THE MANCHU WAY

THE EIGHT BANNERS AND ETHNIC IDENTITY
IN LATE IMPERIAL CHINA

Manchu Way

Frederic Delano Grant, Jr.

Manchu Way:

The Manchu Way Mark C. Elliott, 2001 In 1644 the Manchus a relatively unknown people inhabiting China's northeastern frontier overthrew the Ming Asia's mightiest rulers and established the Qing dynasty This book supplies a radically new perspective on the formative period of the modern Chinese nation *MANCHU WAY* Mark C. Elliott,

Slaves of the Emperor David C. Porter, 2023-12-26 Shortlisted 2024 Wallace K Ferguson Prize Canadian Historical Association China's last imperial dynasty governed a vast and culturally diverse territory encompassing a wide range of local political systems and regional elites But the Qing empire was built and held together by a single imperial elite the more than two million members of the hereditary Eight Banner system who were at the core of both the military and the bureaucracy The banner population was multiethnic linked by shared membership in a clearly demarcated status group defined in law and administrative practice Banner people were bound to the court by an exchange of loyal service for institutionalized privilege a relationship symbolically conceptualized as one of slave to master *Slaves of the Emperor* explores the Qing approach to one of the fundamental challenges of early modern state building how to develop an effective bureaucracy with increasing administrative capacity to govern a growing polity while retaining the loyalty of the ruling family's most important supporters David C Porter traces how the banner system created a service elite through its processes of incorporating new members its employment of bannermen as technical specialists its imposition of service obligations on women as well as men and its response to fiscal and ideological challenges Placing Qing practices in comparative perspective he uncovers crucial parallels to similar institutions in Tokugawa Japan imperial Russia and the Ottoman Empire *Slaves of the Emperor* provides a new framework for understanding the structure and function of elites both in China and across Eurasia in the early modern period

Territorializing Manchuria Qiong (Miya) Xie, 2024-09-09 Xiao Hong Yom Sang sop Abe Kobo and Zhong Lihe these iconic literary figures from China Korea Japan and Taiwan all described Manchuria extensively in their literary works Now China's Northeast but a contested frontier in the first half of the twentieth century Manchuria has inspired writers from all over East Asia to claim it as their own employing novel themes and forms for engaging nation and empire in modern literature Many of these works have been canonized as quintessential examples of national or nationalist literature even though they also problematize the imagined boundedness and homogeneity of nation and national literature at its core Through the theoretical lens of literary territorialization Miya Xie reconceptualizes modern Manchuria as a critical site for making and unmaking national literatures in East Asia Xie ventures into hitherto uncharted territory by comparing East Asian literatures in three different languages and analyzing their close connections in the transnational frontier By revealing how writers of different nationalities constantly enlisted transnational elements within a nation centered body of literature *Territorializing Manchuria* uncovers a history of literary co formation at the very site of division and may offer insights for future reconciliation in the region **Learning to Rule** Daniel Barish, 2022-02-08 In the second half of the nineteenth

century local leaders around the Qing empire attempted to rebuild in the aftermath of domestic rebellion and imperialist aggression. At the same time the enthronement of a series of children brought the question of reconstruction into the heart of the capital. Chinese scholars, Manchu and Mongolian officials and writers in the press all competed to have their ideas included in the education of young rulers. Each group hoped to use the power of the emperor both his functional role within the bureaucracy and his symbolic role as an exemplar for the people to promote reform. Daniel Barish explores debates surrounding the education of the final three Qing emperors showing how imperial curricula became proxy battles for divergent visions of how to restabilize the country. He sheds light on the efforts of rival figures who drew on China's dynastic history, Manchu traditions and the statecraft tools of imperial powers as they sought to remake the state. Barish traces how court education reflected arguments over the introduction of Western learning, the fate of the Manchu Way, the place of women in society, notions of constitutionalism and emergent conceptions of national identity. He emphasizes how changing ideas of education intersected with a push for a renewed imperial center and national unity helping create a model of rulership for postimperial regimes. Through the lens of the education of young emperors, *Learning to Rule* develops a new understanding of the late Qing era and the relationship between the monarchy and the nation in modern China.

Translating Early Modern China Carla Nappi, 2021-04-08 The history of China as any history is a story of and in translation. *Translating Early Modern China* tells the story of translation in China to and from non-European languages and Latin between the fourteenth and the nineteenth centuries and primarily in the Ming and Qing dynasties. Each chapter finds a particular translator resurrected from the past to tell the story of a text that helped shape the history of translation in China. In Chinese, Mongolian, Manchu, Latin and more, these texts helped to make the Chinese language what it was at different points in its history. This volume explores what the form of an academic history book might look like by playing with fictioning as part of the historian's craft. The book's many stories of glossaries and official Ming translation bureaus, of bilingual Ming Chinese-Mongolian language primers, of the first Latin grammar of Manchu, of a Qing Manchu conversation manual, of a collection of Manchu poems by a Qing translator, serve as case studies that open out into questions of language and translation in China's past, of the use of fiction as a historian's tool and of the ways that translation creates language. **The**

Last Emperors Evelyn S. Rawski, 1998 The Qing Dynasty was the last of the conquest dynasties to rule China. Its rulers, Manchus from the north, held power for three centuries despite major cultural and ideological differences with the Han majority. In this book, Evelyn Rawski reinterprets the remarkable success of this dynasty, arguing that it derived not from the assimilation of the dominant Chinese culture but rather from an artful synthesis of Manchu leadership styles with Han Chinese policies.

Engels @ 200 Frank Jacob, 2020-11-25 Friedrich Engels was one of the most important German thinkers of the 19th century and his writings are still important today. Addressing the pressing issues of his time, the broadly interested scholar Engels would write about many different topics and thereby not only pave the way for a science-based

socialism but also for further studies in sociology history and philosophy To highlight the value and impact of Engels work as well as emphasize its relevance for major issues that will determine the 21st century the present anthology assembles scholars from different countries and research fields to discuss how to read and gain insights from reading his works in our time It also attempts to stimulate further research about Engels who 200 years after his birth deserves to be fully brought out of the shadow of his friend and colleague Karl Marx
