Managing The Adoption Of New Technology:

Managing the Adoption of New Technology David Preece, 2018-03-29 Originally published in 1989 this book gives an overview of the empirical work on new technology objectives together with an analysis of management strategies for adoption at the corporate technological and people levels It also reviews previous work on the extent to which staff at different levels and from different specialism are involved in decision making as well as the adoption process more generally The book looks at different approaches to analysing organizational contexts and provides a framework for studying the stages of the adoption process The book includes case studies two in financial services and two in engineering contexts

Managing the Adoption of New Technology David A. Preece, *Managing Innovation Adoption* Majharul Talukder, 2016-05-13 When Innovation is considered one of the key drivers of corporate success why do organisations struggle to implement it Research suggests that innovations fail due to a lack of acceptance by employees therefore an understanding of potential adopters and the factors influencing their decisions is essential Despite much research on adoption of innovation by an organization very little is known about its acceptance by individuals within it Managing Innovation Adoption is about managing technological innovation implementation at work in an effective way by presenting a new theoretical framework Based on the theory of reasoned action TRA the technology acceptance model TAM and other conceptual frameworks Dr Talukder s enhanced model combines factors from existing and original models to create a coherent new model The data collected proves that it can be used to assist a broader understanding of how people in an organization adopt and use innovations As well as contributing to academic knowledge the author s discoveries have practical implications for organizations managers administrators and employees *Proceedings of the International Conference on Business and Management Dynamics 2016: Sustainable economies in the information economy* Joy E. Akahome, Michael Twum-Darko, Cyril Ogbokor, Nyaniso Mfusi Zonke, T. Sethibe, R. Steyn, Esme Mohammed, Renier Steyn, L.B. Nguenang, Mamorena Lucia Matsoso, Henry N. Ozuru, Julius Akaba, Patient Rambe, Edem Korku Agbobli, Henri-Vincent Ndjave-Ndjoy, Regis Muchemwa, Andre de la Harpe, Konosoang Mpiti, Ayodeji Afolayan, 2016-12-31 Cape Town South Africa 7 Sept 2016 8 Sept 2016 Theme Sustainable economies in the information economy Purpose To share the quality academic papers presented at the International Conference on Business and Management Dynamics ICBMD held from 7 to 8 September 2016 at African Pride Crystal Hotel and Spa in Cape Town As grey literature the proceedings are the contributions made by researchers at the conference and are considered the written record of the work that was presented to fellow conference delegates Methodology The methodology used varies from researcher to researcher but are suitable for the studies conducted Thus on the one hand studies that were subjective in nature used the interpretive paradigm where the qualitative approach adopted made use of the interview method to collect data On the other hand studies that were objectively inclined adopted the positivist philosophy and used survey questionnaires to collect data However there were

some academic papers which used mixed methodology because of the nature of the study Whatever methodology used adhered to the ethos of the philosophies underpinning the methodology Contribution made to scholarship The articles come from individual researchers and each article in the proceedings is unique Mostly there is no general argument leading from one contribution to the next However it is interesting to note that in the area of economic performance it was evident that real exchange rate and net foreign direct investment contribute more towards innovations in economic growth With regard to human capital development papers presented evidence that there exists a definite need to explore the phenomenon of personal branding as limited scientific academic research has been done within the field of personal branding or on elements of the topic Thus the outcome argues that personal branding has an influence on leadership style which in turn impacts on organisational performance and related hygiene factors Furthermore it was demonstrated that current methods or strategies for enforcing institutionalisation of knowledge sharing within an organisation have not been successful and as such new strategies are needed to reinforce efforts to nurture and invigorate the institutionalisation of knowledge sharing within an organisation With regard to technology and big data impact on organisational performance it was evident that system performance memory consumption and CPU utilisation can be used as criteria to compare and evaluate big data technologies to improve organisational performance Most of the articles contribution reemphasised technology education and training as a means of digitising business and improving effectiveness Target audience The target readership is academic researchers and business leaders who require access to the latest developments in the fields of economics information management business education development studies social sciences and technology It is also for policymakers and other stakeholders who need a better understanding of the impact of new developments on existing policies and regulations for their review or amendment
