Perspectives On Business Modelling Understanding And Changing Organizations:

Perspectives on Business Modelling Anders G. Nilsson, Christofer Tolis, Christer Nellborn, 2012-12-06 How can established models and methods be employed for the understanding and change of organisations One of the key issues presented in this book is bridging the communication gap between business leaders and IT experts in companies and public services This is facilitated by combining different models for the development of corporate strategies business processes and information support The leading idea behind this book is to present different perspectives on business modelling based on established theories and practical experiences The book offers advanced knowledge and relevant information on the key issues in business modelling for today's organisations

The Practice of Enterprise Modeling Patrick van Bommel, Stijn Hoppenbrouwers, Sietse Overbeek, Joseph Barjis, 2010-11-03 This volume constitutes the proceedings of the Third IFIP WG 8.1 Working Conference on the Practice of Enterprise Modeling held in Delft The Netherlands during November 9-10 2010 The goal of the conference is both to foster a better understanding of the practice of enterprise modeling and to improve its theoretical foundations The 17 papers presented were carefully reviewed and selected from 44 submissions They reflect the trend for both practitioners and academics to look into domains and conceptualizations addressing dedicated business oriented topics like business intelligence or domain driven process families and thus reach beyond traditional information systems engineering

Business Aspects of Web Services Christof Weinhardt, Benjamin Blau, Tobias Conte, Lilia Filipova-Neumann, Thomas Meinel, Wibke Michalk, 2011-11-10 Driven by maturing Web service technologies and the wide acceptance of the service oriented architecture paradigm the software industry's traditional business models and strategies have begun to change software vendors are turning into service providers In addition in the Web service market a multitude of small and highly specialized providers offer modular services of almost any kind and economic value is created through the interplay of various distributed service providers that jointly contribute to form individualized and integrated solutions This trend can be optimally catalyzed by universally accessible service orchestration platforms service value networks SVNs which are the underlying organizational form of the coordination mechanisms presented in this book Here the authors focus on providing comprehensive business oriented insights into today's trends and challenges that stem from the transition to a service led economy They investigate current and future Web service business models and provide a framework for Web service value networks Pricing mechanism basics are introduced and applied to the specific area of SVNs Strategies for platform providers are analyzed from the viewpoint of a single provider and so are pricing mechanisms in service value networks which are optimal from a network perspective The extended concept of pricing Web service derivatives is also illustrated The presentation concludes with a vision of how Web service markets in the future could be structured and what further developments can be expected to happen This book will be of interest to researchers in business development and practitioners such as managers of SMEs in the service sector as well as computer scientists familiar with Web technologies

The book's comprehensive content provides readers with a thorough understanding of the organizational economic and technical implications of dealing with Web services as the nucleus of modern business models which can be applied to Web services in general and Web service value networks specifically

Enterprise Modeling Janis Stirna, Anne Persson, 2018-09-28 This book offers practical advice on managing enterprise modeling EM projects and facilitating participatory EM sessions Modeling activities often involve groups of people and models are created in a participatory way Ensuring that this is done efficiently requires dedicated individuals who know how to organize modeling projects and sessions how to manage discussions during these sessions and what aspects influence the success and efficiency of modeling in practice The book also includes a summary of the theoretical background to EM although participatory modeling can also be used in conjunction with other methods that are not made for EM such as those made for goal oriented requirements engineering and information systems analysis The first four chapters present an overview of enterprise modeling from various viewpoints including methods processes and organizational challenges providing a background for those that need to refresh their basic knowledge The next six chapters form the core of the book and detail the roles and competences needed in an EM project typical stakeholder behaviors and how to handle them tools and methods for managing participatory modeling and facilitation and how to train modeling experts for these social aspects of modeling Lastly a concluding chapter presents a summary and an outlook on current research in participatory EM This book is intended for anybody who wants to learn more about how to facilitate participatory modeling in practice and how to set up and carry out EM projects It does not require any in depth knowledge about specific EM methods and tools and can be used by students and lecturers for courses on participatory modeling and by practitioners wanting to extend their knowledge of social and organizational topics to become an experienced facilitator and EM project manager

Information Systems Engineering: From Data Analysis to Process Networks
Johannesson, Paul, Soderstrom, Eva, 2008-04-30 Information systems belong to the most complex artifacts built in today's society. Developing, maintaining, and using an information system raises a large number of difficult problems ranging from purely technical to organizational and social. Information Systems Engineering: From Data Analysis to Process Networks presents the most current research on existing and emergent trends on conceptual modeling and information systems engineering, bridging the gap between research and practice by providing a much needed reference point on the design of software systems that evolve seamlessly to adapt to rapidly changing business and organizational practices.

Computational Intelligence In Business And Economics - Proceedings Of The Ms'10 International Conference
Anna M Gil-lafuente, Jose M Merigo-lindahl, 2010-06-18 This book provides some of the most recent developments in Computational Intelligence applied to business and economics presented at the MS 10 International Conference Barcelona 15-17 July 2010. It presents several new theoretical advancements and a wide range of applications in different business and economic areas including accounting, finance, management, marketing, sports, tourism, economics, and politics, and also some applications related with engineering and modeling and simulation.
