Managing Motherhood Managing Risk Fertility And Danger In West:

Managing Motherhood, Managing Risk Denise Allen, 2004-08-13 An investigation of the consequences resulting from fertility related development interventions in Tanzania

Managing Motherhood, Managing Risk Denise Allen, 2009-10-22 In *Managing Motherhood Managing Risk* Denise Roth Allen persuasively argues that development interventions in the Third World often have unintended and unacknowledged consequences Based on twenty two months of fieldwork in the Shinyanga Region of west central Tanzania this rich and engaging ethnography of women s fertility related experiences highlights the processes by which a set of seemingly well intentioned international maternal health policy recommendations go awry when implemented at the local level An exploration of how threats to maternal health have been defined and addressed at the global national and local levels *Managing Motherhood Managing Risk* presents two contrasting and oftentimes competing definitions of risk those that form the basis of international recommendations and national maternal health policies and those that do not The effect that these contrasting definitions of risk have on women s fertility related experiences at the local level are explored throughout the book This study employs an innovative approach to the analysis of maternal health risk one that situates rural Tanzanian women s fertility related experiences within a broader historical and sociocultural context Beginning with an examination of how maternal health risk was defined and addressed during the early years of British colonial rule in Tanganyika and moving to a discussion of an internationally conceived maternal health initiative that was launched on the world stage in the late 1980s the author explores the similarities in the language used and solutions proposed by health development experts over time This set of official maternal health risks is then compared to an alternative set of risks that emerge when attention is focused on women s experiences of pregnancy and childbirth at the local level Although some of these latter risks are often spoken about as deriving from spiritual or supernatural causes the case studies presented throughout the second half of the book reveal that the concept of risk in the context of pregnancy and childbirth is much more complex involving the interplay of spiritual physical and economic aspects of everyday life

Indigenous Religions Stephen Hunt, 2017-03-02 This volume on Indigenous Religions in The Library of Essays on Sexuality and Religion series focuses on indigenous religions and their attitudes towards human sexuality Through previously published articles the volume gives full scope to attitudes towards sexuality found in a vast range of contrasting expressions of religiosity outside of the so called World Faiths Examples are taken from cultures as far afield as Africa Australasia South America and the Pacific islands Part 1 includes a number of articles centring on the role of sexuality in rites of passage and initiation in relation to liminality maturity and reproduction Part 2 examines the relationship between sexuality spirit possession and witchcraft Part 3 includes such areas as religion gender patriarchy and both hetero

sexuality and non heterosexuality The final part considers sexuality and indigenous religions in a changing and globalised world and entails the themes of sexuality as expressed through cargo cults pilgrimage and religiosity in the context of colonial dominance *Unsafe Motherhood* Nicole S. Berry,2010-10-01 Sheds light not only on the obstacles to making motherhood safer but to improving the health of poor populations in general Social Anthropology Since 1987 when the global community first recognized the high frequency of women in developing countries dying from pregnancy related causes little progress has been made to combat this problem This study follows the global policies that have been implemented in Solol Guatemala in order to decrease high rates of maternal mortality among indigenous Mayan women The author examines the diverse meanings and understandings of motherhood pregnancy birth and birth related death among the biomedical personnel village women their families and midwives These incongruous perspectives in conjunction with the implementation of such policies threaten to disenfranchise clients from their own cultural understandings of self The author investigates how these policies need to meld with the everyday lives of these women and how the failure to do so will lead to a failure to decrease maternal deaths globally From the Introduction An unspoken effect of reducing maternal mortality to a medical problem is that life and death become the only outcomes by which pregnancy and birth are understood The specter of death looms large and limits our full exploration of either our attempts to curb maternal mortality or the phenomenon itself Certainly women s survival during childbirth is the ultimate measure of success of our efforts Yet using pregnancy outcomes and biomedical attendance at birth as the primary feedback on global efforts to make pregnancy safer is misguided

Formulas for Motherhood in a Chinese Hospital Suzanne Gottschang,2018-03-05 What happens to pregnant women when the largest country in the world implements a global health policy aimed at reorganizing hospitals and re training health care workers to promote breastfeeding Since 1992 the Chinese government has led the world in reorganizing more than 7 000 hospitals into Baby Friendly hospitals The initiative s goal overseen by UNICEF and the World Health Organization is to promote the practice of breastfeeding by reorganizing hospital routines spaces and knowledge in maternity wards and obstetrics clinics At the same time China s hospitals in the mid 1990s operated as sites where the effects of economic reform and capitalism increasingly blurred the boundaries between state imperatives to produce healthy future citizens and the flexibility accorded individuals through their participation in an emerging consumer culture *Formulas for Motherhood* follows a group of women over eighteen months as they visited a Beijing Baby Friendly Hospital over the course of their pregnancies and throughout their postpartum recoveries The book shows how the space of the hospital operates as a microcosm of the larger social political and economic forces that urban Chinese women navigate in the process of becoming a mother Relations between biomedical practices heightened expectations of femininity and sexuality demanded by a consumer culture alongside international and national agendas to promote maternal and child health reveal new agents of maternal governance emerging at the very moment China s economy heats up This ethnography provides insight into how women s

