**Myth America** William Harrison Boyer, 2003 Exposes the conflict between the forces supporting growing corporate power in America and the needs of a democratic society to achieve a just and sustainable future shows how the priorities of the media and schools in furthering the corporate agenda are undermining rather than helping to achieve ecological sustainability and social justice back cover The Measure of a Nation Howard Steven Friedman, 2012 Compares the United States with other affluent democracies in such areas as health crime and violence education democracy and equality and suggests ways the country might improve its standing in these areas *Politics of Fear* Manuel G. Gonzales, Richard Delgado, 2015-12-03 Lucidly written widely informed and uncompromisingly honest a valuable expose Michael Parenti Documents the stunning success of a network of wealthy donors and corporations in creating and sustaining a set of think tanks legal action groups and media strategies Gary Orfield Harvard University What explains the electoral success of Republicans particularly of the ascendant neoconservatives who now dominate the Party Based on a thorough and up to date examination of the New Right over twenty five years The Politics of Fear proposes some provocative answers including globalization new technologies and a far reaching network of right wing think tanks and foundations As the authors show all have opened the doors to a new politics of fear successfully waged by the neoconservatives By manipulating insecurity the New Right has created an extraordinarily successful populist conservative movement Utilizing extensive documentation the authors argue convincingly that the fear of immigrants and racial minorities has served as the most effective tactic in the GOP arsenal while their approach also implicates gays feminists and terrorists The book explains why Americans have willingly supported a party that promises them security just as it delivers greater economic and political insecurity The authors argue that despite their striking political successes neoconservatives have delivered to voters a set of policies harmful to working Americans in the way of regressive tax measures military exploits tort reform deregulation and environmental destruction *The Problem with Survey Research* George Beam, 2017-09-08 The Problem with Survey Research makes a case against survey research as a primary source of reliable information George Beam argues that all survey research instruments all types of asking including polls face to face interviews and focus groups produce unreliable and potentially inaccurate results Because those who rely on survey research only see answers to questions it is impossible for them or anyone else to evaluate the results They cannot know if the answers correspond to respondents actual behaviors objective phenomena or to their true beliefs and opinions subjective phenomena Reliable information can only be acquired by observation experimentation multiple sources of data formal model building and testing document analysis and comparison In fifteen chapters divided into six parts Ubiquity of Survey Research The Problem Asking Instruments Asking Settings Askers and Proper Methods and Research Designs The Problem with Survey Research demonstrates how asking instruments settings in which asking and answering take place and survey researchers themselves skew results and thereby make

answers unreliable The last two chapters and appendices examine observation other methods of data collection and research designs that may produce accurate or correct information and shows how reliance on survey research can be overcome and must be

**Truth for Human Existence and Happiness** Paul Sites, Danny Sites, 2010-07-23 This book is a response to postmodernists who take the position that there is no foundation for truth there are only stories We posit two types of truth truth about existence created by scientists which serves as a foundation of truth for existence Truth about existence describes human nature a major component being the human sense of self Following George Herbert Mead the self is not an entity it is process It is not substantive it is functional There are two phases to the self the I phase and the Me phase The I phase has its roots in biology so when the needs of the self are not being gratified individuals suffer When individuals suffer life is without meaning individuals despair It is human needs and their inherent tie to suffering that points the way to truth for human existence and happiness Because other people value what they need needs and their corresponding values serve as the foundation for truth about existence upon which truth for human existence is constructed

**Politics without Stories** David Ricci, 2016-08-19 Liberal candidates scholars and activists mainly promote pragmatism rather than large and powerful narratives which may be called alpha stories for their commanding presence over time Alternatively conservative counterparts to such liberals tend to promote their policy preferences in alpha stories praising effective markets excellent traditions and limited government In this face off liberals represent a post Enlightenment world where many modern people following Max Weber are disenchanted while many conservatives echoing Edmund Burke cherish stories borrowed from the past Politics without Stories describes this storytelling gap as an electoral disadvantage for liberals because their campaigning lacks and will continue to lack the inspiration and shared commitments that great long term stories can provide Therefore Ricci argues that for tactical purposes liberals should concede their post Enlightenment skepticism and rally around short term stories designed to frame in political campaigns immediate situations which they regard as intolerable These may help liberals win elections and influence the course of modern life
