*The "new Woman" Revised* Ellen Wiley Todd, 1993-01-01 In the years between the world wars Manhattan s Fourteenth Street Union Square district became a center

for commercial cultural and political activities and hence a sensitive barometer of the dramatic social changes of the period. It was here that four urban realist painters Kenneth Hayes Miller, Reginald Marsh, Raphael Soyer, and Isabel Bishop placed their images of modern new women. Bargain stores, cheap movie theaters, pinball arcades, and radical political organizations were the backdrop for the women shoppers, office and store workers, and consumers of mass culture portrayed by these artists. Ellen Wiley Todd deftly interprets the painters' complex images as they were refracted through the gender ideology of the period. This is a work of skillful interdisciplinary scholarship combining recent insights from feminist art history, gender studies, and social and cultural theory. Drawing on a range of visual and verbal representations as well as biographical and critical texts, Todd balances the historical context surrounding the painters with nuanced analyses of how each artist's image of womanhood contributed to the continual redefining of the new woman's relationships to men, family, work, feminism, and sexuality.

Mobilizing Women for War Leila J. Rupp, 2015-03-08 To discover how war can affect the status of women in industrial countries, Leila Rupp examines mobilization propaganda directed at women in Nazi Germany and the United States. Her book explores the relationship between ideology and policy, challenging the idea that wars improve the status of women by bringing them into new areas of activity. Using fresh sources for both Germany and the United States, Professor Rupp considers the images of women before and during the war, the role of propaganda in securing their support, and the ideal of feminine behavior in each country. Her analysis shows that propaganda was more intensive in the United States than in Germany and that it figured in the success of American mobilization and the failure of the German campaign to enlist women's participation. The most important function of propaganda, however, consisted in adapting popular conceptions to economic need. The author finds that public images of women can adjust to wartime priorities without threatening traditional assumptions about social roles. The mode of adaptation she suggests helps to explain the lack of change in women's status in postwar society. Far-reaching in its implications for feminist studies, this book offers a new and fruitful approach to the social, economic, and political history of Germany and the United States. Originally published in 1978, The Princeton Legacy Library uses the latest print-on-demand technology to again make available previously out-of-print books from the distinguished backlist of Princeton University Press.
