Myth and Territory in the Spartan Mediterranean Irad Malkin, 2024-06-13 Greek attitudes to settlement and territory were often articulated through myths and cults This book emphasizes less the poetic timeless qualities of the myths than their historical function in the archaic and Classical periods covering the spectrum from explicit charter myths legitimating conquest displacement and settlement to the precedent setting and even aetiological myths rendering new landscapes Greek This spectrum is broadest in the world of Spartan colonization the Spartan Mediterranean where the greater challenges to territorial possession and Sparta's acute self awareness of its relative national youthfulness elicited explicit responses in the form of charter myths The concept of a Spartan Mediterranean in contrast to the image of a land locked Sparta is a major contribution of this book This revised edition contains a substantial new Introduction which engages with critical and scholarly developments on Sparta since the original publication Foundation Myths in Ancient Societies Naoise Mac Sweeney, 2015 Throughout the ancient world origin stories were told across the ancient world in many different ways through poetry prose monumental and decorative arts and performance in civic and religious rituals Foundation myths particularly those about the beginnings of cities and societies played an important role in the dynamics of identity construction and in the negotiation of diplomatic relationships between communities Yet many ancient communities had not one but several foundation myths offering alternative visions and interpretations of their collective origins Seeking to explain this plurality Foundation Myths in Ancient Societies explores origin stories from a range of classical and ancient societies covering both a broad chronological span from Greek colonies to the high Roman empire and a wide geographical area from the central Mediterranean to central Asia Contributors explore the reasons several different sometimes contradictory myths might coexist or even coevolve Collectively the chapters suggest that the ambiguity and dissonance of multiple foundation myths can sometimes be more meaningful than a single coherent origin narrative Foundation Myths in Ancient Societies argues for a both and approach to foundation myths laying a framework for understanding them in dialogue with each other and within a wider mythic context as part of a wider discourse of origins Contributors Lieve Donnellan Alfred Hirt Nao se Mac Sweeney Rachel Mairs Irad Malkin Daniel Ogden Robin Osborne Michael Squire Susanne Turner **Understanding** Greek Religion Jennifer Larson, 2016-03-10 Understanding Greek Religion is one of the first attempts to fully examine any religion from a cognitivist perspective applying methods and findings from the cognitive science of religion to the ancient

Greek world In this book Jennifer Larson shows that many of the fundamentals of Greek religion such as anthropomorphic gods divinatory procedures purity beliefs reciprocity and sympathetic magic arise naturally as by products of normal human cognition Drawing on evidence from across the ancient Greek world Larson provides detailed coverage of Greek theology and local pantheons rituals including processions animal sacrifice and choral dance and afterlife beliefs as they were expressed through hero worship and mystery cults Eighteen in depth essays illustrate the theoretical discussion with primary sources and include case studies of key cult inscriptions from Kyrene Kos and Miletos This volume features maps tables and over twenty images to support and expand on the text and will provide conceptual tools for understanding the actions and beliefs that constitute a religion Additionally Larson offers the first detailed discussion of cognition and memory in the transmission of Greek religious beliefs and rituals as well as a glossary of terms and a bibliographical essay on the cognitive science of religion Understanding Greek Religion is an essential resource for both undergraduate and postgraduate students of Greek culture and ancient Mediterranean religions Environment and Habitation around the Ancient Black Sea David Braund, Vladimir F. Antonopoulos, 2022-06-06 The fluidity of myth and history in antiquity and the ensuing rapidity with which these notions infiltrated and cross fertilized one another has repeatedly attracted the scholarly interest The understanding of myth as a phenomenon imbued with social and historical nuances allows for more than one methodological approaches Within the wider context of interdisciplinary exchange of ideas the present volume returns to origins as it traces and registers the association and interaction between myth and history in various literary genres in Greek and Roman antiquity i e an era when the scientific definitions of and distinctions between myth and history had not yet been perceived as such let alone fully shaped and implemented providing original ideas new interpretations and re evaluations of key texts and less well known passages close readings and catholic overviews The twenty four chapters of this volume expand from Greek epos to lyric poetry historiography dramatic poetry and even beyond to genres of Roman era and late antiquity It is the editors hope that this volume will appeal to students and academic researchers in the areas of classics social and political history archaeology and even social anthropology History in Ancient Greece Claude Calame, 2003-07-22 Surely the ancient Greeks would have been baffled to see what we consider their mythology Here Claude Calame mounts a powerful critique of modern day misconceptions on this front and the lax methodology that has allowed them to prevail He argues that the Greeks viewed their abundance of narratives not as a single mythology but as an archaeology They speculated symbolically on key historical events so that a community of believing citizens could access them efficiently through ritual means Central to the book is Calame s rigorous and fruitful analysis of various accounts of the foundation of that most mythical of the Greek colonies Cyrene in eastern Libya Calame opens with a magisterial historical survey demonstrating today s misapplication of the terms myth and mythology Next he examines the Greeks symbolic discourse to show that these modern concepts arose much later than commonly believed Having established this interpretive framework Calame undertakes a comparative analysis of six accounts of Cyrene s foundation three by Pindar and one each by Herodotus in two different versions Callimachus and Apollonius of Rhodes We see how the underlying narrative was shaped in each into a poetically sophisticated distinctive form by the respective medium a particular poetical genre and the specific socio historical circumstances Calame concludes by arguing in favor of the Greeks symbolic approach to the past and by examining the relation of mythos to poetry and music Technology. Crafting and Artisanal Networks in the Greek and Roman World Diego Elia, Eleni Hasaki, Marco Serino, 2024-12-02 This volume aims to merge theoretical models with methodological approaches on ceramic technology and artisanal networks in the Classical world This convergence of analytical frameworks allowed scholars to explore some traditional archaeological topics that usually have a very low level of visibility such as the skillful gestures of the craftspeople involved the organization

