Les méthodes de coordination entre ordres juridiques en droit international privé Paolo Picone, 2000-06-13 The Academy is an institution for the study and teaching of public and private international law and related subjects Its purpose is to encourage a thorough and impartial examination of the problems arising from international relations in the field of law The courses deal with the theoretical and practical aspects of the subject including legislation and case law All Courses at the Academy are in principle published in the language in which they were delivered in the Collected Courses of the Hague Academy of International Law The International Court of Justice and the Judicial Function Gleider I

Hernández, 2014-05-29 This book evaluates the concept of the function of law through the prism of the International Court of Justice It goes beyond a conventional analysis of the Court s case law and applicable law to consider the compromise between supranational order and state sovereignty that lies at the heart of its institutional design It argues that this compromise prevents the Court from playing a progressive role in the development of international law Instead it influences the international legal order in more subtle ways in particular in shaping understanding of the nature or form of the international legal order as a whole The book concludes that the role of the Court is not to advance some universal conception of international law but rather to decide the cases before it in the best possible way within its institutional limits while remaining aware of law s deeper theoretical foundations The book considers three key elements firstly it examines the historical aspects of the Court s constitutive Statute and the manner in which it defines its judicial character Secondly it considers the drafting process the function of a dissenting opinion and the role of the individual judge in an attempt to discern insights on the function of the Court Finally the book examines the Court s practice in regard to three conceptual issues which assist in understanding the Court s function its theory of precedent its definition of the international community and its theory on the completeness of the international legal order **The Oxford Handbook of Women and**

Zannoni, 2019-06-07 Is international law equipped to tackle the challenges posed by the dramatic increase in disasters In *Disaster Management and International Space Law* Diego Zannoni attempts to answer this crucial question through an analysis of the main legal issues involved addressing both prevention and relief with a special focus on major space applications such as remote sensing and telecommunications and the attendant specific legal regimes It is argued that when

lives of human beings are in danger territorial sovereignty becomes to a certain extent porous and bends in front of the value of human life and the urgent need to rescue On the other hand specific obligations were identified to cooperate in the prevention and management of disasters particularly in terms of data sharing *Towards an International Law of Co-progressiveness, Part II* Sienho Yee, 2015-01-08 Expanding upon the normative position of co progressiveness elaborated in *Towards an International Law of Co progressiveness* Martinus Nijhoff 2004 this volume explores membership leadership and responsibility in the international system and how these matters reflect and inform international law Issues discussed include 1 the recognition and role of States civilizations and regions in the international system and how these entities are influenced by factors such as declarations of independence intrinsic and instrumental values diversity and public opinion 2 the distribution of power among States its legitimacy and the consequent influence this distribution has on the international system and world politics and 3 member responsibility for acts of international organizations as well as the possibility of establishing and enforcing universal jurisdiction as a tool for implementing responsibility across the world **Liber**

Peace Maintenance in Africa Giovanni Cellamare, Ivan Ingravallo, 2018-01-25 This book discusses the many legal aspects arising in relation to the maintenance of peace in Africa Over the past twenty years the majority of peace operations have been deployed on this continent most of them established by the UN Security Council sometimes in cooperation with the African Union and other African regional organizations with contributions from the European Union and NATO In some cases the African Union has invoked its primary responsibility for promoting peace security and stability in Africa thus questioning the legal partnership between UN and regional organizations provided for in Chapter VIII of the UN Charter The peace operations deployed in Africa have sometimes received a very robust mandate which also includes the use of force and the protection of civilians human rights The implementation of this broad mandate which goes well beyond the traditional peacekeeping approach requires considerable human and economic resources Moreover it raises several issues of concern with regard to the impact on the economic and political systems of the states in which the operations are deployed and more generally on the exercise of sovereignty over their territorial communities by these states Offering an update for lawyers in practice and in academia interested in the field of international law the book

also contributes to the theoretical studies concerning the activities of international organizations focusing on one of the most challenging issues to emerge in recent times

