Youth Development and Critical Education Richard D. Lakes,1997-03-13 Public policy debates about

urban crime and the fate of America's crumbling inner cities suggest a need to consider solutions that create conditions for sustainable community development where youths join with caring adults in intergenerational coalitions at the grassroots. Using a field-based approach, the author reviews over two dozen youth development projects in non-school and after-school settings. The analyses of these programs examine how young people might achieve a level of economic and political self-determination and community control as well as personal fulfillment coupled with healthy adolescent growth. Once empowered with critical insights, young people can exhibit positive real-life displays of their visions, dreams, and ambitions.

*Outsider Art* Daniel Wojcik, 2016-08-25 Outsider art has exploded onto the international art scene, gaining widespread attention for its startling originality and visual power. As an expression of raw creativity, outsider art remains associated with self-taught visionaries, psychiatric patients, trance mediums, eccentric outcasts, and unschooled artistic geniuses who create things outside of mainstream artistic trends and styles. *Outsider Art: Visionary Worlds and Trauma* provides a comprehensive guide through the contested terrain of outsider art and the related domains of art brut, visionary art, art of the insane, and folk art. The book examines the history and primary issues of the field as well as explores the intersection between culture and individual creativity that is at the very heart of outsider art definitions and debates. Daniel Wojcik's interdisciplinary study challenges prevailing assumptions about the idiosyncratic status of outsider artists. This wide-ranging investigation of the art and lives of those labeled outsiders focuses on the ways that personal tragedies and suffering have inspired the art-making process. In some cases, trauma has triggered a creative transformation that has helped artists confront otherwise overwhelming life events. Additionally, Wojcik's study illustrates how vernacular traditions, religious worldviews, ethnic heritage, and popular culture have influenced such art. With its detailed consideration of personal motivations, cultural milieu, and the potentially therapeutic aspects of art-making, this volume provides a deeper understanding of the artistic impulse and human creativity.

**The Temptation** Julia S. Ardery, 1998 Why, beginning in the late 1960s, did expressive objects made by poor people come to be regarded as twentieth-century folk art, increasingly sought after by the middle class and the wealthy? Julia Ardery explores that question through the life story of American Self-taught Art. Florence Laffal, Julius Laffal, 2003 Self-taught art, or outsider art, or folk art is made up of paintings, drawings, sculptures, assemblages, outdoor constructions, and other items created by people with little or no formal training who produce or at least began by producing art without regard to mainstream recognition or the marketplace. There are now several periodicals, numerous yearly auctions, and dozens of museums and galleries devoted to the field. This analysis of the art form in 20th-century America begins by explaining the emergence of self-taught art and introducing the reader to key aspects. The second chapter studies trends by gender, race, and region and examines such issues as education, employment, and the circumstances under which artists became active. The main body of the work consists of 1,319 biographies of artists, dates, location, origins, education, employment, style, media, themes, and unusual characteristics. Another section deals with 44 categories of self-taught art, including media collage.

A Labor of Love New Museum of Contemporary Art (New York, N.Y.), 1996 A Labor of Love uses over one hundred often intricate and labor intensive works of art and installations by Pier Consagra Dianna Frid Liza Lou and forty seven other artists to explore the definitions and categorizations which have separated decorative and hobby arts craft outsider and folk art from the fine arts Supported by brief artists statements an in depth essay by director Marcia Tucker examines the distinctions between amateur and professional artists the impact of feminist theory and practice in ideas of domestic labor and art making the different values assigned to work made in the public and private realms the place of handiwork in American culture today and the traditional separation of high art from the quotidian I m not trying to say that there is no difference at all between art and life aesthetics and politics Now do I believe that folk and fine high and popular art are the same there are differences in relation of making to community differences in intent and value in function and in form purpose training context opportunity reception etc that are neither simple nor singular But when works of art elude and thus destabilize accepted categories they encourage us to think about how when and for what purpose the categories were created Publisher

**Raw Creation** John Maizels, 2000-09-20 The art of self taught artists including visionaries folk creators spiritualists recluses the mad and the socially marginalized was once scorned by the art establishment Among the first to value and collect such works was the French artist Jean Dubuffet 1901 85 who coined the term Art Brut or raw art He saw Art Brut as the purest form of creation because it was uncooked by culture touched by a raw nerve and deriving directly from the psyche Some 50 years later a wave of enthusiasm for contemporary folk art has gripped countries as far apart as India and the United States John Maizels ties these disparate strands together providing an extensive survey of the self taught art of the twentieth century Today a bewildering range of terminology has emerged along with growing enthusiasm for strains of creative expression

outside the conventional art world In *Raw Creation* Maizels traces the history of the recognition and study of this art and examines different theories and definitions that have grown up around it He provides detailed expositions of the work of individual artists ranging from such Art Brut masters as Adolf Wolfli and Aloise Corbaz to such gifted American folk artists as Bill Traylor and Mose Tolliver Devoting several chapters to large scale visionary environments Maizels takes a broad view embracing Rodia towers in Watts Los Angeles the Palais Id al in the South of France and Nek Chand s sculpture garden in north India *Raw Creation* provides an indispensable guide to self taught art and a fascinating account of human creativity