of the ceramic production the dynamics of apprenticeship and knowledge transfer as well as intra and inter regional artisanal mobility in the Graeco Roman communities of practice The papers promote interdisciplinary dialogues among various fields of study such as archaeology archaeometry anthropology ethnoarchaeology experimental archaeology and digital humanities such as Social Network Analysis computational imaging and big data analysis **Spartan Women** Sarah B. Pomeroy, 2002-07-11 This is the first book length examination of Spartan women covering over a thousand years in the history of women from both the elite and lower classes Classicist Sarah B Pomeroy comprehensively analyzes ancient texts and archaeological evidence to construct the world of these elusive though much noticed females Sparta has always posed a challenge to ancient historians because information about the society is relatively scarce Most existing scholarship on Sparta concerns the military history of the city and its heavily male dominated social structure almost as if there were no women in Sparta Yet perhaps the most famous of mythic Greek women Menelaus wife Helen the cause of the Trojan War was herself a Spartan Written by one of the leading authorities on women in antiquity Spartan Women reconstructs the lives and the world of Sparta's women including how their status changed over time and how they held on to their surprising autonomy Proceeding through the archaic classical Hellenistic and Roman periods Spartan Women includes discussions of education family life reproduction religion and athletics A History of the Archaic Greek World Jonathan M. Hall, 2007 Chronicles the history of ancient Greece from 1200 to 479 BCE describing the rise of the city state and citizen militias and examining the origins of egalitarianism The Life and Death of Ancient Cities Greg Woolf, 2020-07-17 The human race is on a 10 000 year urban adventure Our ancestors wandered the planet or lived scattered in villages yet by the end of this century almost all of us will live in cities But that journey has not been a smooth one and urban civilizations have risen and fallen many times in history The ruins of many of them still enchant us This book tells the story of the rise and fall of ancient cities from the end of the Bronze Age to the beginning of the Middle Ages It is a tale of war and politics pestilence and famine triumph and tragedy by turns both fabulous and squalid Its focus is on the ancient Mediterranean Greeks and Romans at the centre but Phoenicians and Etruscans Persians Gauls and Egyptians all play a part The story begins with the Greek discovery of much more ancient urban civilizations in Egypt and the Near East and charts the gradual spread of urbanism to the Atlantic and then the North Sea in the centuries that followed The ancient Mediterranean where our story begins was a harsh environment for urbanism So how were cities first created and then sustained for so long in these apparently unpromising surroundings How did they feed themselves where did they find water and building materials and what did they do with their waste and their dead Why in the end did their rulers give up on them And what it was like to inhabit urban worlds so unlike our own cities plunged into darkness every night cities dominated by the temples of the gods cities of farmers cities of slaves cities of soldiers Ultimately the chief characters in the story are the cities themselves Athens and Sparta Persepolis and Carthage Rome and Alexandria cities that formed great families Their story encompasses the history of the generations of

people who built and inhabited them whose short lives left behind monuments that have inspired city builders ever since and whose ruins stand as stark reminders to the 21st century of the perils as well as the potential rewards of an urban existence

Belonging and Isolation in the Hellenistic World Sheila L. Ager, Riemer A. Faber, 2013-01-01 The Hellenistic period was a time of unprecedented cultural exchange In the wake of Alexander's conquests Greeks and Macedonians began to encounter new peoples new ideas and new ways of life consequently this era is generally considered to have been one of unmatched cosmopolitanism For many individuals however the broadening of horizons brought with it an identity crisis and a sense of being adrift in a world that had undergone a radical structural change Belonging and Isolation in the Hellenistic World presents essays by leading international scholars who consider how the cosmopolitanism of the Hellenistic age also brought about tensions between individuals and communities and between the small local community and the mega community of oikoumene or the inhabited earth With a range of social artistic economic political and literary perspectives the contributors provide a lively exploration of the tensions and opportunities of life in the Hellenistic Mediterranean Sparta and Lakonia & Hellenistic and Roman Sparta A G Leventis Professor of Greek Culture Emeritus Paul Cartledge, Paul Cartledge, Antony Spawforth, Senior Lecturer in Ancient History and Greek Archaeology Antony Spawforth, 2002-04-12 This set includes the revised edition of Sparta and Lakonia by Paul Cartledge and the second edition of Hellenistic and Roman Sparta by Paul Cartledge and Antony Spawforth at the special price of 32 00
