David J. Lorenzo,1999 This book examines and establishes the importance of one aspect of popular political arguments rhetorical features that draw upon tradition as taken for granted values judgments and calculations It illustrates how popular political arguments draw upon this rhetoric of right unique to each political community to establish the correctness or rightness of a policy proposal It then uses that illustration to argue first that tradition in political arguments is not only present but important second that tradition operates through time in a contextual rather than evolutionary manner and third that political theorists must take seriously the presence of tradition in political arguments in both its substance and its formal aspects The book is based upon a study of political arguments in the Indian religious political movement that grew up around the Indian mystic Aurobindo Ghose and his collaborator Mirra Richard BOOK JACKET Title Summary field provided by Blackwell North America Inc All Rights Reserved

Five Bodies John O'Neill,2004-01-20 Five Bodies offers an introduction to some of the most urgent contemporary

concerns within the sociology of the body The book was first published in 1985 in the USA by Cornell University Press and was nominated for the John Porter Award sponsored by the Canadian Sociology and Anthropology Association A path breaking book it offered a framework for the growing field of the sociology of the body and opened up the body for sociological research This new edition the previous edition was published by Cornell University Press 1985 has been substantially revised and updated to address today s issues of the body in modern life community and politics John O Neill examines how embodied selves and relationships are being re shaped and re figured and how the embodied figures of the polity economy and society represent the contested notions of identity desire wholeness and fragmentation He focuses upon those cultural practices through which we map our macro micro worlds articulating a cosmology a body politic a productivensumptive economy a bio technological frontier of human design and transplantation *Children of the Blood* Bernard Juillerat,2020-08-20 This fascinating book translated from the French explores the Yafar society a forest people living by shifting cultivation hunting and gathering Based on fifteen years of research it offers a detailed examination of all aspects of a society whose material and nutritional relations with their rainforest environment are mediated by a sociocultural system based on a carefully negotiated relationship with natural forces and harmony between the sexes The author shows how these basic ideas can be found in the ritualized and institutional aspects of the Yafar s social life as well as their mythology Rich in detail and insight this book fully documents the Yafar s complex ritual involving a symbolic exchange with the spirit world a secret cult and curing rites presided over by hereditary religious officials The author s analysis of Yafar ideologies reveals that sexual reproduction is the key to their society and the model for continuity and regeneration prescribed by nature *Ordered Universes* Morton Klass,2018-02-02 This innovative introduction to the anthropological study of religion challenges traditional categories and assumptions arguing that too many of them reflect ethnocentric perspectives long discarded by contemporary anthropologists The continued use of such terms as supernatural and cult inescapably communicates that what is under study is not as real or true as the beliefs of the observer This conflict between the axioms of science and Western scholarship and those of the belief systems under study can be avoided with careful attention to terminology and underlying assumptions *Ordered Universes* introduces and explores important anthropological issues concerns and findings about the institution of religion approached as a human cultural universal Klass applies a non ethnocentric perspective to each topic relying on contemporary anthropological theories and using approaches deriving from other subdivisions of the discipline Offering operational non judgmental definitions that avoid taking a position on whether the belief under study is true and providing examples from ethnographic and other literature on religion Klass explores values beliefs witchcraft shamans sacrifice ghosts revitalization and many other concepts In the final chapters he considers the emergence of new religious movements and leaders and evaluates the continuing ideological conflict between proponents of scientistic fundamentalist and post rationalist systems of thought *Witchcraft in the Middle Ages* Jeffrey Burton

Russell,2019-06-30 All the known theories and incidents of witchcraft in Western Europe from the fifth to the fifteenth century are brilliantly set forth in this engaging and comprehensive history Building on a foundation of newly discovered primary sources and recent secondary interpretations Jeffrey Burton Russell first establishes the facts and then explains the phenomenon of witchcraft in terms of its social and religious environment particularly in relation to medieval heresies Russell treats European witchcraft as a product of Christianity grounded in heresy more than in the magic and sorcery that have existed in other societies Skillfully blending narration with analysis he shows how social and religious changes nourished the spread of witchcraft until large portions of medieval Europe were in its grip from the most illiterate peasant to the most skilled philosopher or scientist A significant chapter in the history of ideas and their repression is illuminated by this book Our enduring fascination with the occult gives the author s affirmation that witchcraft arises at times and in areas afflicted with social tensions a special quality of immediacy *Seeking Viable Grassroots Representation Mechanisms in African Constitutions* Charles Mwalimu,2009 In this book Charles Mwalimu explores viable grassroots representation mechanisms in African constitutions in order to positively integrate indigenous and modern systems in Sub Saharan Africa A comparative study method is used to examine the constitutional principles of chieftaincy and local government and their impact on human rights To establish and prove lack of positive integration Mwalimu connects this failure to poor constitutionalism development and stultified growth and human rights violations This book proposes remedial actions to build nondiscriminatory constitutional regimes eradicating violations of human rights **Conflict in Africa** Adda Bruemmer Bozeman,2015-03-08 Do modern Western ideas about the nature of conflict and its resolution apply to Africa To answer this question Adda Bozeman examines conflict in Africa south of the Sahara in its many social political and cultural aspects past and present The author shows how African perspectives on war and diplomacy have evolved under the influence of nonliteracy tribalism and a concept of undifferentiated time In addition she confirms that indigenous cultural traditions are resurgent everywhere making it unlikely that African political values will become more closely aligned with those of the West The two civilizations view conflict differently and have different ways of resolving it The Africans are more at ease with conflict than their Western counterparts and they do not see war and peace as the mutually exclusive phenomena that Occidental societies hold them to be The author concludes that modern Western concepts of conflict not only do not but cannot allow for African realities Originally published in 1976 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905 Engaging Religions and Worldviews in Africa Yusufu Turaki,2020-04-30 In a world of increasing globalization we live amidst a clash of cultures

religions and worldviews each battling for the human heart and mind In this in depth study Yusufu Turaki offers a theological framework for engaging this clash of perspectives in Africa where traditional African religions colonialism and exposure to Christianity have each had a lasting impact on contemporary African worldviews Professor Turaki undertakes a systematic analysis of the nature of African Traditional Religion its complex history with Christianity and the need for African Christian theology to address its cultural and historical roots effectively He provides both a conceptual framework and practical guide for engaging African cultures and religions with compassion understanding and a firm foundation rooted in scriptural truth This book is an excellent resource for students of religion and theology as well as those interested in Africa s traditional heritage or drawn to the important work of cross cultural and inter religious dialogue
