Recovered Memories:

Recovered Memories Graham M. Davies, Tim Dalgleish, 2003-01-10 The phenomenon of recovered memories has excited much controversy in recent years amongst professionals with extreme positions being held either all such memories are by definition false or any such claim is an attempt to deny the victims of abuse their rights to confront their abusers In this refreshing new approach to the problem Graham Davies and Tim Dalgleish have assembled leading figures from both sides of the debate to provide a balanced overview of empirical evidence as well as evidence from clinical practice *Recovered Memories* Seeking the middle ground unlike most other writing on the topic eschews extreme positions It provides clinicians with findings from the latest research to enhance their understanding of memory and presents pure researchers with a range of experiences encountered in clinical practice for which they presently have few explanations Topics include the impact on family and community members the latest findings on implanted memories and discussion of clinical guidelines for therapeutic practice to avoid potential influence on memory Having weighed the evidence a framework is offered in which true and false recovered memories are seen as the inevitable compliment of true and false continuous memories This important new collection should not be missed by anyone with an interest in memory whether engaged in a clinical legal child protection family welfare or experimental research capacity It is the most authoritative and comprehensive review of the evidence on both sides available to date

The Impact of Internal and External Influences on Memory and their Relevance to Legal Decisions Fabiana Battista, Antonietta Curci, Ivan Mangiulli, Henry Otgaar, 2024-08-02 The fallibility of memory has been often demonstrated A plethora of studies has focused on

external influences that can affect memory reports such as suggestive questioning Adopting different paradigms e.g. misinformation memory conformity the recurrent pattern of findings of these studies is that suggestion can make people prone to falsely recall details that were never experienced i.e. commission errors false details In addition suggestion can make them unable to recall truly experienced events or event related details However internal influences can also affect memory One such internal influence is deception In the last decade several studies have investigated how memory can be affected by deception Specifically these studies have shown that a person who has intentionally deceived the listener about an experienced event subsequently when the person comes forward with the truth shows an impaired memory for such an event This line of research examined the detrimental effects on memory by taking into account different strategies to deceive e.g. false denials feigned amnesia and fabrication and found that the memory outcomes due to deception can vary based on the strategy used to deceive A number of studies has also demonstrated that another type of deception known as self deception can influence our memory This strategy relies on the act of deceiving our own selves and seems to reduce the recall of negative memories The understanding of the effects of external e.g. suggestion and internal e.g. deception self deception on memory is important not only in order to gain more fundamental information on how memory works but also because of the relevance of memory functioning within the legal context Memory distortions for example inaccurate eyewitness testimony can lead to impactful legal decisions such as wrongful convictions Several studies have underlined the harmful consequences of distorted statements Additional support is found in databases from various worldwide associations who strive to obtain fair justice for people involved in wrongful convictions cases for instance www.innocenceproject.org Therefore it is important that researchers continue to provide evidence on the mnemonic impact of internal and external factors that influence legal practitioners to help avoid miscarriages of justice
