Red Earth Revolution In A Sichuan Village:

Red Earth Stephen Lyon Endicott, 1988 Red Earth Stephen Endicott, 1991 Endicott achieved the nearly impossible permission for a foreigner to study a village in rural China the result filled with analysis and unique information about village life over many years is one of the most interesting currently available books on China Jonathan Mirsky Times Literary Supplement **Red Earth: Revolution in a Sichuan Village** Stephen Lyon Endicott, 2021-01-28 *China During the Cultural Revolution, 1966-1976* Tony H. Chang, 1999-01-30 One of the most tumultuous periods in modern Chinese history the Cultural Revolution affected virtually all Chinese people and all aspects of Chinese life including art music and drama education factory management economic planning and medical care Studies of the Cultural Revolution in both Chinese and Western languages have burgeoned over the past three decades This comprehensive easy to use bibliography provides a guide to published English language sources on the Cultural Revolution With over a thousand entries it includes books monographs dissertations and audio visual materials on a broad range of topics from the military education religion and economics to foreign relations population art literature and drama Including titles published through the end of 1997 and a few in 1998 the book provides a general overview of the literature on the Chinese Cultural Revolution and its impact on China Its scope and coverage make it a useful resource for any library whose readers have an interest in modern Chinese history **The Transformation of Rural China** Jonathan Unger, 2016-09-16 During the past quarter century Jonathan Unger has interviewed farmers and rural officials from various parts of China in order to track the extraordinary changes that have swept the countryside from the Maoist era through the Deng era to the present day A leading specialist on rural China Professor Unger presents a vivid picture of life in rural areas during the Maoist revolution and then after the post Mao disbandment of the collectives This is a story of unexpected continuities amidst enormous change Unger describes how rural administrations retain Mao era characteristics despite the major shifts that have occurred in the economic and social hierarchies of villages as collectivization and class struggle gave way to the slogan to get rich is glorious A chapter explores the private entrepreneurship that has blossomed in the prosperous parts of the countryside Another focuses on the tensions and exploitation that have arisen as vast numbers of migrant laborers from poor districts have poured into richer ones Another based on five months of travel by jeep into impoverished villages in the interior describes the dilemmas of under development still faced by many tens of millions of farmers and the ways in which government policies have inadvertently hurt their livelihoods **Mao's China And Post-mao China: Revolution, Recovery And Rejuvenation** Robert Weatherley, 2022-09-06 If the history of modern China was written as a book its author would be accused of losing touch with reality During the twentieth century China underwent two revolutions a number of wars endured a radical and destabilising form of communism and then hurried quickly towards a system of open market economics whilst remaining under the control of a nominally communist party Currently the fastest growing economy in the world with an increasingly sophisticated and

expanding military China is widely expected to emerge as the world's next superpower eclipsing the United States in the not too distant future. However, not everything is going smoothly for Beijing. Unemployment rates are spiralling, inequality is rife, and official corruption at all levels remains an Achilles heel for the Chinese Communist Party despite Xi Jinping's best endeavours to wipe it out. Worst of all, environmental degradation is at such a serious level that it threatens the success of the Chinese economy and the stability of Chinese society. Against this scarcely believable backdrop and based on a series of lectures, seminars, and research conducted by the author, *Mao's China and Post Mao China* captures the dynamics, dynamism, and disasters of Chinese politics since the establishment of the People's Republic of China in 1949. This advanced textbook identifies three key themes that have underpinned the post-revolutionary era: the so-called three Rs: Revolution, Recovery, and Rejuvenation, and is essential reading for anyone interested in the politics of modern China at the undergraduate and postgraduate level.

Rise of the Red Engineers Joel Andreas, 2009-03-10. *Rise of the Red Engineers* explains the tumultuous origins of the class of technocratic officials who rule China today. In a fascinating account, author Joel Andreas chronicles how two mutually hostile groups, the poorly educated peasant revolutionaries who seized power in 1949 and China's old educated elite, coalesced to form a new dominant class. After dispossessing the country's propertied classes, Mao and the Communist Party took radical measures to eliminate class distinctions based on education, aggravating antagonisms between the new political and old cultural elites. Ultimately, however, Mao's attacks on both groups during the Cultural Revolution spurred inter-elite unity, paving the way after his death for the consolidation of a new class that combined their political and cultural resources. This story is told through a case study of Tsinghua University, which as China's premier school of technology was at the epicenter of these conflicts and became the party's preferred training ground for technocrats, including many of China's current leaders.

Village Governance in North China Huaiyin Li, 2005-03-09. This book is about village governance in China during the late nineteenth and early twentieth centuries. Drawing on government archives from Huailu county, Hebei province, it explores local practices and official systems of social control, land taxation, and self-government at the village level. Its analysis of peasant behaviors bridges the gap between the rational choice and moral economy models by taking into account both material and symbolic dimensions of power and interest in the peasant community. The author's interpretation of village-state relations before 1900 transcends the state and society dichotomy and accentuates the interplay between formal and informal institutions and practices. His account of state-making after 1900 underscores the continuity of endogenous arrangements in the course of institutional formalization and the interpenetration between official discourse and popular notions in the new process of political legitimization.

Gao Village Moberg C. F. Gao, 1999-01-01. This book is about Gao Village in Jiangxi province, where the author was born and brought up, leaving when he was twenty-one to study English at Xiamen University. Since emigrating to Australia in 1990, he has returned every year to Gao Village, where his brother still lives. Several accounts of village life in China have been published, but all have been by Western or urban Chinese scholars.

