Myth Of The Powerless State:

The Myth of the Powerless State Linda Weiss, 2018-05-31 Conventional wisdom argues that the integration of the world economy is making national governments less powerful but Linda Weiss disagrees In an era when global society and the transnational market are trendy concepts she suggests that state capacities for domestic transformative strategies provide a competitive advantage Some of the most successful economies rely on state informed and state embedded institutions for governing the economy In fact she contends the strength of external economic pressures is largely determined domestically and the effect of such pressures varies with the strength of domestic institutions Weiss analyzes the sources and varieties of state capacity for governing industrial transformation in contemporary cases the unraveling of Sweden's distributive model of adjustment the evolution of developmental states in Northeast Asia and the parallel strengths of the German and Japanese systems of industrial coordination Her comparative perspective allows her to show how different types of state capacity affect industrial vitality and domestic adjustment to global forces As economic integration proceeds she concludes state capabilities will matter more rather than less in fostering social well being and the creation of wealth

Questioning Globalization Kavaljit Singh, 2005-10 This volume offers a clear presentation of the big questions about globalization

The Myth of the Powerless State Linda Weiss, 1998 It is widely claimed that as the integration of the world economy advances national governments are becoming less relevant losing their powers not only to influence macroeconomic outcomes and to implement social programmes but to determine strategies for managing the industrial economy In the face of such claims of state powerlessness this book proposes that what lies behind some of the most successful economies today is a series of state informed and state embedded institutions for governing the economy The book's central proposition is that the impact of external economic pressures is to a large degree domestically determined varying in important measure according to the robustness or weakness of national institutions This thesis is advanced through an analysis of the sources and varieties of state capacity for governing industrial transformation Focusing on the unravelling of Sweden's distributive model of adjustment on the evolution of developmental states in East Asia as well as on the parallel strengths of the German and Japanese systems of industrial coordination it is shown how different types of state capacity developmental distributive and dual impact on industrial vitality and domestic adjustment to the international economy The comparative perspective developed in this study indicates that as world economic integration proceeds state capabilities will matter more rather than less in fostering social well being and wealth creation This book will be essential reading for 2nd and 3rd year undergraduates in comparative politics political economy and political sociology as well as to all those who have an interest in the nature and prospects of the state in the face of changes to the world economy

The Social Sources of Financial Power Leonard Seabrooke, 2006 A state's financial power is built on the effect its credit property and tax policies have on ordinary people this is the key message of Leonard Seabrooke's comparative historical investigation which turns the spotlight

away from elite financial actors and toward institutions that matter for the majority of citizens Seabrooke suggests that everyday contests between social groups and the state over how the economy should work determine the legitimacy of a state's financial and fiscal system Ideally he believes such contests compel a state to intervene on behalf of people below the median income level leading the state to broaden and deepen its domestic pool of capital while increasing its influence on international finance But to do so Seabrooke asserts a state must first challenge powerful interests that benefit from the concentration of financial wealth Seabrooke's novel constructivist approach is informed by economic sociology and the work of Max Weber This book demonstrates how domestic legitimacy influences the character of international financial orders It will interest all readers concerned with how best to transform state intervention in the economy for the good of the majority

Global Challenges - Local Responses Daniel Fleming, 2006 *The Rise and Fall of the Welfare State* Asbjørn

Wahl, 2011-11-07 In an age of government imposed austerity and after 30 years of neoliberal restructuring the future of the welfare state looks increasingly uncertain Asbjørn Wahl offers an accessible analysis of the situation across Europe identifies the most important challenges and presents practical proposals for combating the assault on welfare Wahl argues that the welfare state should be seen as the result of a class compromise forged in the 20th century which means that it cannot easily be exported internationally He considers the enormous shifts in power relations and the profound internal changes to the welfare state which have occurred during the neoliberal era pointing to the paradigm shift that the welfare state is going through This is illustrated by the shift from welfare to workfare and increased top down control As well as being a fascinating study in its own right that will appeal to students of economics and politics *The Rise and Fall of the Welfare State* also points to an alternative way forward for the trade union movement based on concrete examples of struggles and alliance building

Misplaced Distrust Éric Montpetit, 2011-11-01 Citizens of industrialized countries largely share a sense that national and international governance is inadequate believing not only that public authorities are incapable of making the right policy decisions but also that the entire network of state and civil society actors responsible for the discussion negotiation and implementation of policy choices is untrustworthy Using agro environmental policy development in France the United States and Canada as case studies Éric Montpetit sets out to investigate the validity of this distrust through careful attention to the performance of the relevant policy networks He concludes that distrust in policy networks is for the most part misplaced because high levels of performance by policy networks are more common than many political analysts and citizens expect Opposing the tenets of state retrenchment his study reveals that providing participation in governance to resourceful interest groups and strong government bureaucracies is an essential component of sound environmental policies for agriculture A timely and crucial contribution to the good governance debate this book should be required reading for policy makers and politicians as well as students and scholars of public policy political science environmental studies and government

