Red Holocaust:

Red Holocaust Steven Rosefielde, 2009-12-16 Twentieth and twenty first century communism is a failed experiment in social engineering that needlessly killed approximately 60 million people and perhaps tens of millions more These high crimes against humanity constitute a Red Holocaust that exceeds the combined carnage of the French Reign of Terror Ha Shoah Showa Japan s Asian holocaust and all combat deaths in World War I and II This fascinating book investigates high crimes against humanity in the Soviet Union eastern and central Europe North Korea China Vietnam Laos and Cambodia 1929 2009 and compares the results with Ha Shoah and the Japanese Asian Holocaust As in other studies blame is ascribed to political ideological and personal causes but special emphasis is given to internal contradictions in Marx s utopian model as well as Stalinist and post Stalinist transition systems concocted to realize communist ends This faulty economic engineering forms a bridge to the larger issue of communism s historical failure The book includes a comprehensive study of the transcommunist holocaust a judicial assessment of holocaust culpability and special pleadings an obituary for Stalinism everywhere except North Korea and a death watch for contemporary communism in China Vietnam Laos Cambodia North Korea Cuba and Nepal a comparative assessment of totalitarian high crimes against humanity a call for memory as a defense against recurrent economic racial and ethnic holocausts The book will be useful to undergraduate and higher level students interested in Russian history Stalism communism North and South Korean economic performance and international affairs Steven Rosefielde is a Professor of Economics at the University of North Carolina Chapel Hill and a member of the Russian Academy of Natural Sciences

Yellow Star, Red Star Jelena Subotić, 2019-12-15 Yellow Star Red Star asks why Holocaust memory continues to be so deeply troubled ignored appropriated and obfuscated throughout Eastern Europe even though it was in those lands that most of the extermination campaign occurred As part of accession to the European Union Jelena Suboti shows East European states were required to adopt participate in and contribute to the established Western narrative of the Holocaust This requirement created anxiety and resentment in post communist states Holocaust memory replaced communist terror as the dominant narrative in Eastern Europe focusing instead on predominantly Jewish suffering in World War II Influencing the European Union s own memory politics and legislation in the process post communist states have attempted to reconcile these two memories by pursuing new strategies of Holocaust remembrance The memory symbols and imagery of the Holocaust have been appropriated to represent crimes of communism Yellow Star Red Star presents in depth accounts of Holocaust remembrance practices in Serbia Croatia and Lithuania and extends the discussion to other East European states The book demonstrates how countries

of the region used Holocaust remembrance as a political strategy to resolve their contemporary ontological insecurities insecurities about their identities about their international status and about their relationships with other international actors As Suboti concludes Holocaust memory in Eastern Europe has never been about the Holocaust or about the desire to remember the past whether during communism or in its aftermath Rather it has been about managing national identities in a precarious and uncertain world **Red Holocaust** , Genocide Or Ethnocide, 1933-2007 Bartolomé Clavero,2008

after that period the French Revolution indirectly had a theological root which was then a categorical and metaphysical rejection of Logos That theological substratum has jumped from one era to the next and had and still has historical political economic and spiritual ramifications This book is about the historical and theological struggle of that conflict which had its inception at the foot of the cross **The Contemporary International Committee of the Red Cross** David P.

Forsythe,2024-02-01 The International Committee of the Red Cross ICRC was founded in 1863 and is often considered the gold standard in humanitarian action Despite its many positive achievements over more than 150 years some former ICRC officials believe that the organization is now in decline because of a series of recent policy choices Their view is that the organization has undermined its reputation for independent and neutral humanitarian action while growing too fast and too large which has weakened its reputation for quick tightly focused and effective action in the field David P Forsythe revisits the ICRC policy decisions of recent decades and suggests that the organization is not in fatal decline but that it does need to reconsider some of its policies at the margins Though some errors have been made and some corrections are in order Forsythe argues that its obituary is premature Red Racisms I. Law,2016-01-14 This book analyzes racism in Communist and post Communist contexts examining the Red promise of an end to racism and the racial logics at work in the Soviet Union Central and Eastern Europe Cuba and China placing these in the context of global racialization A Specter

