Managing Leviathan:

Managing Leviathan Robert Paehlke, Douglas Torgerson, 2005-05 Anyone wishing to explore the cutting edge of environmental policy and management will find this book an invaluable tool The Honourable David Anderson Minister of Environment Government of Canada 1999 2004 *Managing Leviathan* Robert Paehlke, Douglas Torgerson, 1990-01-01

Managing Leviathan Robert Paehlke, 1990-08 Environmental problems have shocked the twentieth century shaking the confidence in order and progress that had underpinned the exuberant growth of the industrial and administrative leviathan Is bureaucracy the organizational form that helped to create these problems really suited to solving them The Promise of Green Politics Douglas Torgerson, 1999 An exploration of the relationship between the means and the ends in green politics

Managed Annihilation Dean Bavington, 2011-01-01 The commercial cod fishery in Newfoundland and Labrador was once the most successful fishery in the world When it collapsed in 1992 causing the largest single day layoff in Canadian history and irrevocable ecological damage fishermen scholars and scientists pointed to failures in management such as uncontrolled harvesting as likely culprits Examining the history of commercial cod fisheries in the region from the mid nineteenth century *Managed Annihilation* makes the case that the very idea of natural resource management caused the death of the cod The collapse occurred when the fisheries were ostensibly managed by the state and the fishery has still not recovered nearly two decades later Although the collapse raised doubts among policy makers about their ability to understand predict and control nature their ultimate goal of control through management has not wavered it has simply been transferred onto new targets

The Oxford Handbook of U.S. Environmental Policy Sheldon Kamieniecki, Michael Kraft, 2013 Prior to the Nixon administration environmental policy in the United States was rudimentary at best Since then it has evolved into one of the primary concerns of governmental policy from the federal to the local level As scientific expertise on the environment rapidly developed Americans became more aware of the growing environmental crisis that surrounded them Practical solutions for mitigating various aspects of the crisis air pollution water pollution chemical waste dumping strip mining and later global warming became politically popular and the government responded by gradually erecting a vast regulatory apparatus to address the issue Today politicians regard environmental policy as one of the most pressing issues they face The Obama administration has identified the renewable energy sector as a key driver of economic growth and Congress is in the process of passing a bill to reduce global warming that will be one of the most important environmental policy acts in decades The Oxford Handbook of U S Environmental Policy will be a state of the art work on all aspects of environmental policy in America Over the past half century America has been the world's leading emitter of global warming gases However environmental policy is not simply a national issue It is a global issue and the explosive growth of Asian countries like China and India mean that policy will have to be coordinated at the international level The book will therefore focus not only on the U S but on the increasing importance of global policies and issues on American regulatory efforts This is a topic that will only

grow in importance in the coming years and this will serve as an authoritative guide to any scholar interested in the issue

Culture and Civilization Gabriel R. Ricci, 2018-02-06 This volume of Culture and Civilization focuses on cosmopolitanism the global polity and political ramifications of globalization The introduction by Gabriel R Ricci establishes context and provides an overview of the entire work Topics include the history of globalization climate change policy ecological consequences of development concepts of civilization human rights Eastern thought and economics global citizenship and travel writing Within this collection Carl J Strikwerda argues that the first era of globalization in modern times was marked by global migrations patterns Pablo Iannone s history of the Andean oil rush and its ecological consequences looks at the processes of development Brett Bowden argues that civilization entails both progress and war J Baird Callicott provides a philosophical analysis of a moral theory that accommodates spatial and temporal scales of climate change Sanjay Paul analyzes the United Nations Global Compact and Ed Chung discusses the role of economic theory in business schools Colin Butler reflects on E F Schumacher s Buddhist Economics while Taso Lagos relates parallel polis to the idea of global citizenship Tony Burns examines the ways in which Aristotle Hegel and Kant have been interpreted Finally Adam Stauffer explores Charles Warren Stoddard s work South Sea Idyls This volume of Culture and Civilization the first under Ricci s editorship follows the tradition of the previous four volumes developing critical ideas intended to produce a positive intellectual climate one that is prepared to confront challenges and alert us to the opportunities for people in all fields and of all faiths of the twenty first century

Environmental Regulation Through Financial Organisations: Comparative Perspectives on the Industrialised Nations Benjamin Richardson, 2002-02-13 This book takes a comparative perspective of practice in the European Union North America Japan and Australasia arguing that existing legal reforms to promote sustainable development are unlikely to be successful unless environmental policy can be diffused and embedded in the financial services sector This sector plays a crucial role in creating the financial conditions that allow much economic development to proceed Financial markets are already highly regulated in pursuance of various public policy objectives and there is scope to adapt existing regulation to incorporate environmental aspects into the financial services sector In terms of specific reforms the book focuses on the role of corporate environmental reporting economic instruments and liability rules to provide a proper context for engaging financial organisations with the environment as well as reforms to the system of prudential regulation that currently governs this sector Beyond the focus on the financial services sector the book raises complex questions regarding the relationship between the state and market institutions in environmental policy and will appeal to scholars from a wide range of disciplines interested in problems of environmental governance

Surviving Democracy Chien-Yi Lu, 2020-04-22 Is democracy in its neoliberalized form responsible in part for bringing us to the brink of self destruction and the policy inertia that is doing away with our chances of survival Surviving Democracy probes the way democracy became neoliberalized and the role

neoliberalized democracy plays in our dealings with causing understanding denying and mitigating climate change Defining neoliberalism as the art of exclusion through inclusion Chien Yi Lu treats climate change as collateral damage of the neoliberal order established to ensure upward power and wealth redistribution Highlighting the role money played in the free competition of ideas between Keynes and Hayek she investigates the resulting global structure wherein the wealthy and powerful sit above the market and democracy and the way this structure fundamentally contradicts with honest climate mitigation Central to the structure is neoliberal elites leveraging of the fluid relationship between the market and the state Merging citizen power with consumer and investor powers is therefore imperative to the success of climate action While expediting the bursting of the carbon bubble is an obvious answer it is the discussion of the meat bubble that brings the book full circle linking our survival to neoliberalism inclusion and democracy Surviving Democracy probes the role democracy plays in our dealings with causing understanding denying and hopefully mitigating climate change
