ROMERO LOZANO, LUÍS, 2017-01-01 Este libro desarrolla los contenidos del módulo profesional de Gestión del Montaje de Parques Eólicos del Ciclo Formativo de grado superior de Energías Renovables perteneciente a la familia profesional de Energía y Agua. La obra estructurada en ocho unidades analiza la tecnología eólica desarrollada hasta la actualidad e introduce al lector progresivamente y con un orden lógico en los diferentes conceptos técnicos y prácticos. Comienza con el análisis de los fenómenos meteorológicos que son origen del viento y de los sistemas de aprovechamiento de este tipo de energía; posteriormente define y analiza con detalle qué es un parque eólico, cómo genera, controla y transforma la energía eólica en energía eléctrica, cómo la evacúa a las redes de distribución y cuál es la normativa aplicable. También estudia el concepto y el tipo de proyectos técnicos de energía eólica y los documentos que lo configuran describiendo las fases de desarrollo y montaje. Es importante señalar que los datos y los conceptos presentados reflejan las últimas novedades tecnológicas de los productos de la industria eólica tanto de implantación terrestre como de implantación marina. Asimismo se presentan métodos de planificación estratégica, control logístico y aprovisionamiento de materiales, así como planes de trabajo de las instalaciones y para los ensayos, las inspecciones y los controles de calidad en las operaciones de montaje. Al mismo tiempo la obra incluye una unidad dedicada a las instalaciones de pequeña potencia debido a la importancia y el gran interés que tiene su aplicación tanto en instalaciones aisladas como en instalaciones conectadas a la red para favorecer el autoconsumo y la cogeneración. Finalmente la obra concluye con una unidad centrada en los equipos de seguridad y protección personal para la prevención de riesgos laborales. Además para completar las explicaciones cada unidad ofrece gran número de figuras y esquemas, tiles, cuadros de vocabulario en inglés y de información importante, notas técnicas y actividades propuestas. Al término de cada unidad se incluye un mapa conceptual con sus conceptos clave, un resumen y variadas actividades finales de comprobación de aplicación y de ampliación para que el lector ponga a prueba lo aprendido.
