Managing Tourist Health And Safety In The New Millennium:

Managing Tourist Health and Safety in the New Millennium Jeff Wilks, J Stephen, F. Moore, 2013-06-17 *Managing Tourist Health* is a seminal study which combines a range of state of the art reviews of the issues facing tourism managers and professionals in the fast growing area of tourist health and safety. An international range of contributors each a specialist in their chosen field have written papers for this book to explain many of the complex issues affecting tourists, the tourism industry and governments in ensuring tourism is viewed as a safe and enjoyable experience for all. The contributors have a wealth of interdisciplinary experience ranging from medicine, law, tourism research, safety science, ergonomics, management consultancy among other cognate areas of study. Future research directions are examined in many of the chapters together with current state of the art knowledge in relation to key studies. The editors have worked in this area of research since the late 1980s and have accumulated a wide range of academic, professional and consultancy experience for governments and the private sector. The book extends this understanding through a multi disciplinary perspective combining some of the leading researchers who have published in this area since the emergence of tourist health as a legitimate area of study in the 1970s. *Managing Tourist Health and Safety in the New Millennium* S. (Ed) Page, 2003. *Managing Tourist Health and Safety in the New Millennium* Jeff Wilks, 19?? Managing Tourist Health and Safety in the New Millennium S. (Ed) Page, 2003. *Tourism in Turbulent Times* Jeff Wilks, Donna Pendergast, Peter Leggat, 2006-08-11 *Tourism in Turbulent Times* presents an international review of the challenges faced by the world's largest industry and governments around the world to provide safe and enjoyable experiences for visitors. The book draws on the background and expertise of contributors from 11 countries representing scholars, government officers and industry practitioners. It addresses traditional concerns for tourism such as crime as well as emerging challenges posed by the global movement of infectious disease and terrorism. These topics are examined by specialists who share a view that tourism can weather turbulent times through adopting appropriate risk management strategies and continuing to provide quality service for customers. This book differs from other texts on the market by including a large group of tourism industry practitioners as contributors. These writers practice the principles they espouse and have critical insight into the real world issues facing the tourism industry. They are also very committed to finding best practice solutions to the challenges facing their industry. The book will therefore be of particular interest to tourism managers and policy makers since it provides relevant information for the important decisions they need to make. Throwing the net wide to include medicine, law, psychology, sociology, education and hard science means that a wide range of perspectives are available to address global business, insurance, security and policy questions in this emerging area of tourism. Shocks such as the terrorist attacks of 11 September 2001, SARS and the more recent Asian Tsunami have made the tourism industry very conscious of the need to protect its customers. This book highlights the positive responses made by various sectors of the industry at destination, national and international levels. It also examines the growing adventure tourism market.

characterised by small operators who need good risk management practices to weather adverse global events as well as run a financially viable small business Such a wide set of perspectives will be very valuable to both students and tourism professionals
