Lawson, 2017-03-02 Regionalism has regained momentum in the post Cold War era New economic groupings continue to spring up across the globe while older regional organizations have strengthened their institutional bases and broadened their scope Explaining the reinvigoration of regionalism requires comparative analyses that not only highlight the commonalities that characterize various regional experiments but also account for the differential outcomes and divergent trajectories such projects exhibit This collection of seminal articles on regionalism advances theoretical concepts that can stimulate useful comparisons along with scholarly surveys of important instances of regionalism in the contemporary world Besides classic studies of the European Union the volume includes authoritative overviews and case studies of regionalist projects in East Asia Sub Saharan Africa Latin America the Middle East and Central Eurasia An introductory essay situates these articles in the context of the five decade long research program on regional integration theory **New Regionalisms in the Global Political Economy** Shaun Breslin, 2002 Following the financial crisis at the end of the twentieth century regionalisms in the global political economy have evolved in a number of ways This informative book brings together the leading scholars in the field to provide cutting edge analyses of contemporary regions and regionalist projects Providing an innovative integration of theoretical issues with sophisticated analyses of a wide range of international case studies the chapters systematically consider the relationship between globalization financial crisis and regional projects In combination the contributions to this volume provide the widest possible base within the literature for a truly comparative study of contemporary regionalism **Advancing East Asian Regionalism** Melissa Curley, Nicholas Thomas, 2012-10-12 Developments in East Asia have progressed rapidly in terms of regionalism since the 1997 crisis The end of the Asian miracle called into question not only the capacity of regional states to meet the needs of their attendant peoples but also challenged the viability of regional organizations such as ASEAN to adapt and respond to the changing circumstances Advancing East Asian Regionalism looks at the ways in which ASEAN has expanded since the crisis and evaluates the potential of East Asia to come together in a regional formation one capable of representing the region as a whole akin to the European Community It draws upon the knowledge and perspectives of academics and policy makers actively engaged in the contradictory issues of regionalism Coupling case study material on

regionalism institutions and sectoral cooperation with theoretical debates on regionalization this book is an invaluable resource that pushes our understanding of East Asian regionalism forward **The Scramble for Africa in the 21st Century** Paul Hacourt, Mark Mellow, 2017-07 Regionalism and Uneven Development in Southern Africa Fredrik Söderbaum, Ian Taylor, 2018-05-08 This title was first published in 2003 This volume advances our understanding of how Southern Africa is currently being reconfigured critically examining what has been marketed as the flagship of the Spatial Development Initiative programme in Southern Africa the Maputo Development Corridor MDC By examining a variety of cross cutting levels of governance and development and by focusing on the nexus between the formal and informal processes that stake out the MDC this volume contributes to a detailed understanding of what is perhaps the most important current experiment in regionalism in Africa By engaging regional processes on the micro level and on the ground there is a special emphasis on how local communities regard and respond to the Corridor initiative All chapters in the volume are the result of extensive fieldwork in both Mozambique and South Africa and the contributions are drawn from the region and beyond including Botswana Mozambique Zimbabwe South Africa Sweden and the United States The Political Economy of Regionalism F. Söderbaum, 2004-10-29 The Political Economy of Regionalism The Case of Southern Africa challenges prevailing wisdom showing how ruling political elites and big business join forces with certain external actors in order to promote market integration and economic globalization boost regimes and to satisfy group specific and even personal interests Only rarely do these forms of regionalism contribute to the poor and disadvantaged who instead opt out and survive through informal economic regionalisms or seek to create regionalisms rooted in civil society **Party Systems and Foreign Policy Change in Liberal Democracies** Angelos Chrysosgelos, 2020-12-22 How do political parties affect foreign policy This book answers this question by exploring the role of party politics as source of foreign policy change in liberal democracies The book shifts the focus from individual political parties to party systems as the context in which parties ideologies receive precise content and their preferences are formed The central claim is that foreign policy change arises from within transformed discursive contexts of party competition when a new language of politics that constitutes anew parties self understanding of what they stand for and compete over emerges in a party system By comparing cases of contested foreign policy change the book shows how such transformations in party competition determine whether and when international pressures on a state will translate into decisions to institute foreign policy change and what degree of change will be ultimately implemented With a novel framework which bridges concepts of international relations and comparative politics the book will be of interest to researchers and students in the areas of international relations theory foreign policy analysis and comparative politics and generally to anyone wanting to understand how and when parties elections and voters contribute to international change **Regional Integration, Development, and Governance in Mesoamerica** Alina Gamboa, 2019-09-13 This book provides an overview of governance and development in the Mesoamerican Region MAR the

design and scope of the Plan Puebla Panam PPP its relationship to pre existing regional organisms and its transformation into Proyecto Mesoamerica The PPP was introduced as a holistic project that would reverse the cycles of poverty in Mesoamerica However the plan incited huge opposition from many groups within Mesoamerica and throughout its duration few of its objectives were met The author analyses the plan and describes the regional setting and precursors as well as the US policy towards the Mesoamerican countries Using this approach with an analysis of governance in Mesoamerica this monograph shows a more complete picture of why this ambitious development project did not reach its goals and draws applicable insights to other regions where governance is complex **The Eurasian Project and Europe** David Lane,V.