Haunting Europe Paul Hanebrink,2018-11-05 In the 20th century Europe was haunted by a specter of its own imagining Judeo Bolshevism Fear of a Jewish Bolshevik plot to destroy the nations of Europe took hold during the Russian Revolution and spread across the continent Paul Hanebrink shows that the myth of ethno religious threat is still alive today in Westerners fear of Muslims *Handbook of the Economics and Political Economy of Transition* Paul Hare, Gerard

Turley,2013-05-02 Transition from central planning to a market economy involving large scale institutional change and reforms at all levels is often described as the greatest social science experiment in modern times As more than two decades have passed since the fall of the Berlin Wall and the collapse of the Soviet Union it is now an excellent time to take stock of how the transition process has turned out for the economies that have moved on from socialism and the command economy This new handbook assembles a team of leading experts many of whom were closely involved in the transition process as policymakers and policy advisors to explore the major themes that have characterized the transition process After identifying the nature of initial conditions and the strengths and weaknesses of institutions the varying paths and reforms countries have taken are fully analyzed from the shock therapy privatization or gradualism of the early years to the burning issues of the present including global integration and sustainable growth Topics covered include the socialist system pre transition economic reforms institutions the political economy of transition performance and growth enterprise restructuring and people and transition The country coverage is also extensive from the former socialist countries of the USSR and the satellite states of Central and Eastern Europe to the Asian countries of China Vietnam and others The rise of China as a key actor in

the drama is chronicled along with the emergence of a new more confident oil rich Russia The comparative prosperity of the Central European countries such as Poland and the Czech Republic is contrasted with the mixed fortunes of the former USSR where some countries are stagnating while others boom This Handbook of the Economics and Political Economy of Transition is the definitive guide to this new order of things in the former Communist world *Stalking the Antichrists (1965-2012)* Volume 2 George E. Anne Nelson, 2023-08-24 For years the history of the anti Nazi resistance in Germany was hidden and distorted by Cold War politics Providing a much needed corrective Red Orchestra presents the dramatic story of a circle of German citizens who opposed Hitler from the start choosing to stay in Germany to resist Nazism and help its victims The book shines a light on this critical movement which was made up of academics theatre people and factory workers Protestants Catholics and Jews around 150 Germans all told and from all walks of life Drawing on archives memoirs and interviews with survivors award winning scholar and journalist Anne Nelson presents a compelling portrait of the men and women involved and the terrifying day to day decisions in their lives from the Nazi takeover in 1933 to their Gestapo arrest in 1942 Nelson traces the story of the Red Orchestra Rote Kapelle resistance movement within the context of German history showing the stages of the Nazi movement and regime from the 1920s to the end of the Second World War She also constructs the narrative around the life of Greta Kuckhoff and other female figures whose role in the anti Nazi resistance fight is too often unrecognised or under appreciated This revised edition includes A new introduction which explores elements of the Red Orchestra s experience that resonate with our times including the impact of new media technologies the dangers of political polarization and the way the judiciary can be shaped to further the ends of autocracy The introduction will also address the long standing misconception that the German Resistance only took action when it was clear that Germany was losing the war Historiographic updates throughout the book which take account of recent literature and additional archival sources **Zionism Vs. the West** Jonas E. Alexis, 2018-04-03 A person can be brought into bondage in two different ways by force or by his own will Force is a crude way of bringing a person into submission but using the persons own free will can be done sophisticatedly and covertly Under the banner of democracy and freedom America has been under the bondage of what E Michael Jones has aptly called sexual liberation and political control for over fifty years In the first two volumes of the trilogy Alexis explored these ideological themes In this last volume he expands on some of those pernicious ideas emphasizing how Zionism for over sixty years has shaken the moral philosophical and intellectual foundation of much of Western culture The Iraq War alone will cost America at least six trillion dollars and as if to prove that America is still in bondage the oppressors continue to use sophisticated means to seduce Americans so that perpetual wars will never cease to exist in the Middle East and in much of the world This book will seek to address these and related issues and in the process tell us something about the fundamental nature of reality and how to approach this cosmic conflict which has dominated the West for over a thousand years
