Matsumura, 1988 **How We Know What Isn't So** Thomas Gilovich, 2008-06-30 Thomas Gilovich offers a wise and readable guide to the fallacy of the obvious in everyday life When can we trust what we believe that teams and players have winning streaks that flattery works or that the more people who agree the more likely they are to be right and when are such beliefs suspect Thomas Gilovich offers a guide to the fallacy of the obvious in everyday life Illustrating his points with examples and supporting them with the latest research findings he documents the cognitive social and motivational processes that distort our thoughts beliefs judgments and decisions In a rapidly changing world the biases and stereotypes that help us process an overload of complex information inevitably distort what we would like to believe is reality Awareness of our propensity to make these systematic errors Gilovich argues is the first step to more effective analysis and action **Official Lies** James T. Bennett, Thomas J. DiLorenzo, 1992 Official Lies opens the curtain on a modern Wizard of Oz the vast propaganda machine headquartered in Washington D C and exposes the ways in which the federal government manipulates opinion in order to increase its own powers **Gay Rights or Wrongs** Dr. J Estep, Dr. F. LaGard Smith, Dr. J.D. A. O'Hare, 2013-10-08 The War on Drugs has traditionally had total abstinence as its target The contributors to this book take a new and challenging approach to problem drug use arguing that abstinence is not the only solution They believe that existing

methods of treatment and control have been inadequate in controlling or improving drug problems and they propose a radical alternative reducing the harm associated with the use of illicit drugs International in scope the book covers a broad range of drugs and of social and individual problems The spread of HIV infection which has been described as a greater threat to individual and public health than drug misuse is also considered The contributors give an overview of the current theories and practices that have helped to minimise the harmful effects of drugs and describe national and city level strategies towards drug problems They also cover the drug policies of several agencies and organisations world wide including police doctors community groups and local authorities Concentrating on reducing drug related harm this is an important contribution to the debate on the future shape of drug control systems It questions the role and function of existing drug laws and discusses how harm reduction will shape day to day work with drug users Provocative and persuasive it should be read by all policy makers and practitioners faced with drugs problems and will do much to help establish new strategies for dealing with drug use strategies that minimise rather than exacerbate drug related harm

Safety in Numbers Edward King, 1994 Gay men remain the group primarily affected by the AIDS epidemic in most industrialized countries Although governments and AIDS organizations increasingly stress the dangers of a heterosexual HIV epidemic it is gay men who are still bearing the brunt of the crisis In the 1980s gay men pioneered safer sex campaigns long before governments responded Rates of HIV transmission were drastically reduced through the most successful health related behaviour changes in history Today however the challenge for health educators is to understand the early successes and to translate them into new and equally effective strategies This unprecedented book provides a comprehensive overview of safer sex education for gay men It offers a critical analysis of the professionalization and de gaying of AIDS education in recent years and demonstrates conclusively how those at greatest risk from HIV have become the most neglected By looking back over the successes of the past it provides an accessible essential

guide to meeting current and future needs Book Jacket **Unprotected** Miriam Grossman, 2007-08-28 Our campuses are steeped in political correctness that's hardly news to anyone But no one realizes that radical social agendas have also taken over campus health and counseling centers with dire consequences Psychiatrist Miriam Grossman knows this better than anyone She has treated more than 2 000 students at one of America's most prestigious universities and she's seen how the anything goes women are just like men safer sex agenda is actually making our sons and daughters sick Dr Grossman takes issue with the experts who suggest that students' problems can be solved with free condoms and Zolof What campus counselors and health providers must do she argues is tell uncomfortable politically incorrect truths especially to young patients in their most vulnerable and confused moments Instead of platitudes and misinformation it's time to offer them real protection *Challenging Euro-America's Politics of Identity* Jorge Luis Andrade Fernandes, 2008-01-07 In this fascinating book Jorge Luis Andrade Fernandes critically examines the impact of colonialism and postcolonial migration on the politics and identity of Euro American imperial powers It considers how outsiders are part of the construction of the native identity of the nation state and also how they challenge its essential coherence when they return to the centre in our increasingly globalized world Engaging in a theoretically motivated discussion of a range of sources film fiction political theory and state policy the volume traces the nomadic movement of bodies across national frontiers helping us to question any natural link between nation states and identities and between places and peoples This is not merely a theoretical problem as Fernandes relates it to the very current crisis of nativistic multicultural identity in the West He examines how politics takes shape in transnational social and cultural encounters and how this new politics is not just about containing aliens but also contains fruitful possibilities for different modes of being Challenging Euro America's Politics of Identity will be of interest to advanced students and scholars in politics geography postcolonial studies cultural studies African and African American studies comparative literature American studies and Ethnic studies **Infections and Inequalities** Paul Farmer, 2001-02-23 Paul Farmer has battled AIDS in rural Haiti and deadly strains of drug resistant tuberculosis in the slums of Peru A physician anthropologist with more than fifteen years in the field Farmer writes from the front lines of the war against these modern plagues and shows why even more than those of history they target the poor This peculiarly modern inequality that permeates AIDS TB malaria and typhoid in the modern world and that feeds emerging or re emerging infectious diseases such as Ebola and cholera is laid bare in Farmer's harrowing memoir rife with stories about diseases and human suffering Using field work and new scholarship to challenge the accepted methodologies of epidemiology and international health Farmer points out that most current explanatory strategies from cost effective treatment to patient noncompliance inevitably lead to blaming the victims In reality larger forces global as well as local determine why some people are sick and others are shielded from risk Yet this moving autobiography is far from a hopeless inventory of insoluble problems Farmer writes of what can be done in the face of seemingly overwhelming odds by physicians and medical students

determined to treat those in need whether in their home countries or through medical outreach programs like Doctors without Borders Infections and Inequalities weds meticulous scholarship in medical anthropology with a passion for solutions remedies for the plagues of the poor and the social illnesses that have sustained them Beyond Sexuality Tim Dean, 2000-09 *Beyond Sexuality* points contemporary sexual politics in a radically new direction Combining a psychoanalytic emphasis on the unconscious with a deep respect for the historical variability of sexual identities this original work of queer theory makes the case for viewing erotic desire as fundamentally impersonal Tim Dean develops a reading of Jacques Lacan that rather than straightening out this notoriously difficult French psychoanalyst brings out the queer tensions and productive incoherencies in his account of desire Dean shows how the Lacanian unconscious deheterosexualizes desire and along the way he reveals how psychoanalytic thinkers as well as queer theorists have failed to exploit the full potential of this conception of desire The book elaborates this by investigating social fantasies about homosexuality and AIDS including gay men's own fantasies about sex and promiscuity in an attempt to illuminate the challenges facing safe sex education Taking on many shibboleths in contemporary psychoanalysis and queer theory and taking no prisoners *Beyond Sexuality* offers an antidote to hagiographical strains in recent work on psychoanalysis Foucault and sexuality *Sex At Risk* Stuart Mitchell Brody, What Brody calls ideological knowledge about AIDS is far more likely to filter through society than scientific knowledge *Sex at Risk* Is a comprehensive review of the scientific literature dealing with the transmission of AIDS
