YHWH in the Wind(s) Violet Chiswa Gandiya,2025-01-31 From interdisciplinary intertextual and comparative analytical perspectives this book engages with the epistemologies of the Global South and Global North to reveal a fresh insight into the image of YHWH in the guise of the phenomenal wind s and the purpose of this image in the biblical Hebrew tradition Therefore this book showcases YHWH appearing with the potent wind s to create and transform chaos into cosmic order at primal creation Likewise this discourse presents YHWH breaking into the historical and social realm in his various sociopolitical roles to destroy all forms of chaotic force by his bluster of wind s and to establish maintain or restore world social order founded on his rule of justice and righteousness This accounts for the view that all

creation and order originate from YHWH and are maintained by YHWH's innate rules of ethical governance. This fresh insight into the sights and sounds of YHWH asserting his rule in the dramaturgical world not only renders new meaning to biblical texts within their contexts but also offers a persuasive message and alluring theological reflections that can shape new discourses to engage and address contemporary theological and social issues of equity, justice, and harmony within YHWH's intended design of world and social order.

The Apocalyptic Literature Prof. Stephen L. Cook, 2011-09-01 Biblical texts create worlds of meaning and invite readers to enter them. When readers enter such textual worlds which are strange and complex, they are confronted with theological claims. With this in mind, the purpose of the IBT series is to help serious readers in their experience of reading and interpreting by providing guides for their journeys into textual worlds. The focus of the series is not so much on the world behind the text as on the worlds created by the texts in their engagement with readers. Nowhere is the world of the biblical text stranger than in the apocalyptic literature of both the Old and New Testaments. In this volume, Stephen Cook makes the puzzling visions and symbols of the biblical apocalyptic literature intelligible to modern readers. He begins with definitions of apocalypticism and apocalyptic literature and introduces the various scholarly approaches to and issues for our understanding of the text. Cook introduces the reader to the social and historical worlds of the apocalyptic groups that gave rise to such literature and leads the reader into a better appreciation and understanding of the theological import of biblical apocalyptic literature. In the second major section of the book, Cook guides the reader through specific examples of the Bible's apocalyptic literature. He addresses both the best-known examples, the biblical books of Daniel and Revelation, and other important but lesser-known examples, Zechariah and some words of Jesus and Paul.

Kings and Prophets Cristiano Grottanelli, 1999-02-18 This collection of essays examines the respective religious and social functions of kings and prophets as they are presented in the biblical narratives. Biblical kingship is easily shown to be a specific instance of an ancient and widespread institution, sacred monarchy, that was the pivot of most state organizations throughout antiquity. Prophetic authority is described as a typical institution of ancient Hebrew society. The difference between monarchy and prophecy is radical because the former implies a hereditary power and is upheld by its subjects who feed their kings with taxes, while the latter derives its authority from allegedly direct divine inspiration, and though it is also economically dependent, it is not explicitly presented as being based upon systematic exploitation. Cristiano Grottanelli interprets the rise of prophecy as a consequence of a crisis of monarchical structures at the beginning of the Iron Age and connects it to similar phenomena attested in ancient Greek texts derived from a similar crisis. Though monarchy finally won the day in the Ancient Mediterranean in a new imperial form, the new literatures in Greek and Hebrew consonantic and alphabetic scripts shaped nonmonarchic figures to which they attributed some of the functions previously pertaining to monarchy. These new literatures, produced by two cultures that were both highly literate and organized according to nonmonarchical principles, diverged radically in their development and final outcomes. In the Hebrew tradition, monolatry and

an official canon of sacred writings were the final result the prophetic principle was thus overcome by a new ideological construction centered upon inspired scriptures rather than upon the impromptu performances of inspired persons In using the prophetic principle against the monarchic the canonical texts paradoxically shaped their own authority above that of living prophets
