Recovering The Ground Critical Exercises In Recollection:

Recovering the Personal Dale W. Cannon, Ronald L. Hall, 2016-09-14 Modernity has radically challenged the assumptions that guide our ordinary lives as persons in ways we are not normally aware. We live our concrete lives taking for granted that personal decisions, desires, relationships, actions, aspirations, values, and knowledge are central to our existence. But in modernity we think of these matters as private, idiosyncratic, and subjective, even irrational. This modern conception of ourselves and the associated way of reflection, known as modern critical thinking, came to dominate our thinking. It culminates in the dualistic philosophy of René Descartes. This dualism has spawned a reductionist view of persons and tainted the personal with connotations of bias, partiality, and privacy, leaving us with the presumption that if we seek to be objective and intellectually respectable, we must expunge the personal. William H. Poteat's work in philosophical anthropology has confronted this concern head on. He undertakes a radical critique of the various forms of mind/body dualism and materialist monism that have dominated Western intellectual concepts of the person. In a unique style that Poteat calls post-critical, he uncovers the staggering incoherencies of these dualisms and shows how they have resulted in a loss of the personal in the modern age. He also formulates a way out of this modern cultural insanity. This constructive dimension of his thought is centered on his signature concept of the mind/body, the pre-reflective ground of personal existence. The twelve contributors in this collection explore outgrowths and implications of Poteat's thought. *Recovering the Personal* will be of interest to a broad range of intellectual readers with interests in philosophy, psychology, theology, and the humanities.

George, Albert Mohler, Graham Cole, Gerald Bray, Elizabeth Newman, Richard Mouw, Thomas Guarino, Will Willimon, and several others. Radical Embodiment David H. Nikkel, 2011-05-26 *Radical Embodiment* refers to an epistemology and anthropology fundamentally rooted in our bodies, as always, in correlation with our natural and social environments. All human rationality, meaning, and value arise not only instrumentally but also substantively from this embodiment in the world. *Radical Embodiment* reacts against Enlightenment mind/body dualism, as well as its monistic offshoots, including the physicalism that reduces everything to component matter, energy, at the expense of subjectivity and meaning. It also rejects certain forms of postmodernism that reinscribe modern dualisms. David H. Nikkel develops and

Reyburn,2019-03-26 What does failure mean for theology In the Bible we find some unsettling answers to this question We find lastness usurping firstness and foolishness undoing wisdom We discover too a weakness more potent than strength and a loss of life that is essential to finding life Jesus himself offers an array of paradoxes and puzzles through his life and teachings He even submits himself to humiliation and death to show the cosmos the true meaning of victory As David Bentley Hart observes most of us would find Christians truly cast in the New Testament mold fairly obnoxious civically reprobate ideologically unsound economically destructive politically irresponsible socially discreditable and really just a bit indecent By incorporating the work of scholars working with a range of frameworks within the Christian tradition Theologies of Failure aims to offer a unique and important contribution to understanding and embracing failure as a pivotal theological category As the various contributors highlight it is a category with a powerful capacity for illuminating our theological concerns and perspectives It is a category that frees us to see old ideas in a brand new light and helps to foster an awareness of ideas that certain modes of analysis may have obscured from our vision In short this book invites readers to consider how both theology and failure can help us ask new questions discover new possibilities and refuse the ways of the world Paths to the

Memory Dmitri Nikulin,2015-07-30 In recent decades memory has become one of the major concepts and a dominant topic in philosophy sociology politics history science cultural studies literary theory and the discussions of trauma and the Holocaust In contemporary debates the concept of memory is often used rather broadly and thus not always unambiguously For this reason the clarification of the range of the historical meaning of the concept of memory is a very important and

urgent task This volume shows how the concept of memory has been used and appropriated in different historical circumstances and how it has changed throughout the history of philosophy In ancient philosophy memory was considered a repository of sensible and mental impressions and was complemented by recollection the process of recovering the content of past thoughts and perceptions Such an understanding of memory led to the development both of mnemotechnics and the attempts to locate memory within the structure of cognitive faculties In contemporary philosophical and historical debates memory frequently substitutes for reason by becoming a predominant capacity to which one refers when one wants to explain not only the personal identity but also a historical political or social phenomenon In contemporary interpretation it is memory and not reason that acts in and through human actions and history which is a critical reaction to the overly rationalized and simplified concept of reason in the Enlightenment Moreover in modernity memory has taken on one of the most distinctive features of reason it is thought of as capable not only of recollecting past events and meanings but also itself In this respect the volume can be also taken as a reflective philosophical attempt by memory to recall itself its functioning and transformations throughout its own history Books In Print 2004-2005 Ed Bowker Staff,Staff Bowker, Ed,2004

Recovering the Ground William H. Poteat,1994-01-01 This book sets forth an ontological Copernican revolution By means of a critical phenomenology it shifts the axis of reflection from the putatively bedrock dualisms in which philosophy was conceived to our lively intentional mindbodies that are ontologically antecedent to beyond the grasp of yet implicated in all reflection In these exercises reflection s center of gravity is shifted to our mindbodies whose meditated whatness can be known in all of its forms of appearance as material objects organisms makers keepers and breakers of promises husbands and wives et cetera and whose unmediated thisness everywhere importunately shows itself From this seamless ontological bedrock all of our dualisms have been brought forth by reflection They never cease to be founded there in action they disappear there How on this new foundation do reflection interpretation thinking speaking time hope and memory come differently to do their work **The Anticolonial Museum** Bruno Brulon Soares,2023-08-18 The Anticolonial Museum acknowledges some of the consequences of colonialism in the current work of museums Looking at museum theory in a critical way it proposes a radical revision of museums rhetoric on decolonisation as well as their public image and practices Bringing together a collection of reflections on decolonisation through the observation of museum performance and discourse the author considers current practices in response to the social claims of marginalised groups and activists Drawing from a genealogy of decolonial thinking in museology Brulon Soares identifies the inherent paradoxes reflected in museum work The book s focus is not exclusively on the reality of colonised countries nor on the context of former imperialist nations instead it raises anticolonial questions finding common ground between the different actors involved in the museum scholars students curators practitioners community members and Indigenous creators One of the central aims of this book is to view the museum as a locus for multiple enunciations thus identifying in museum practice the active possibility of

reconnecting subjectivities and restoring material fluxes to effectively repair the bonds that have been frayed by colonialism and an expanding modernity The Anticolonial Museum will be of great interest to researchers and students engaged in the study of decolonisation It will also be essential for practitioners who wish to reconsider the impact of coloniality on their own position and everyday practice **TLS, the Times Literary Supplement** ,1996 **Paperbound Books in Print 1995**
