Valoración e intervención de la actitud postural en la estática en la población escolar 10-13 años Ángel de Pedro Álvarez, José Castro Piñero, 2017-05-29 El estudio que presentamos culmina el trabajo de tesis sobre la temática de evaluación postural e intervención en escolares de 10-13 años en la Educación Primaria para optar al grado de Doctor por la Universidad de Cádiz La temática tratada representa uno de los objetivos que la actual legislación marca en la intervención educativa con los escolares por parte de los docentes en Educación Física El docente cuenta con una posición privilegiada para observar de forma directa y continua la actitud postural tanto en situaciones de reposo como de actividad física a lo largo de la escolarización del alumno a y con ello realizar la labor de prevención y derivación médica en los casos que considere La intervención que realiza el docente es invasiva ya que con ella facilita la organización del esquema corporal y el desarrollo de los sistemas y capacidades físicas del alumno a Los estudios científicos previos ponen de manifiesto que el principal factor de riesgo de las desviaciones raquideas en el niño y en el adolescente están relacionados con el crecimiento y sus hábitos cotidianos La incidencia de las alteraciones posturales en la población infantil es cada vez mayor debido a factores ambientales hereditarios y culturales 1 Estos hechos implican complicaciones a nivel muscular esquelético y articular que llevan al niño a a mecanizar actitudes de tipo compensatorio con relación a posiciones estáticas y dinámicas Estas ocasionan limitaciones en su motricidad y desequilibrios que se incrementan día a día y que con la edad adulta se pueden llegar a convertir en una molestia que repercute en la salud física y psicológica Para desarrollar esta labor de prevención es necesario que se instruya de forma específica al profesorado de Educación Física en la prevención de las alteraciones posturales ya que con una buena intervención educativa muchas de ellas pueden corregirse o reeducarse Esta formación específica debe estar basada en el desarrollo de las capacidades motrices especialmente el equilibrio las compensaciones musculares la ergonomía y los test posturales Por lo tanto para una buena postura es importante el mantenimiento de una

buena organizaci n y alineaci n ya que si existiera una desorganizaci n en un segmento del cuerpo implicar una nueva organizaci n del resto de segmentos asumiendo posiciones compensatorias la cual tambi n influye en las funciones motoras dependientes 2 La etapa de la ni ez resulta id nea para hacer detecci n y prevenci n Esta labor puede realizarse mediante la educaci n en los h bitos posturales saludables De esta manera se podr garantizar una mejor calidad de vida en los a os posteriores dada la facilidad y plasticidad de aprendizaje a estas edades 3 La investigaci n que se presenta eval a la postura corporal del alumnado y realiza una intervenci n de 3 meses de duraci n en la que desarrolla 2 veces a la semana un conjunto de ejercicios con la intenci n de mejorar la postura corporal LEV ,1999
