**Scenes of Projection** Jill H. Casid, 2015-01-01 Theorizing vision and power at the intersections of the histories of psychoanalysis media scientific method and colonization Scenes of Projection poaches the prized instruments at the heart of the so called scientific revolution the projecting telescope camera obscura magic lantern solar microscope and prism From the beginnings of what is retrospectively enshrined as the origins of the Enlightenment and in the wake of colonization the scene of projection has functioned as a contraption for creating a fantasy subject of discarnate vision for the exercise of reason Jill H Casid demonstrates across a range of sites that the scene of projection is neither a static diagram of power nor a fixed architecture but rather a pedagogical setup that operates as an influencing machine of persistent training Thinking with queer and feminist art projects that take up old devices for casting an image to reorient this apparatus of power that produces its subject Scenes of Projection offers a set of theses on the possibilities for felt embodiment out of the damaged and difficult pasts that haunt our present

The Miracle of Analogy Kaja Silverman, 2015-03-04 The Miracle of Analogy is the first of a two volume reconceptualization of photography It argues that photography originates in what is seen rather than in the human eye or the camera lens and that it is the world s primary way of revealing itself to us Neither an index representation nor copy as conventional studies would have it the photographic image is an analogy This principle obtains at every level of its being a photograph analogizes its referent the negative from which it is generated every other print that is struck from that negative and all of its digital offspring Photography is also unstoppably developmental both at the level of the individual image and of medium The photograph moves through time in search of other kin some of which may be visual but others of which may be literary architectural philosophical or literary Finally photography develops with us

and in response to us It assumes historically legible forms but when we divest them of their saving power as we always seem to do it goes elsewhere The present volume focuses on the nineteenth century and some of its contemporary progeny It begins with the camera obscura which morphed into chemical photography and lives on in digital form and ends with Walter Benjamin Key figures discussed along the way include Nic phore Ni pce Louis Daguerre William Fox Talbot Jeff Wall and Joan Fontcuberta

**The Gender of Photography** Nicole Hudgins, 2020-09-02 It would be unthinkable now to omit early female pioneers from any survey of photography s history in the Western world Yet for many years the gendered language of American British and French photographic literature made it appear that women s interactions with early photography did not count as significant contributions Using French and English

photo journals cartoons art criticism novels and early career guides aimed at women this volume will show why and how early photographic clubs journals exhibitions and studios insisted on masculine values and authority and how Victorian women engaged with photography despite that dominant trend Focusing on the period before 1890 when women were yet to develop the self assurance that would lead to broader recognition of the value of their work this study probes the mechanisms by which exclusion took place and explores how women practiced photography anyway both as amateurs and professionals Challenging the marginalization of women s work in the early history of photography this is essential reading for students and scholars of photography history and gender studies
