*A History of Mysticism* Richard H. Jones, 2024-04-01 This book offers a historical overview of mysticism in the world s major religious traditions Beginning with a chapter on the nature of mystical experiences *A History of Mysticism* then turns to a discussion of mysticism s prehistory in shamanism and the early use of psychedelics The possible role of mystical experiences among early Greek philosophers including Socrates and Plato is subsequently addressed followed by chapters on mysticism in Judaism Christianity Islam Hinduism Buddhism Daoism and a variety of present day iterations including New Age mysticism secular mysticism and the scientific study of mystical experiences An appendix covering popular misunderstandings of mystical experiences and mysticism is also included Written in a clear accessible style this book is suitable for students of religion and philosophy as well as general readers interested in mysticism and the world s variety of mystical traditions

**Process Mysticism** Daniel A. Dombrowski, 2023-01-01 Process Mysticism uses the process philosophies of Charles Hartshorne Alfred North Whitehead and Henri Bergson to explore mystical religious experiences The aim is not so much to demonstrate that such experiences are true or veridical as it is to understand in a William Jamesian fashion how they could be possible and not contradict the concept of God held by philosophers and theologians Divine world inclusiveness ideal power and tragedy the ontological argument asceticism and the via negativa divine visions and voices and the aesthetics and ethics of mysticism are all treated in detail The book is ecumenical in that it is meant to illuminate mystical experiences as they occur around the world in different religious traditions but the author is especially familiar with those in the Abrahamic religions Mysticism can refer to either direct experience of God or the claim that such experience is ineffable and both senses of the term are carefully analyzed in the book

*Substance And Shadow (English)* Suhotra Swami, 2021-01-01 *Substance And Shadow* A compelling examination of the deep issues that have fascinated philosophers thinkers and searchers throughout history is presented in *Substance and Shadow* It pushes readers to look deeper than the surface of their perceptions and address the complex mysteries that lie at the heart of life This book is a call to go on a philosophical and metaphysical trip that invites readers to think critically ponder and in the end come to a greater

comprehension of the complex interplay between substance and shadow in the tapestry of life     The Mystic Mind Jerome Kroll, Bernard Bachrach, 2006-06 Drawing on a database of over 1400 medieval holy persons and in depth studies of individual saints this fascinating collaboration between a medieval historian and a professor of psychiatry applies modern biological and psychological research to the lives of medieval mystics and ascetics     *The Unity of Mystical Traditions* Randall Studstill, 2018-08-14 This book argues that mystical doctrines and practices initiate parallel transformative processes in the consciousness of mystics This thesis is supported through a comparative analysis of Tibetan Buddhist Dzogchen rdzogs chen and the medieval German mysticism of Eckhart Suso and Tauler These traditions are interpreted using a system cybernetic model of consciousness This model provides a theoretical framework for assessing the cognitive effects of mystical doctrines and practices and showing how different doctrines and practices may nevertheless initiate common transformative processes This systems approach contributes to current philosophical discourse on mysticism by 1 making possible a precise analysis of the cognitive effects of mystical doctrines and practices and 2 reconciling mystical heterogeneity with the essential unity of mystical traditions     Introducing Religion Robert Ellwood, 2016-10-14 Introducing Religion 4 e explores the different ways of looking at religion in the twenty first century A broad overview to religious studies as a discipline introduces students to the various subjects of religion Introducing Religion teaches readers how to think in academic religious studies and its main areas including sociology of religion psychology of religion history of religion religion and art ethics and more The fourth edition has been expanded with new chapters exploring topics of contemporary interest myth spiritual paths religion and popular culture religion in the computer age religion and war Contemporary topics engage today s students relating the topics to the changing world around them     *Religion and Morality* William J. Wainwright, 2017-03-02 Religion and Morality addresses central issues arising from religion s relation to morality Part I offers a sympathetic but critical appraisal of the claim that features of morality provide evidence for the truth of religious belief Part II examines divine command theories objections to them and positive arguments in their support Part III explores tensions between human morality as ordinarily understood and religious requirements by discussing such issues as the conflict between Buddhist and Christian pacifism and requirements of justice whether virtue without a love of God is really a vice whether the God of the Abrahamic religions could require us to do something that seems clearly immoral and the ambiguous relations between religious mysticism and moral behavior Covering a broad range of topics this book draws on both historical and contemporary literature and explores afresh central issues of morality and religion offering new insights for students academics and the general reader interested in philosophy and religion     Revisoning Transpersonal Theory Jorge N. Ferrer, 2001-10-19 In his striking debut Jorge N Ferrer deconstructs and reconstructs the entire transpersonal project articulating a more sophisticated pluralistic and spiritually grounded transpersonal theory He brings recent ideas in epistemology and the philosophy of science to bear upon core issues in the psychology and philosophy of religion The book s

