Managing Industrial Knowledge Creation Transfer And Utilization:

Managing Industrial Knowledge Ikujiro Nonaka, David J Teece, 2001-02-06 Managing Industrial Knowledge illuminates the complex processes at work in the creation and successful transfer of corporate knowledge. It is now generally recognized that the competitive advantages of firms depends on their ability to build, utilize and protect knowledge assets. In this volume many of the foremost international authors and pioneers of the study of knowledge in firms present their latest work and insights into organizational knowledge and innovation. In a world where markets, products, technologies, competitors, regulations and even societies change rapidly, continuous innovation and the knowledge that produces innovation have become key. The chapters in this keynote volume shed new light on the contextual factors in knowledge creation, the links between knowledge and innovation in all aspects of business life and the processes by which these may be fostered or lost in organizations.

Knowledge Management in the Construction Industry Abdul Samad Kazi, 2005-01-01 Annotation: Presents a portfolio of concepts, methods, models and tools supported by real life case studies from various corners of the globe, providing insights into the management of knowledge in the construction industry.

The Wiley Blackwell Handbook of the Psychology of Training, Development, and Performance Improvement Kurt Kraiger, Jonathan Passmore, Nuno Rebelo dos Santos, Sigmar Malvezzi, 2020-06-02 This Handbook is sure to become a key resource for any researcher or professional looking for the latest and most innovative thinking from around the world on the full range of topics related to training, development and performance management. Bradford S Bell PhD, Cornell University, USA, Editor, Personnel Psychology. I wish I could have accessed this book many years ago. Comprehensive and scholarly, the four sections: training, e-learning, personal and professional development and performance management fit well together and address a gap in the literature that has been apparent for some time. The psychological perspective speaks to growing interest in the micro foundations of strategic success and the blending together of both formal and informal perspectives on learning in organizations ensures a holistic rather than piecemeal approach to the question of how to build individual knowledge, skills and competences in organizations. I believe that this book will make a significant impact on its target audience in this critical area.

Helen Shipton, Professor of International Human Resource Management, Nottingham Trent University, UK.