creative pragmatism in a rapidly changing society leads to their views and decisions about motherhood **Anthropology and Public Health** Robert A. Hahn, Marcia Claire Inhorn, 2009 Anthropologists also work as evaluators examining the activities of public health institutions and the successes and failures of public health programs **Maternal Death and Pregnancy-Related Morbidity Among Indigenous Women of Mexico and Central America** David A.

Schwartz, 2018-05-31 This ambitious sourcebook surveys both the traditional basis for and the present state of indigenous women's reproductive health in Mexico and Central America. Noted practitioners, specialists, and researchers take an interdisciplinary approach to analyze the multiple barriers for access and care to indigenous women that have been complicated by longstanding gender inequities, poverty, stigmatization, lack of education, war, obstetrical violence, and differences in language and customs, all of which contribute to unnecessary maternal morbidity and mortality. Emphasis is placed on indigenous cultures and folkways, from traditional midwives and birth attendants to indigenous botanical medication and traditional healing and spiritual practices, and how they may effectively coexist with modern biomedical care. Throughout these chapters, the main theme is clear: the rights of indigenous women to culturally respectful reproductive health care and a successful pregnancy leading to the birth of healthy children. A sampling of the topics: Motherhood and modernization in a Yucatec village; Maternal morbidity and mortality in Honduran Miskito communities; Solitary birth and maternal mortality among the Rar Muri of Northern Mexico; Maternal morbidity and mortality in the rural Trifino region of Guatemala; The traditional Ngbe Bugl midwives of Panama; Characterizations of maternal death among Mayan women in Yucatan, Mexico; Unintended pregnancy, unsafe abortion, and unmet need in Guatemala; Maternal Death and Pregnancy-Related Morbidity Among Indigenous Women of Mexico and Central America. This book is designed for anthropologists and other social scientists, physicians, nurses, and midwives, public health specialists, epidemiologists, global health workers, international aid organizations, and NGOs, governmental agencies, administrators, policy makers, and others involved in the planning and implementation of maternal and reproductive health care of indigenous women in Mexico and Central America, and possibly other geographical areas. **The Battle over Birth** Nicole Thualagant, Katja Schröder, 2025-11-18 Childbirth is a site of ongoing struggle over meaning, authority, regulation, and control. This edited collection offers critical perspectives on current challenges in birth care by exploring how birth is shaped by competing epistemologies, medical, cultural, experiential, and political. The book addresses analytically and theoretically some of the many negotiations, tensions, contestations, and dilemmas with regard to care practices as well as birthing experiences. Moreover, the book reflects on how these challenges can be grasped as dilemmas moving beyond the often-declared dichotomy between medical and midwifery models of care or natural versus medical birth. The chapters are authored by researchers within the fields of social and human sciences, located geographically in different countries, within different historical, organisational, and political birth care settings. The book is oriented to not only scholars and students with interest in birth care but also practitioners and stakeholders politically and

professionally engaged in the development of maternity care practices and settings Anthropologies of Global Maternal and Reproductive Health Lauren J. Wallace, Margaret E. MacDonald, Katerini T. Storeng, 2022-01-11 This open access edited book brings together new research on the mechanisms by which maternal and reproductive health policies are formed and implemented in diverse locales around the world from global policy spaces to sites of practice The authors both internationally respected anthropologists and new voices demonstrate the value of ethnography and the utility of reproduction as a lens through which to generate rich insights into professionals and lay people s intimate encounters with policy Authors look closely at core policy debates in the history of global maternal health across six different continents including Women s use of misoprostol for abortion in Burkina Faso The place of traditional birth attendants in global maternal health Donor driven maternal health programs in Tanzania Efforts to integrate qualitative evidence in WHO maternal and child health policy making Anthropologies of Global Maternal and Reproductive Health will engage readers interested in critical conversations about global health policy today The broad range of foci makes it a valuable resource for teaching in medical anthropology anthropology of reproduction and interdisciplinary global health programs The book will also find readership amongst critical public health scholars health policy and systems researchers and global public health practitioners