Models of Capitalism David Coates, 2015-01-28 The contemporary debate on economic policy is dominated by the issue

of which model of capitalism works best **The Battle for Asia** Mark T. Berger, 2004 This book is a history of the Asian region from 1945 to the present day which delineates the various ideological battles over Asia's development **Taking the High Road** David B. Reynolds, 2002 This work examines the continued reality of social democracy in Europe and what lessons can be learned for the US It shows how progressive economic change is already being fought for by labour and community groups throughout America in such efforts as the Living Wage Movement **Labour and Development in East Asia** Kevin Gray, 2014-10-10 The Chinese Communist Party's response to the wave of factory strikes in the early summer of 2010 has raised important questions about the role that labour plays in the transformation of world orders In contrast to previous policies of repression towards labour unrest these recent disputes centring round wages and working conditions have been met with a more permissive response on the part of the state as the CCP ostensibly seeks to facilitate a transition away from a model of political economy based on low road labour relations and export dependence Labour and Development in East Asia shows that such inter linkages between labour geopolitical transformations and states developmental strategies have been much more central to East Asia's development than has commonly been recognised By adopting an explanatory framework of the labour geopolitics development nexus the book theorises and provides an historical analysis of the formation and transformation of the East Asian regional political economy from the end of the Second World War to the present with particular reference to Japan South Korea Taiwan and China This book will be required reading for students and scholars of international relations development studies and comparative politics **Globalization** John Glenn, 2012-08-06 Rather than claim that there exists a common concept of globalization that all parties can agree to this book seeks to examine some of the conceptions and the way in which they render different interpretations of particular aspects of globalization The last two decades have witnessed an explosive proliferation of academic writings on the subject of globalization which has been accompanied by a high level of interest in the media and widespread usage of the term This has inevitably resulted in the meaning of the concept broadening to include a whole host of issues running the attendant risk of losing any conceptual focus it had John Glenn examines five issue areas affected by globalization the economy sovereignty civil society governance communication In so doing the book aims to articulate certain questions within each area which will allow for some judgment to be made concerning the differing perspectives on globalization Globalization will be of interest to students of international political economy and politics and international relations in general **The International Political Economy of Transformation in Argentina, Brazil and Chile Since 1960** E. Pang, 2002-09-06 This book is about how the three most important countries in South America have responded to the challenges of globalization since the mid 1960s the first OPEC price hike the Third World debt crisis leading to the lost decade for the continent and finally bold but often ill planned neo liberal reforms of the 1990s Latin America will experience another cycle of structural changes in the coming decades as the reforms of the 1980s and 1990s failed to produce the desired effects social justice fair income distribution sustainable growth

and consolidation of democracy British Foreign Policy Laurence Martin, John C. Garnett, 1997-01-01 Has the 20th century been one of steady decline for British foreign policy Can there be a distinct British foreign policy in age of regionalism and globalization This study challenges perceptions of irrevocable decline and suggests a more balanced assessment of Britain's strengths and weaknesses As high politics including security concerns diminish in importance economic and commercial concerns increasingly seem to dictate foreign policy On the assumption that what the population seeks is a combination of physical security prosperity and what could be termed moral self approbation this study suggests ways in which Britain could capitalize on its influence and assets to promote its interests A framework is provided for thinking about British foreign policy at a time when globalization multinational companies NGOs the European Union and other factors increasingly constrain the freedom of government and the traditional role of the foreign office **Globalization and Education**

Controversies in White-Collar Crime Gary W. Potter, 2001-07-01 Original writings explore the issue of white collar crime and the controversies that surround it focusing on the vastness of state corporate and white collar crime the victimization that results and the ways these crimes affect society environmentally politically economically and personally The chapters written for this volume tackle all the major controversies related to white collar crime issues of definition questions of harm and cost conflicts of interest in enforcement and control and questions of public policy *Globalizing International Political Economy* Nicola Phillips, 2017-10-07 Despite its claims to global scope and relevance International Political Economy as a field of study remains entrenched in a narrow set of theoretical conceptual and empirical foundations derived from the experiences of the advanced industrialized democracies Bringing together specially commissioned chapters by leading authorities in each key area of debate Globalizing International Political Economy provides a systematic examination and critique of contemporary IPE and puts forward a new agenda for a truly global political economy Social Policy Review 14

Sykes, Robert, Bochel, Catherine, 2002-07-17 Social Policy Review 14 continues the tradition of providing a different style and approach to policy issues from that found in most academic journals and books Chapters have been purposely chosen to review a varied and interesting selection of social policy developments in Britain and internationally and to set current policy developments in a broader context of key trends and debates **Politics and Markets in the Wake of the Asian Crisis**

Mark Beeson, Kanishka Jayasuriya, Hyuk-Rae Kim, Richard Robison, 2003-09-02 The contributors to this book argue vigorously that processes of globalisation are driven by complex political forces and that it is not enough to look at economic factors in isolation