Corporate Environmental Accountability in International Law Elisa Morgera, 2020 This book explores the evolving role of international law in directing and controlling the conduct of business enterprises in particular multinational corporations with respect to the protection of the environment the sustainable use of natural resources and the respect of inter related human rights It assesses the progress and continuing limitations in the identification of international standards of corporate environmental accountability and responsibility and their implementation by international organizations This assessment shows the extent to which the international community has conceptually and operationally clarified its expectations about acceptable corporate conduct This second edition of Elisa Morgera's book reflects the intensified convergence of international standard setting efforts on corporate environmental accountability with parallel international developments on business and human rights and the environment It also explores the recent emergence of substantive international standards of corporate environmental responsibility which have arisen from a growing number of sectoral guidelines Equally it points to the remaining divergences in the content of international standards of corporate environmental accountability and responsibility which reflect differing views among States of their international obligations to ensure the protection of the environment and the respect of human rights Provided by publisher

International Organizations and the Idea of Autonomy Richard Collins, Nigel D. White, 2011-04-20 International Organizations and the Idea of Autonomy is an exploratory text looking at the idea of intergovernmental organizations as autonomous international actors In the context of concerns over the accountability of powerful international actors exercising increasing levels of legal and political authority in areas as diverse as education health financial markets and international security the book comes at a crucial time Including contributions from leading scholars in the fields of international law politics and governance it addresses themes of institutional autonomy in international law and governance from a range of theoretical and subject specific contexts The collection looks internally at aspects of the institutional law of international organizations and the workings of specific regimes and institutions as well as externally at the proliferation of autonomous organizations in the international legal order as a whole Although primarily a legal text the book takes a broad thematic and inter disciplinary approach In this respect International Organizations and the Idea of Autonomy offers an excellent resource for both practitioners and students undertaking courses of advanced study in international law the law of international organizations global governance as well as aspects of international relations and organization

International Commercial Contracts Giuditta Cordero-Moss, 2024-02 Verifies the impact of national law and transnational rules on international contracts particularly those with an arbitration clause

Interlocking Constitutions Luis I Gordillo, 2012-04-25 The existence of interactions between different but overlapping legal systems has always presented challenges to black letter law This is particularly true of the relationship between international law and domestic law and the relationship between

federal law and the laws of individual federation members Moreover some organisations have created their own supranational constitutional systems the United Nations Charter is the best known and is often referred to as the World Constitution but the European Court of Justice in Luxembourg views the European Treaties as a Constitutional Charter for Europe while the European Court of Human Rights has defined the European Convention on Human Rights as a constitutional instrument of European public order It is in the dynamic relationship between domestic constitutional laws EU law the ECHR and the UN Charter that the most persistent difficulties arise In this context interordinal instability not only provokes strong academic interest but also affects what has been called governance or global government and undermines both legal certainty and individual fundamental rights Different solutions constitutionalist and pluralist have been explored but none of them has received global acceptance In this book Luis Gordillo analyses the interordinal instabilities which arise at the European level focusing on three main strands of case law and their implications Solange Bosphorus and Kadi To solve the difficulties caused by this instability Gordillo proposes a form of soft constitutionalism which he calls interordinal constitutionalism as a means to bring order and stability to global legal governance The original Spanish thesis on which this book is based was awarded the Nicolás Pérez Serrano Prize by the Centro de Estudios Políticos y Constitucionales for the best dissertation in constitutional law 2009 2010

The Principle of Sustainability Klaus Bosselmann, 2016-02-24 This book investigates how sustainability informs the universal principles used in domestic and international law It calls for the acceptance of sustainability as a recognized legal principle which could be applied to the entire legal system rather than just environmental law and regardless of its international or domestic levels To this end the book makes a contribution to a theory of global law by discussing whether as a universally shared concern environmental protection and the principle of sustainability should contribute to the greening of the fundamental principles of law and governance The book will be a valuable resource for students researchers and policy makers working in the areas of environmental law and governance
