## **Manual De Anestesia Regional Practica Clinica Y Tratamiento Del Dolor:**

**Manual de anestesia regional** M. Ruiz Castro, 2010-11-01 La anestesiología moderna debe entenderse como una combinación de técnicas regionales junto con diversos grados de sedación anestesia general o ambas. Por ello la anestesia regional que durante años ha ocupado un lugar secundario pasa ahora a desempeñar un papel muy importante siendo este Manual de anestesia regional una magnífica herramienta para la revisión práctica de esta técnica anestésica al recoger todos los posibles bloqueos de utilidad en la práctica de la anestesia regional en el quirófano y en las unidades de dolor. En esta segunda edición dirigida por el Dr. Ruiz Castro, un profesional con una gran experiencia en anestesia regional y tratamiento del dolor, se ha mantenido su práctico formato y su encuadernación plástica especial para que realmente sea de utilidad y consulta en la práctica clínica. La obra cuenta con una excelente iconografía que en esta edición se ha incrementado notablemente y que ayuda a comprender qué es lo que hay que hacer y cómo hacerlo y la aplicación de la medicina basada en la evidencia en el tratamiento de las diferentes técnicas. Como novedad destaca la inclusión de un DVD con vídeos de las diferentes técnicas empleadas. Actualización de todos los capítulos así como la eliminación de aquellos capítulos más centrados en dolor que pasarán a formar parte de un manual independiente. Segunda edición de esta magnífica herramienta para la revisión práctica de esta técnica anestésica al recoger todos los posibles bloqueos de utilidad en la práctica de la anestesia regional en el quirófano y en las unidades de dolor. La excelente e incrementada iconografía ayuda a comprender qué es lo que hay que hacer y cómo hacerlo y la aplicación de medicina basada en la evidencia en el tratamiento de las diferentes técnicas. Gran novedad es el capítulo dedicado a la ultrasonografía. **Manual de Anestesia Regional** Manuel Ruiz Castro, 2006

**Aplicaciones del ultrasonido en anestesiología** Raúl Carrillo Esper, Gabriel Enrique Mejía Terrazas, 2024-08-28 Las transformaciones más significativas derivan de los adelantos que se han producido en los terrenos de la tecnología y la ciencia médica en la que se incluye la anestesiología. Como resultado se logra un conocimiento más profundo y se cuenta con medios cada vez más eficientes en el combate de la enfermedad así como con medidas más sólidas para prevenir y obtener mejores resultados. El panorama que se vislumbra para el futuro es más alentador. Con el desarrollo científico y tecnológico son más las posibilidades diagnósticas y terapéuticas. Es indispensable incorporar el tema de seguridad y calidad de la atención de los pacientes para prevenir y evitar que sufran daños que pueden llegar a ser severos. Los capítulos invitan a informarse acerca de la evolución y el desarrollo del ultrasonido en la práctica de la anestesiología. Las nueve reglas básicas que el anestesiólogo debe observar para aplicar los bloqueos dirigidos por ultrasonido: la colocación de un catéter dentro de la vaina axilar, la optimización de los tiempos en las salas de operaciones, las técnicas de bloqueos guiados por ultrasonido, la dirección de la aguja hacia el nervio objetivo mediante un menor número de intentos, las indicaciones más frecuentes del bloqueo axilar y la importancia de conocer la neuroanatomía del plexo lumbosacro entre otros temas, todos ellos escritos por anestesiólogos calificados. *Bibliografía española*, 2002-03      Cuidado y Práctica de Enfermería Herrera Sánchez Herrera, Natividad Pinto Afanador, Lucy Barrera Ortiz, 2010-01-01. El Grupo de Cuidado ha avanzado en su trabajo de conceptualización y puesta en práctica de los principios del cuidado respondiendo preguntas sencillas del ejercicio permanente de enfermería con el fin explícito de cerrar la brecha entre la intención y la acción para que los profesionales de enfermería ejerzan su función e identifiquen su quehacer de cuidadores y sean socialmente visibles. Mediante el análisis de experiencias de la cotidianidad profesional de la enseñanza en los docentes y los estudiantes, así como en la asistencia institucional y comunitaria, el Grupo ha hallado respuestas que permiten construir un avance conceptual que se ve reflejado en la docencia y en los servicios. Por otra parte ha respondido a la solicitud de algunos hospitales clínicos y otras instituciones de realizar talleres de cuidado para el personal de enfermería y en las comunidades ha iniciado el fortalecimiento de cuidadores no profesionales, labor en la cual se ha contado con recurso humano voluntario del ámbito municipal y de la Presidencia de la República. Igualmente se adelantó la consolidación de la línea de investigación Cuidado y Práctica de Enfermería que se ofrece para los programas curriculares desde pregrado hasta el futuro doctorado en el que participa la Universidad Nacional de Colombia. El Grupo proyecta iniciar el desarrollo de la investigación en percepción del cuidado y tiene a la fecha seis productos en este campo; algunos de ellos ya han sido publicados. Se presentó al concurso de semilleros de la Universidad Nacional de Colombia y se esperan los resultados.
