Peter Kapitsa On Life Science Kapitsa:

Peter Kapitsa on Life and Science Petr Leonidovich Kapit[s]a, 1968 Kapitza in Cambridge and Moscow J.W. Boag, P.E. Rubinin, D. Shoenberg, 2012-12-02 The unusual career of the famous Soviet physicist Peter Kapitza was divided between Cambridge and Moscow. In Cambridge he was a protégé of Rutherford and while studying there he opened up a new area of research in magnetism and low temperature physics. However in 1934 during a summer visit to the Soviet Union Kapitza was prevented from returning to Cambridge and remained in Moscow for the rest of his long life. In spite of many ups and downs and considerable difficulties in his relations with top political figures in the Kremlin he continued to enhance his scientific reputation and late in life was awarded the Nobel Prize. After an introductory biographical memoir the greater part of the book consists of extracts from the numerous letters Kapitza wrote throughout his life, letters which are distinguished by their eloquence, the originality of his opinions and his forthrightness. His very interesting correspondence with Rutherford and above all his many letters to top political figures in the Soviet Union such as Molotov, Stalin and Khrushchev on questions of scientific and industrial policy are all included in this unique document. Together they provide a rounded picture of a remarkable personality who contributed so much to the scientific and cultural life of both England and the Soviet Union. This fascinating book is illustrated with an impressive collection of historical photographs and should be of interest to science historians, to low temperature physicists and to Sovietologists but above all the book should appeal to the general reader for its human interest. Some of the letters reveal his emotional reactions to the major blows he had to suffer on several occasions while others provide penetrating and often amusing comments on English life and institutions as seen by a Russian and on Soviet life from the inside. *Bulletin of the Atomic Scientists*, 1990-04 The Bulletin of the Atomic Scientists is the premier public resource on scientific and technological developments that impact global security. Founded by Manhattan Project Scientists, the Bulletin's iconic Doomsday Clock stimulates solutions for a safer world. **Soviet Science under Control** Jeffrey L. Roberg, 2016-07-27 Roberg examines the relationship between the political leadership of the Soviet Union and Soviet science. Previously this relationship was typically characterized as one of Communist Party dominance over the sciences. He argues that the relationship between scientists and the leadership is better viewed as bi-directional. The author concludes that scientists had an influence on policy makers in the areas of nuclear policy and human rights although not to the same degree as the Party had on science and scientists. **Three Golden Ages** Alf J. Mapp, 1998-11-13 In this intriguing book best-selling author Alf Mapp Jr explores three periods in Western history that exploded with creativity: Elizabethan England, Renaissance Florence, and America's founding. What enabled these societies to make staggering jumps in scientific knowledge, develop new political structures, or create timeless works of art? **The Soviet Scholar-Bureaucrat** George M. Enteen, 1991-01-21 Mikhail Nikolaevich bridges 19th and 20th century Russian culture as well as Leninism and Stalinism and later became an instrument in Khrushchev's effort at de-Stalinization. Pokrovskii was born in Moscow in 1868. He described

the years before 1905 as his time of democratic illusions and economic materialism His interest in legal Marxism began in the 1890 s but it was only with the Revolution of 1905 that he stepped into the Marxist camp Pokrovskii was a leader in the creation of the historical front an organization of scholars authorized to work out a Marxist theory of the past He formalized the bond between scholarship and politics through his belief that historians should assist party authorities in effecting a cultural revolution thus he supported Stalin s collectivization of agriculture and leg a campaign to silence non Marxist scholars some of whom he had defended earlier Yet his accommodation with Stalin was uneasy and after Pokrovskii s death in 1932 his allegedly abstract sociological schemes were condemned and his career was dubbed pokrovshcina era of the wicked deeds of Pokrovskii Traditions of Science Mediatization in Russia in a Global Context Yuliya B.

Balashova,2019-03-11 This book presents for the first time the general logic of the development of popular science in Russia in relation to the Western experience during the periods of the both the Russian Empire and the USSR From the perspective of scientific achievements Russia is an integral part of the Western world Moreover in the 20th century Russia managed to achieve an unusually high position of authority regarding science in society which was then accompanied by the mediatization of science The level of popular science in the USSR was unusually and uniquely high science replaced religion for the Soviet people The signs of the popular science revival in modern Russia should lead to the construction of an environment that does not duplicate Soviet or Western experience but instead combines them This book will not only be a valuable resource for specialists in the field of history mass communications science and education managers but also for a wide audience of readers interested in popular history Problems of Communism ,1970 **Science at the Cross Roads (Routledge Revivals)**

N. Bukharin et al.,2013-11-05 The papers given by the Soviet Delegation to the Second International Congress of the History of Science and Technology in London in 1931 headed by N I Bukharin exerted a profound influence on Western historiography of science Perhaps the most influential contribution was that of Hessen who made a long and classical statement of Marxist historiography taking Isaac Newton as his example The collection which appeared in Britain at the height of the Depression fostered an acute social awareness and a heated debate among many working scientists Accredited by some as the starting point of a new evaluation of the history of science the book reflects the huge social and economic divide between Socialism and Capitalism present at the time of publication and its influence on intellectual culture and scientific advancement **Science, Technology, and Public Policy: Books, monographs, documents, and articles in journals, 1968 through 1970** Lynton Keith Caldwell,William B. DeVille,Hedvah L. Shuchman,1968
