General Assembly at the Extra Session ... Illinois,1975 Attempts Gideon Yaffe,2012-11-29 Gideon Yaffe presents a ground breaking work which demonstrates the importance of philosophy of action for the law Many people are serving sentences not for completing crimes but for trying to So the law governing attempted crimes is of practical as well as theoretical importance Questions arising in the adjudication of attempts intersect with questions in the philosophy of action such as what intention a person must have if any and what a person must do if anything to be trying to act Yaffe offers solutions to the difficult problems courts face in the adjudication of attempted crimes He argues that the problems courts face admit of principled solution through reflection either on what it is to try to do something or on what evidence is required for someone to be shown to have tried to do something or on what sentence for an attempt is fair given the close relation between attempts and completions The book argues that to try to do something is to be committed by one s intention to each of the components of success and to be guided by those commitments Recognizing the implications of this simple and plausible position helps us to identify principled grounds on which the courts ought to distinguish between defendants charged with attempted crimes **Reform of the Federal Criminal Laws** United States. illness The social structural approach to crime including a consideration of the changing contexts of urban criminality The nature and function of the justice system at the local state and federal levels and basic categories of crimes Drug trafficking crimes drug court efforts and perceived weaknesses in current antidrug efforts Each chapter begins with a set of objectives and concludes with a summary Interactive questions promote classroom discussion and practicum sections facilitate contextual learning Drawn from different and distinct backgrounds the authors each have unique perspectives on crime making for a particularly well rounded text that explores crime from several angles The book attempts to educate readers in the development of new insights on crime and crime causation and provides a greater understanding of the steps that need to be taken before a significant reduction in crime can occur

Fair Opportunity and Responsibility David Owen Brink, 2021 Fair Opportunity and Responsibility lies at the intersection of moral psychology and criminal jurisprudence and analyzes responsibility and its relations to desert culpability excuse blame and punishment It links responsibility with the reactive attitudes but makes the justification of the reactive attitudes depend on a prior and independent conception of responsibility Responsibility and excuse are inversely related an agent is responsible for misconduct if and only if it is not excused As a result we can study responsibility by understanding excuses We excuse misconduct when an agent's capacities or opportunities are significantly impaired because these capacities and opportunities are essential if agents are to have a fair opportunity to avoid wrongdoing This conception of excuse tells us that responsibility itself consists in agents having suitable cognitive and volitional capacities normative competence and a fair opportunity to exercise these capacities free from undue interference situational control Because our reactive attitudes and practices presuppose the fair opportunity conception of responsibility this supports a predominantly retributive conception of blame and punishment that treats culpable wrongdoing as the desert basis of blame and punishment We can then apply the fair opportunity framework to assessing responsibility and excuse in circumstances of structural injustice situational influences in ordinary circumstances and in wartime insanity and psychopathy immaturity addiction and crimes of passion Though fair opportunity has important implications for each issue treating them together allows us to explore common themes and appreciate the need to take partial responsibility and excuse seriously in our practices of blame and punishment