Samokhvalov,2016-04-29 This book explains the historical and philosophical understanding of Eurasia and its current relevance to the formation of the Eurasian Union It considers Eurasia s historical underpinnings and its current economic political and geo strategic relevance in world politics *The Commonwealth of Independent States Economies* Marcus

Goncalves,Erika Cornelius Smith,2017-09-11 The year 2016 marks the 25th anniversary of the official inauguration of the Commonwealth of Independent States CIS a free association of sovereign states comprised by Russia and 11 other republics that were formerly part of the Soviet Union Although this loose association of states may not exist as a fixed entity on the globe it is believed that this bloc of countries will continue to build upon the various separate regions in the former Soviet space in the coming decade This book provides a regional analysis and a country scan of the CIS regional block economies It examines its history since the breakup of the formal Soviet Union and the formation of the CIS bloc including creation of regional agreements such as the CIS Free Trade Area and the Eurasian Economic Union which now represents more than 180 million people As a whole our text attempts to better understand current and future prospects for economic growth in the region as well as their individual national challenges *Negotiating the Free Trade Area of the Americas* Z.

Arashiro,2011-05-09 The first detailed historical account of the Free Trade Area of the Americas FTAA negotiations this book covers the genesis of the project in the early 1990s to its demise in late 2003 It examines how the FTAA an Inter American policy idea was incompatible with the predominant ideas and beliefs of Brazilian and American decision makers as to how they could and should conduct their countries foreign trade policy in the Western Hemisphere **The Theory, Practice**

and Potential of Regional Development Kelly Vodden,David Douglas,Sean Markey,Sarah Minnes,Bill Reimer,2019-07-04 Canadian regional development today involves multiple actors operating within nested scales from local to national and even international levels Recent approaches to making sense of this complexity have drawn on concepts such as multi level governance relational assets integration innovation and learning regions These new regionalist concepts have become increasingly global in their formation and application yet there has been little critical analysis of Canadian regional development policies and programs or the theories and concepts upon which many contemporary regional development strategies are implicitly based This volume offers the results of five years of cutting edge empirical and theoretical analysis of

changes in Canadian regional development and the potential of new approaches for improving the well being of Canadian communities and regions with an emphasis on rural regions It situates the Canadian approach within comparative experiences and debates offering the opportunity for broader lessons to be learnt This book will be of interest to policy makers and practitioners across Canada and in other jurisdictions where lessons from the Canadian experience may be applicable At the same time the volume contributes to and updates regional development theories and concepts that are taught in our universities and colleges and upon which future research and analysis will build

Changing Regional Alliances for China and the West David Lane,Guichang Zhu,2017-11-15 Since the end of the World War II nation states have formed regions to give them some protection from the processes of globalization and internationalization Against this background the contributors consider the position of China in the processes of regional competitive interdependency This book offers analysis at three levels internal regional and global Chapters consider China s position in regional post socialist associations such as the BRICS the Shanghai Cooperation Organization SCO the Eurasian Economic Union EEU the Silk Road Economic Belt and the One Belt One Road OBOR Contributors discuss how membership in these regional bodies is likely to enhance China s economic power strategic position and political importance A major theme addressed is whether these new powers will become complementary to the American led economic core countries or evolve as countervailing powers Contributors suggest that linkages favored by China s regional associations are more network based and informal in character They are more in keeping with regionalization rather than regional blocs such as the European Union which have locked in members to market driven institutions Thus these new developments move away from a neo liberal market perspective and satisfy the needs of members to retain their economic and political sovereignty This book considers whether these new regional blocs led by China will perform a transformative process for the international order or become an alternative supplementary to but not replacing the existing institutions of the North An important topic is the relationship of Russia and China to the Central Asian countries of the former USSR and the interaction between the Russia led Eurasian Economic Union and the Chinese initiative of the Silk Road Economic Belt There is potential for the evolution of an alliance between China and Russia against the neo liberal order led by the USA Concurrently they bring out possible the tensions between Russia s and China s conflicting interests over influence in Central Asia Reactions to China s rise include the Trump administration s movement from a multilateral to a bi lateral trade policy and the threat of discriminatory tariffs for China The contributors seek to promote a better appreciation of China s role in regional associations and the implications of contemporary developments in economic geo political and international political affairs in the 21st century

China and the European Union José María Beneyto,Chun Ding,Xinning Song,2013-07-10 Any analysis of the current state of international affairs would require devoting a great deal of its efforts to the examination of the People s Republic of China its policies its capabilities its approaches as well as its position regarding a wide range of issues Not in vain the People s

Republic of China is a rising power whose attitudes and policies will have a direct impact on the future development of the international system and the international relations within. Thus the importance of the People's Republic of China status as a permanent member of the United Nations Security Council, the impressive growth of both its GDP and its Defence Budget over the last few years and its relatively good performance through the global financial and economic crisis are all factors that might recommend to pay attention to the evolution of this country.

The Contested Rescaling of Economic Governance in East Asia Shahar Hameiri, Jeffrey Wilson, 2017-10-02

One of the apparent contradictions which has puzzled observers of East Asian politics is why despite the region's considerable economic integration economic governance institutions remain largely underdeveloped. This book stems from the observation that the study of actual forms of economic governance in Asia has been impeded by the dominance of a regionalism problematique. Scholars have focused on the emergence or not of regional multilateral institutions seeking to evaluate these institutions' capacities to enforce disciplines on Asian states. However they have also neglected prior and more pertinent questions regarding the causal determinants of regional economic governance which animate the contributions to this collection. What factors shape the scale and instruments of economic governance in Asia and how and why is economic governance being rescaled between the sub-national, national and regional levels? In the chapters of this book the contributors explore the social and political struggles over the scale and instruments of economic governance. They identify and explain the emergence of a wide variety of regional modes of economic governance, explain the factors shaping the spatial scale of economic governance in Asia and discern the patterns of regional integration to which they give rise. This book was originally published as a special issue of the Australian Journal of International Affairs.
