Coulter, Alan H. Adams, Eric L. Hurwitz, William Meeker, Daniel T. Hansen, 1996 This report presents results from the RAND study on the appropriateness of spinal manipulation and mobilization of the cervical spine The study was designed to ascertain the clinical criteria for the appropriate use of cervical manipulation and mobilization to treat conditions such as neck pain and headache and to document treatment complications A review was conducted of more than 500 articles from the medical and chiropractic

literature From this extensive review a set of indications was created for manipulation and mobilization for neck pain and headaches and for subcategories of patient types A panel was convened of back pain experts from the disciplines of orthopedics chiropractic family medicine and neurology to rate for appropriateness the indications for spinal manipulation and mobilization The panelists rated the set of indications individually and then were convened as a group to rate the same indications following reporting and discussion of the individual ratings This report presents the results of the final ratings and describes the methodology It should be of interest to clinicians who perform manipulation and mobilization of the cervical spine to clinicians who work with patients with cervical problems and to health researchers and others concerned with the appropriate indications for performing manipulation and mobilization

Spinal Manipulation Made Simple

Jeffrey Maitland, 2012-10-30 Written by an expert on alternative bodywork this book presents techniques for manipulating the soft tissues of the back in a safe simple manner The method avoids the high velocity low amplitude thrusting techniques employed by chiropractors Instead it utilizes the intuitive sense of somatic bodyworkers combined with the proven theory and technique of Rolfing to provide safe and effective treatment Maitland shows how to elegantly release joint fixations in the spine sacrum pelvis and ribcage by using subtle soft tissue techniques rather than the thrusting techniques that pop the joints This gentler kind of individualized Rolfing work is thoroughly described within an explanation of biomechanics aided by drawings and photographs which depict techniques and anatomy
