Company Law in East Asia Roman Tomasic,2018-08-13 First published in 1999 this volume provides an overview of company laws in South East Asia North East Asia and the Pacific The chapters adopt a standard format to allow for comparisons to be made as well as highlighting key features of company laws in each jurisdiction The contributors are experts in their fields and present practical and policy related insights The book also contains some useful overviews of company law themes in Asia **The African Economy** Steve Kayizzi-Mugerwa,2002-01-04 This book offers an in depth analysis of the current state of the African economy and makes constructive suggestions about its future direction The contributors argue that despite enduring challenges such as food security and employment creation Africa faces a brighter future in sustainable growth provided that governance and policy making are effectively employed to maintain peace achieve greater regional collaboration and encourage private sector competitiveness Europe and Central Asia Economic Update, Spring 2025 Matias Belacin,Leonardo Iacovone,Ivailo Izvorski,Sergiy Kasyanenko,2025 Business dynamism and economic growth in Europe and Central Asia have weakened since the late 2000s with productivity growth driven largely by resource reallocation between firms and sectors rather than innovation To move up the value chain countries need to facilitate technology adoption stronger domestic competition and firm level innovation to build a more dynamic private sector Governments should move beyond broad support for small and medium sized enterprises and focus on enabling the most productive firms to expand and compete globally Strengthening competition policies reducing the presence of state owned enterprises and ensuring fair market access are crucial Limited availability of long term financing and risk capital hinders

firm growth and innovation Economic disruptions are a shock in the short term but they provide an opportunity for implementing enterprise and structural reforms all of which are essential for creating better paying jobs and helping countries in the region to achieve high income status *Essays in Macroeconomic Policy* Miranda S. Goeltom,2007 **The Dragon Millennium** Frank-Jürgen Richter,2000-04-30 Already the world s third largest economic power China presents enormous potential for businesses worldwide Opportunities abound and despite current economic crises throughout Asia Richter and the contributors to this unique volume are convinced that opportunities in China can only increase They explore and analyze these opportunities and the management practices that implement them In doing so they study the Chinese economy forecast the future of Chinese business organization and assess China s place in the coming global economy Recent developments in the Chinese economy show how Chinese firms actively pursue new strategies to shape their organizations The current Asian crisis will radically alter the patterns of doing business in China and Richter and his contributors explain how Western firms can cope with these ongoing changes Other books usually from the Western viewpoint tend to describe only the present structure of the Chinese economy Richter s looks at it from China s viewpoint and advocates a dynamic approach to the study of Chinese organizations The analytical scope of the book concentrates more thoroughly on transforming organizations structures than is found in other mainstream studies Their book is thus a true inside view of China s economic and business structures by people who have studied and know it intimately a book that will help corporate executives and their academic colleagues appreciate China s vitality and understand the reasons for her optimism Although knowledge of China is growing it still remains relatively sparse considering the rise to prominence of Chinese business enterprises Richter and his Chinese experts visionaries he calls them seek to fill the gaps They look at the complex questions associated with the concept of ownership and control in China and address economic policy and the development of the Chinese firm They look at the development path of some selected industries then itemize the challenges that multinational companies face in China ending with a discussion of a hypothetical way of managing All of the contributors are members of the worldwide Chinese business and academic communities The research presented inspires further academic discourse and managerial policy in face of evolving Chinese reality The book supplies expert knowledge and support for business practitioners policy analysts scholars and students in China and abroad *Structural Adjustment, Reconstruction and Development in Africa* Kempe Ronald Hope,2019-06-04 First published in 1997 this volume is intended to make a contribution to both the literature and the contentious debate on the relationship between structural adjustment and reconstruction and development in Africa as seen from the multidisciplinary perspective of academics and practitioners working in Africa on African development problems and issues The implementation of structural adjustment in Africa has spawned a considerable and still on going debate with vociferous advocates on both sides of the issue particularly with respect to the efficacy of structural adjustment programmes SAPs as an antidote to Africa s development crisis This book

Trade and Capital Flow among Asian Economies Chris Rowley, 2013-10-18 Trade and capital are important in the Asia region Trade in the APEC region has been increasing but the large rise in China's exports has also been disturbing as it exhibits export substitution The first two papers conclude that every economy has gained in trade though some are more successful than others And that rise in export has a lot to do with a rise in foreign direct investments Macroeconomic stability is the pre condition to growth Empirical studies show that the lack of stability has encouraged capital to flee an economy Similarly a market oriented price driven and matured financial market provides an alternative source of funding The lesson in economic development is that success in economic growth requires both an externally friendly market environment as well as consistent and favourable internal policies

Enterprise and Welfare Reform in Communist Asia Peter Ferdinand,Martin Gainsborough,2004-08-02 Featuring a wide geographical scope this collection of essays surveys enterprise and welfare reforms in all the remaining four Asian communist states China Vietnam Laos and North Korea Since the collapse of the Soviet Union they can no longer place major reliance upon assistance from other fraternal states and have to devise their own strategies for survival All have shown a trend towards greater reliance on market forces though in different ways and to varying degrees Enterprise management has to adapt to this In some of them entrepreneurs have become politically and socially acceptable They may even begin to set trends for social evolution Yet since state enterprises used to be responsible for all welfare payments to employees and their families management reforms cannot be separated from those of welfare arrangements Reducing an enterprise's non commercial obligations for the sake of greater market efficiency is bound to affect welfare provision It also reopens the role of official trade unions How these regimes cope with these conflicting pressures are vital factors in their long term viability