first half Deconstruction describes the nature and origins of the prevailing vision that has guided transpersonal scholarship so far and identifies some of its main conceptual and practical limitations subtle Cartesianism spiritual narcissism intrasubjective empiricism and reductionistic universalism In the second half of the book Reconstruction Ferrer suggests a way of reconceiving transpersonal ideas without these limitations a participatory vision of human spirituality one which not only places transpersonal studies in greater alignment with the values of the spiritual quest but also discloses a rich variety of spiritual liberations spiritual worlds and even ultimate realities

*Types of Philosophy* William Ernest Hocking, 1929

Notes bibliographiques Index

*The Greeks and the Environment* Laura Westra, T M. Robinson, 1997-04-30 Environmental ethicists have frequently criticized ancient Greek philosophy as anti environmental for a view of philosophy that is counterproductive to environmental ethics and a view of the world that puts nature at the disposal of people This provocative collection of original essays reexamines the views of nature and ecology found in the thought of Plato Aristotle the Stoics and Plotinus Recognizing that these thinkers were not confronted with the environmental degradation that threatens contemporary philosophers the contributors to this book find that the Greeks nevertheless provide an excellent foundation for a sound theory of environmentalism

*The Making of Rhodesia* Hugh Marshall Hole, 2018-10-24 Initially published in 1926 this book seeks to clear some misconceptions of Southern and Northern Rhodesia at the time of the evolution of British colonies that bear the name of Rhodes their founder The author who lived there for twenty three years used official records and reports original photographs and his friends and his own narrative to tell this story

**Going Against the Flow** Alan M. Laibelman, 2004 Most contemporary efforts in philosophy treat metaphysics and ethics as isolated arenas of thought Critical analytical exploration of a multitude of ethical theories emanating from historically diverse philosophical and theological traditions demonstrates that a consistent and comprehensive ethic depends upon a solid metaphysical foundation Building upon a metaphysical scheme first explicated in *The Other Perennial Philosophy A Metaphysical Dialectic* Alan M Laibelman elaborates on a syncretistic ethical system incorporating elements from many cross cultural sources and also develops an extensive theory of consciousness inclusive of both transcendental and existential components

**Aziz Nasafi** Lloyd Ridgeon, 2020-11-25 Shows Nasafi and his legacy in a new light Nasafi s works are of particular interest because they contain valuable descriptions of the different Islamic world views of the age Includes substantial extracts to help illuminate this perceptive study of a neglected figure in the pantheon of Sufi thinkers

*The Ocean of God* Roland Faber, 2019-06-29 The Ocean of God conveys the proposition that the future of religions if they will not want to contribute to the destruction of humanity will become transreligious Based on the assumption that the spiritual impulse of humanity cannot simply be eradicated religiosity will persist in transreligious forms as secularizations naturalizations and transhumanist dreams only envision such transformations but fall short in their ability to replace the force of spirituality to further civilized peace of human existence on Earth and its future in evolutionary ecological and cosmological dimensions In relating the contributions

of religious pluralism to the concept of the unity of religions which have arisen in this new axial age for overcoming the checkered history of religions in furthering peace the program of a polyphilic pluralism with its transreligious discourse based on the insight of the fundamental relativity of religious truth and the special contributions of process philosophy and theology as well as the Bah universe of thought analyses and projects a new religiosity or spirit enabling religions to overcome their deepest motives of strife and warfare
