in this field **Fathers and Mothers: Dilemmas of the Work-Life Balance** Margret Fine-Davis, Jeanne Fagnani, Dino Giovannini, Lis Højgaard, Hilary Clarke, 2004-03-03 At the risk of sounding frivolous there is a good case to be made for the argument that women constitute the revolutionary force behind contemporary social and economic transformation It is in large part the changing role of women that explains the new household structure our altered demographic behaviour the growth of the service economy and as a consequence the new dilemmas that the advanced societies face Most European countries have failed to adapt adequately to the novel challenges and the result is an increasingly serious disequilibrium Women explicitly desire economic independence and the societal collective too needs to maximise female employment And yet this runs up against severe incompatibility problems that then result in very low birth rates Our aging societies need more kids yet fertility levels are often only half of what citizens define as their desired number of children No matter what happens in the next decade we are doomed to have exceedingly small cohorts that in turn must shoulder the massive burden of supporting a retired baby boom generation Hence it is tantamount that tomorrow's adults be maximally productive and yet the typical EU member state invests very little in its children and families *The Spanish Welfare State in European Context* Ana Marta Guillén, Margarita León, 2016-02-17 Following the death of Franco Spain underwent a transition to democracy in the mid 1970s Although a rapid process of modernization occurred the Spanish welfare state was seen until fairly recently as relatively underdeveloped However given the progressive Europeanization and expansion of Spanish social policy questions arise as to whether the Spanish welfare system should still be considered as peripheral to West European welfare states This volume is divided into three sections The first section deals with broad trends in the evolution of the Spanish welfare state To begin with the consolidation path of social protection policies is explored Attention is also paid to the process of Europeanization Furthermore the analysis explores advances in gender equality policies In the second section attention is turned to governance issues such as collective bargaining the interplay among levels of government the welfare mix and public support for social policies The third and final part of the book addresses five main challenges facing the Spanish welfare state in the 21st century namely the need to enhance flexicurity to achieve a better work family balance to coordinate immigration policies with existing social protection to tackle the persistence of high rates of relative poverty and to face intense population ageing both in terms of increasing needs for care and the reform of the pension system The Right to Family Life in the European Union Maribel González Pascual, Aida Torres Pérez, 2016-12-19 Exploring the main developments and challenges for the right to family life in the context of European integration this book examines the right to family life in the EU Charter of Fundamental Rights and the interplay between family life citizenship and free movement it analyzes the combined impact of the EU and the European Convention on Human Rights on the concept of the family protected by the law in light of recent case law Considering the broadening understanding of what constitutes family the challenges for the right to family life in the context of immigration and the protection of families and social rights it provides

H. Chan, Jens

Zinn, Lih-Rong Wang, 2015-10-30 Social policy in modern industrialised societies is increasingly challenged by new social risks. These include insecure employment resulting from ever more volatile labour markets, new family and gender relationships resulting from the growing participation of women in the labour market and the many problems resulting from very much longer human life expectancy. Whereas once social policy had to be in step with a standardised, relatively stable and predictable life course, it now has to cope with non-standardised individual preferences, life courses and families and the consequent increased risks and uncertainties. This book examines these new life courses and their impact on social policy across a range of East Asian societies. It shows how governments and social welfare institutions have been slow to respond to the new challenges. In response, we propose a life course sensitised policy as an approach to manage these risks. Overall, the book provides many new insights which will assist advance social policy in East Asia. **An Introduction to Contemporary Work Psychology** Maria C.W.
