical Secrets of the Universe)* James Wallace, 2022-07-22 Our century the 20th will complete the two thousandth year after Christ's appearance Many students of mysticism and the occult believe that the last years of this century will complete another world cycle in the development of man Nostradamus was one among many who prophesied a global catastrophe in the year 1999 Certainly the growth in scientific knowledge over the last 100 years and the ever increasing pace at which new discoveries are being made gives one the impression that mankind is trying to catch up on lost time Physics in particular has undergone some revolutionary changes Newtonian concepts and ideas though still valid in general terms have been superimposed by what is today popularly known as the New Physics We are now literally looking into the heart of matter which despite its solidity is nevertheless recognised as energy that has developed substance on the wings of speed In fact so closely are velocity and mass interlinked that in many experiments it is impossible to distinguish one from the other Faced with this dilemma even our scientists have begun to philosophize New theories and concepts that appear bizarre when first encountered by the non scientist are constantly being brandished in scientific circles every one of them being supported by algebraic equations Machines which are four miles long have been constructed to study the behaviours of these tiny subatomic pellets of energy And it has been found that they are the product of a mysterious void appearing from and disappearing into nowhere Further all subatomic particles appear to be born with a death wish No sooner are they created they disintegrate into other more stable particles as if they were born with the desire to sacrifice themselves for the continued propagation of our material reality The Mayan Factor José Argüelles, 1987-04-01 Visionary historian Argüelles unravels the harmonic code of the ancient Maya providing valuable keys to understanding the next twenty years of human evolution Heart of the Eastern Mystical Teaching Hari Prasad Shastri, 2014-09-25 This is an account of the life and teachings of a God realised Mahatma Shri Dada of Aligarh 1854-1910 a life given to sharing his knowledge of ultimate reality and relieving distress in whatever form it confronted him Shri Dada was a traditional teacher of the way of Self Knowledge Adhyatma Yoga based on the philosophy of non duality Advaita Unlike many of the great spiritual figures of the time Shri Dada remained in the world as a family man earning his livelihood and bearing his share of life's trials His short sermons and his response to events and to people give the surest indication of how to advance one's spiritual progress in daily life intent on expanding your limited experience of a fraction of the finite world to consciousness of infinity perfect peace bliss and love Shri Dada was known as the Saint Universal who saw that all religions lead to the same goal and for whom Hindus and Moslems Christians and Jains are waves and bubbles of the same water of love There are several interchanges with people of other faiths and the book is an antidote to religious narrowness of any kind *Mystical sword* Debasis Chakraborty, *Mystical Sword A Tale of Power Destiny and the Unknown* In a world where legends and myths intertwine with reality

Mystical Moments and Unitive Thinking Dan Merkur,1999-02-11 Merkur proposes an alternative to the traditional psychoanalytic explanation of mystical experiences as regression to the solipsism of earliest infancy He does this by viewing unitive thinking as a line of cognitive development and mystical moments as creative inspirations on unitive topics Utilizing classical self reports by Christian Jewish and Muslim mystics Patanjali s Yoga Sutras and modern Western peak experiences Merkur argues that experiences of mystical union are manifestations of a broader category of psychological processes that manifest in scientific and moral thought as well as in mysticism Unconscious as well as conscious unitive thinking is sometimes realistic and sometimes fantastic in patterns that are consistent with cognitive development in general Mystical moments of unitive thinking may be considered moments of creative inspiration that happen to make use of unitive ideas Building on the psychoanalytic object relations theory that the self is always in relationship with an object Merkur argues that the solipsism of some varieties of mystical union always implies unconscious ideas of a love object who is transcendent

Reality and Mystical Experience F. Samuel Brainard,2008-03-05 Responding to our modern disillusionment with any claims to absolute truth regarding morality or reality this book offers a conceptual approach for discussing absolutes without denying either the relevance of divergent religious and philosophical teachings or the evidence

supporting postmodern and poststructuralist critiques Case studies of mysticism within Advaita Vedānta Hinduism Mādhyamika Buddhism and Nicene Christianity demonstrate the value of this approach and offer many fresh insights into the metaphysical presuppositions of these religions as well as into the nature and value of mystical experience Like Douglas Hofstadter's Gödel Escher Bach this book finds ultimate reality to be rationally graspable only as an eternal fugue of pattern and paradox Yet it does not so much counter other philosophical views as provide a conceptual tool for understanding and classifying incommensurable views
