because it is recognised that these are themes that have been neglected in discussions about spiritual assessment. It provides nurses and other healthcare professionals with a valuable resource that will assist them with identifying and meeting their patients and clients' spiritual needs. The book, as previously commenced by providing an overview of what is meant by spirituality, this operational definition is derived from the authors' research and experiences in teaching these subjects to a wide range of healthcare professionals. The updated and expanded text will assist readers to engage with the conceptual and theoretical challenges and developments associated with spirituality and spiritual care. The book offers very practical insights and steps for introducing and advancing spiritual assessment in a wide range of healthcare settings. The adoption of a life span approach means that concepts such as spirituality, spiritual care and assessment can be better understood by healthcare professionals working in specialist fields of practice. Each chapter will draw upon up to date evidence to demonstrate the development of both the art and science of spiritual assessment. The book will continue to challenge contemporary thinking, asking for healthcare professionals working within a diverse range of care settings, organisations, institutions, educational contexts to evaluate their practice in relation to spiritual assessment. A primary goal of this 2nd Edition is to continue to advance thinking and practice in spiritual assessment by using a lifespan approach that offers insight into the dilemmas, obstacles, deficits that inhibit or prevent nurses and other allied healthcare providers from supporting clients and patients with their spiritual needs.

A Citizen's Guide to Food Recovery, 1999 *Nursing Management of Pediatric Disaster*
Catherine J. Goodhue, Nancy Blake, 2020-05-13 This textbook describes what nurses need to know about pediatric disaster nursing including public policy and addresses preparedness for all types of disasters, natural and man made and strategies for hospital, school and community preparedness. The book opens with a brief history of disaster nursing and explains the key differences between pediatric and adult disaster nursing. Recent years have been marked by numerous man made and natural disasters which have led nurses to seek new resources to be better prepared in their role as nurses for all types of disasters. Responding to this lack of resources, the book focuses on the unique needs of babies and children. It is the first and only textbook on pediatric disaster preparedness to include both the physical and psychological effects of disaster. Key aspects covered include the psychosocial differences in and how to approach children, family reunification, medications, supplies and equipment and decontamination. Given its breadth of coverage, the book is well suited as a textbook for nursing classes while also offering a valuable resource for nurses working in the field.
