China and Historical Capitalism Timothy Brook, Gregory Blue, 2002-09-05 This book addresses the historical relationship that has arisen between the concept of capitalism and the idea of China Formulated by European intellectuals in order to identify the social formation in which they found themselves capitalism was portrayed as unique to Europe and as an organic outgrowth of Western civilization In this way China was rejected as a model of civilization and seen merely as despotic feudal or stagnant This Eurocentric judgement has hung over all subsequent thinking about China even influencing Chinese perceptions of their own history The aim of this collaborative project is to examine how the experience of capitalism as a European social formation and as a world system has shaped knowledge of China In addition the volume aims to establish new foundations on which a theory of Chinese society might be built in order to perceive and understand Chinese development in less Eurocentric terms

Technocratic Visions J. Justin Castro, James A. Garza, 2022-09-06 *Technocratic Visions* examines the context and societal consequences of technologies technocratic governance and development in Mexico home of the first professional engineering school in the Americas Contributors focus on the influential role of engineers especially civil engineers but also mining engineers military engineers architects and other infrastructural and mechanical technicians During the mid nineteenth century a period of immense upheaval and change domestically and globally troubled governments attempted to expand and modernize Mexico's engineering programs while resisting foreign invasion and adapting new Western technologies to existing precolonial and colonial foundations The Mexican Revolution in 1910 greatly expanded technocratic practices as state agents attempted to control popular unrest and unify disparate communities via science education and infrastructure Within this backdrop of political unrest *Technocratic Visions* describes engineering sites as places both praised and protested where personal local national and global interests combined into new forms of societal creation and as places that became centers of contests over representation health identity and power With an eye on contextualizing current problems stemming from Mexico's historical development this volume reveals how these transformations were uniquely Mexican and thoroughly global

Values, Nature, and Culture in the American Corporation William C. Frederick, 1995 In *Values Nature and Culture in the American Corporation* distinguished ethicist William Frederick explores issues of fundamental importance to all who aspire to conduct their business affairs ethically He begins with an examination of the three value systems in business that are basically incompatible and therefore in constant tension The first is the need for managers to efficiently allocate resources for maximum profits The second is the natural tendency for managers in pursuit of the first goal to accumulate power for its own sake The third is the desire for people in the community to create relationships that will perpetuate these communities Frederick brings in a range of ideas and concepts from the social sciences as well as the natural sciences to illuminate his discussion In the final section of the book he explores a range of issues of current concern to managers including corporate culture and technology

Dewey and Power Randy Hewitt, 2007-01-01 *Dewey and Power* develops out of criticism that John Dewey's work lacks a sufficient concept of power thus rendering his faith in an amelioristic sense of experience and a democratic ideal untenable According to philosopher Cornel West Dewey gives ameliorism its most mature social political and ethical justification Alan Ryan suggests that Dewey represented thinking America at its best Dewey's critics maintain however that this best is not good enough If their criticism of Dewey goes unchallenged one of the most intelligent philosophically consistent visions of ethical behavior in a world shot through with

difference risk danger and change becomes damned The upshot is lost faith in the idea that the give and take of mutual reference and pooled intelligence can lead to ever wider points of contact with each other that will enrich the significance of our individual quests together Furthermore lost faith in ameliorism and democracy implies a lost faith in a democratic education The purpose of Dewey and Power therefore is to explore the diverse critiques of his alleged insufficient concept of power and to represent Dewey's work in a way that his critics' claims can be evaluated The key word here is evaluate The book is not a simple apology for Dewey's position on these matters First the book works out Dewey's concept of power as it comes out of his understanding of the psycho-physiological makeup of the human organism Then the analysis of power as it is psycho-physiologically interpreted is extended to incorporate Dewey's ontological insights especially that of the directing influence of social custom on habit This process unveils a concept of power that includes both domination and liberation Furthermore the relation between Dewey's sense of power and his faith in a democratic ideal is drawn out in explicit detail Next the book provides a full delineation of Dewey's critics' claims and measures the worth of these claims in light of what the preceding examination suggests in reference to Dewey's idea of power This analysis makes clear that Dewey understood that power can be as productively oppressive as it can be productively liberating Finally the book traces out why Dewey's concept of power can be deployed in the construction of a critical democratic education Critical Perspectives on Nonacademic Science and Engineering Paul T. Durbin, 1991 This volume is an attempt to get philosophers to concentrate on what scientists and engineers actually do **US Power and the Internet in International Relations** M. Carr, 2016-04-08 Despite the pervasiveness of the Internet and its importance to a wide range of state functions we still have little understanding of its implications in the context of International Relations Combining the Philosophy of Technology with IR theories of power this study explores state power in the information age *Highways of the Mind* Helen J. Burgess, Jeanne Hamming, 2014-10-31 Stories of the open road have a powerful sway over our imagination particularly in America where the vast web of interstate highways transformed the national identity as well as the national landscape Sometimes seen as the harbinger of a golden future other times as the conduit of a dehumanized dystopia the highway reflects some of our most potent fantasies as well as our deepest anxieties about modernity ecology commerce and individuality In a work rich in embedded multimedia Helen J. Burgess and Jeanne Hamming look at cultural and media representations of the highway in planning documents industrial films corporate ephemera and science fiction narratives to explore how these stories of the road have reconfigured how we think about ourselves and our world *Highways of the Mind* available only on the Apple iBookstore site in iBook format shows how the stories we tell about the highway whether in the service of national pride corporate advertising urban planning or apocalyptic warnings determine how we imagine or fail to imagine the possibilities for human action in built environments

Picking Fights with the Gods Paul Gilk, 2016-08-04 The common understanding of apocalypse suggests End Times Armageddon and the end of the world But the Greek word apokalypsis means none of these things What it does mean is

uncovering disclosing and revelatory That apocalypse is so widely misunderstood as predestined disaster isn't due to natural evolution in meaning To penetrate the misuse of apokalypsis is to discover mythic misrepresentation That is apocalypse doesn't generate End Times but just the opposite End Times compels apokalypsis The actual threat of End Times explicitly so with weapons of mass destruction and Anthropocene climate change forces thoughtful people into a search for fundamental causes Where do these destructive energies originate Why are we so reluctant to recognize the obvious consequences and resistant to embrace available remedies Why do we persist in denial and indifference In these essays Paul Gilk explores the underlying cultural and religious conventions both conservative and liberal that constitute our resistance and refusal To disclose and uncover those conventions to dissolve our oblivion is to awaken to apokalypsis and to realize the depth of our captivity within prevailing mythology both religious and civilizational If End Times is the disease apokalypsis is the cure
