Mans Place:

A Man's Place John Tosh, 2008-10-01 **div** Domesticity is generally treated as an aspect of women's history. In this fascinating study of the nineteenth century middle class, John Tosh shows how profoundly men's lives were conditioned by the Victorian ideal and how they negotiated its many contradictions. Tosh begins by looking at the experience of boyhood, married life, sex, and fatherhood in the early decades of the nineteenth century, illustrated by case studies representing a variety of backgrounds, and then contrasts this with the lives of the late Victorian generation. He finds that the first group of men placed a new value on the home as a reaction to the disorienting experience of urbanization and as a response to the teachings of Evangelical Christianity. Domesticity still proved problematic in practice, however, because most men were likely to be absent from home for most of the day, and the role of father began to acquire its modern indeterminacy. By the 1870s, men were becoming less enchanted with the pleasures of home. Once the rights of wives were extended by law and society, marriage seemed less attractive, and the bachelor world of clubland flourished as never before. The Victorians declared that to be fully human and fully masculine, men must be active participants in domestic life. In exposing the contradictions in this ideal, they defined the climate for gender politics in the next century. **DIV Man's Place in the Universe** Alfred Russel

Wallace, 2023-01-30. His work has been written in consequence of the great interest excited by my article under the same title, which appeared simultaneously in the *Fortnightly Review* and the *New York Independent*. Two friends who read the manuscript were of opinion that a volume in which the evidence could be given much more fully would be desirable, and the result of the publication of the article confirmed their view. I was led to a study of the subject when writing four new chapters on Astronomy for a new edition of the *Wonderful Century*. I then found that almost all writers on general astronomy, from Sir John Herschel to Professor Simon Newcomb and Sir Norman Lockyer, stated as an indisputable fact that our sun is situated in the plane of the great ring of the Milky Way and also very nearly in the centre of that ring. The most recent researches also showed that there was little or no proof of there being any stars or nebulae very far beyond the Milky Way, which thus seemed to be the limit in that direction of the stellar universe. **Man's Place in Nature and other Essays** Thomas Henry

Huxley, 2025-02-13. One of the most influential scientific works of the 19th century, *Man's Place in Nature and Other Essays* by Thomas Henry Huxley challenges readers to rethink humanity's origins. As a leading advocate of Darwin's theory of evolution, Huxley presents a compelling argument for the biological connection between humans and primates, backed by meticulous research and logical reasoning. Through a series of thought-provoking essays, Huxley examines fossil records, comparative anatomy, and embryology to support the idea of human evolution. His powerful writing dismantles long-standing misconceptions about human superiority, bridging the gap between science and philosophy while addressing the social and ethical implications of evolutionary theory. With a tone that is both scholarly and engaging, *Man's Place in Nature and Other Essays* remains an essential read for anyone interested in biology, anthropology, and the history of scientific thought. Huxley's

work continues to shape discussions on human origins making it a must have for scholars students and enthusiasts alike