Mobo Gao's account is in every sense one from the inside. Though written as an academic work it does not eschew personal stories and experiences relevant to the themes addressed. These cover a forty year period and fall into four distinct themes: the village before and after land reform, the commune system, the dismantling of the communes and the unfolding impact of the market economy including increased migration to urban areas from the late 1980s onwards. *Far Eastern Economic Review*, 2001

Lone Wolf and Autonomous Cell Terrorism Jeffrey Kaplan, Heléne Lööw, Leena Malkki, 2017-10-02

President Obama has declared that the greatest terrorist threat which America faces is attacks by lone wolf terrorists. This volume expands the lone wolf rubric to include autonomous cells: small groups of terrorists who cooperate but operate independently. The challenge presented by lone wolves and autonomous cells, unlike the threat emanating from established terrorist groups like Al Qaeda, has proven intractable because of the difficulty of gathering intelligence on these actors or effectively countering their actions. Lone wolves operate under the radar, staging deadly attacks such as that at the Boston Marathon and the 2011 attacks in Norway. This volume includes Theory and Policy Studies, individual case studies and the technological impacts of chemical, biological and nuclear weapons as well as the impact of social media in the process of recruitment and radicalization. This book was originally published as a special issue of *Terrorism Political Violence*. *The*

Hmong of China Nicholas Tapp, 2021-10-11. This first ethnography of the Hmong in China is based on Nicholas Tapp's extensive fieldwork in a Hmong village in Sichuan. Basing his analysis on the concepts of context and agency, Tapp discusses the paradoxical ambivalence at the heart of Hmong culture. A paradox arises in the historical and ethnographic construction of the identity of the Hmong by conscious contrast with and in opposition to a majority Han Chinese identity at the same time that large parts of Hmong culture are shared with the Chinese and may be the results of historical processes of adoption, absorption, mimesis or emulation. Tapp examines the Hmong rituals of shamanism, ancestral respect and death and provides details on livelihood, kinship, local organization and intellectual culture. The book is enhanced with thorough accounts of ceremonies, rituals and folktales with translations of Hmong songs and stories. This publication has also been published in paperback, no longer available.

The A to Z of the Chinese Cultural Revolution Guo Jian, Yongyi Song, Yuan Zhou, 2009-09-17. The Cultural Revolution in the People's Republic of China started in 1966 and lasted about a decade. This revolutionary upsurge of Chinese students and workers led by Mao Zedong wreaked havoc in the world's most populous country, often turning things upside down and undermining the party government and army while simultaneously weakening the economy, society and culture. Tens of millions of people were killed, injured or imprisoned during this period and relatively few benefited, aside from Mao Zedong and the Gang of Four, the group that would eventually receive the blame for the events of the Cultural Revolution. Given the turbulence and confusion, it is hard to know just what happened. *The A to Z of the Chinese Cultural Revolution* tackles this task. First in an extensive chronology which traces the events from year to year and month to month, then in an introduction puts these events in context and helps to explain them. But most importantly, the bulk

of the information is provided in a dictionary section with numerous cross referenced entries on important persons places institutions and movements A bibliography points to further sources of information and a glossary will help those researching in Chinese

Power over Property Matthew Noellert, 2020-10-13 Following the end of World War II in 1945 the Chinese Communist Party CCP spent the next three decades carrying out agrarian reform among nearly one third of the world's peasants This book presents a new perspective on the first step of this reform when the CCP helped redistribute over 40 million hectares of land to over three hundred million impoverished peasants in the nationwide land reform movement This land reform the founding myth of the People's Republic of China 1949 present and one of the largest redistributions of wealth and power in history embodies the idea that an equal distribution of property will lead to social and political equality Power Over Property argues that in practice however the opposite occurred the redistribution of political power led to a more equal distribution of property China's land reform was accomplished not only through the state's power to define the distribution of resources but also through village communities prioritizing political entitlements above property rights Through the systematic analysis of never before studied micro level data on practices of land reform in over five hundred villages Power Over Property demonstrates how land reform primarily involved the removal of former power holders the mobilization of mass political participation and the creation of a new social political hierarchy Only after accomplishing all of this was it possible to redistribute land This redistribution moreover was determined by political relations to a new structure of power not just economic relations to the means of production The experience of China's land reform complicates our understanding of the relations between economic social and political equality On the one hand social equality in China was achieved through political not economic means On the other hand the fundamental solution was a more effective hierarchy of fair entitlements not equal rights This book ultimately suggests that focusing on economic equality alone may obscure more important social and political dynamics in the development of the modern world

A Great Restlessness Faith Johnston, 2006-10-30 Dorise Nielsen was a pioneering feminist a radical politician the first Communist elected to Canada's House of Commons and the only woman elected in 1940 But despite her remarkable career until now little has been known about her From her youth in London during World War I to her burial in 1980 in a hero's cemetery in China Nielsen lived through tumultuous times Struggling through the Great Depression as a homesteader's wife in rural Saskatchewan Nielsen rebelled against the poverty and injustice that surrounded her and found like minded activists in the CCF and the Communist Party of Canada In 1940 when leaders of the Communist Party were either interned or underground Nielsen became their voice in Parliament But her activism came at a high price As a single mother in Ottawa she sacrificed a close relationship with her family for her career As a woman in an emerging political organisation her authority was increasingly usurped by younger male party members As a committed communist she moved to Mao's China in 1957 and dedicated her life's work to a cause that went seriously awry Faith Johnston illuminates the life of a woman who paved the way for a generation of women in politics who tried to be both a
