image that is us lives in the circulation of the network Though a file though virtual and malleable made out of bits and instantly accessible to anyone who wants to find it around the world this image that lives only lives on screen as virtual as it might be is a material fact In its impression its reception its archivability its remixability the electronic image is today's photograph At once artist book and critical theory Image Photograph takes its direction from Walter Benjamin's Arcades John Berger's Ways of Seeing and more recently Hito Steyerl's The Wretched of the Screen Throughout it Lafia not only writes about the image but constructs images and finally performs this new space of the image photograph

Camera Graeca: Photographs, Narratives, Materialities Philip Carabott, Yannis Hamilakis, Eleni Papargyriou, 2016-03-09 While written sources on the history of Greece have been studied extensively no systematic attempt has been made to examine photography as an important cultural and material process This is surprising given that Modern Greece and photography are almost peers both are cultural products of the 1830s and both actively converse with modernity Camera Graeca Photographs Narratives Materialities fills this lacuna It is the first inter disciplinary volume to examine critically and in a theorised manner the entanglement of Greece with photography The book argues that photographs and the photographic process as a whole have been instrumental in the reproduction of national imagination in the consolidation of the nation building process and in the generation and dissemination of state propaganda At the same time it is argued that the photographic field constitutes a site of memory and counter memory where various social actors intervene actively and stake their discursive material and practical claims As

such the volume will be of relevance to scholars and photographers worldwide The book is divided into four tightly integrated parts The first Imag in ing Greece shows that the consolidation of Greek national identity constituted a material cum representational process the projection of an imagery although some photographic production sits uneasily within the national canon and may even undermine it The second part Photographic narratives alternative histories demonstrates the narrative function of photographs in diary keeping and in photobooks It also examines the constitution of spectatorship through the combination of text and image and the role of photography as a process of materializing counter hegemonic discourses and practices The third part Photographic matter realities foregrounds the role of photography in materializing state propaganda national memory and war The final part Photographic ethnographies **The Photographic Times** ,1889

Maria Giulia Dondero, 2020-08-18 This book deals with two fundamental issues in the semiotics of the image The first is the relationship between image and observer how does one look at an image To answer this question this book sets out to transpose the theory of enunciation formulated in linguistics over to the visual field It also aims to clarify the gains made in contemporary visual semiotics relative to the semiology of Roland Barthes and Emile Benveniste The second issue addressed is the relation between the forces forms and materiality of the images How do different physical mediums pictorial photographic and digital influence visual forms How does materiality affect the generativity of forms On the forces within the images the book addresses the philosophical thought of Gilles Deleuze and Ren Thom as well as the experiment of Aby Warburg's Atlas Mnemosyne The theories discussed in the book are tested on a variety of corpora for analysis including both paintings and photographs taken from traditional as well as contemporary sources in a variety of social sectors arts and sciences Finally semiotic methodology is contrasted with the computational analysis of large collections of images Big Data such as the Media Visualization analyses proposed by Lev Manovich and Cultural Analytics in the field of Computer Science

Framing Portraits, Binding Albums Shilpi Goswami, Suryanandini Narain, (eds.), 2025-01-06 Long neglected in academic discourse in India family photographs make a silent contribution to the histories of photography marginality and the family In this volume the writers dwell on the importance of family photographs and their visual omnipresence in our daily lives They point out how family photographs have belonged to the vernacular material of visual culture more seen and lived with less written and consciously thought about Attempting to retrieve family photographs from a space of neglect this volume demonstrates how they are fundamental to the microhistories of a nation and its many societies and suggests the importance of such counterarguments to the dominant strains in an emerging discursive space The essays do not offer a comprehensive survey of all types of family photographs in India Instead they present focused insights into chosen areas of interest on the part of the writers Collectively they embrace the intersectionalities of gender caste class and regional trajectories making the politics of representation even more layered with contestations between the historical oral and affective memorialisation surrounding family archives and photographs These concerns centrally inform the essays as they accept and negotiate a terrain shared by all types of narrativisation

The Metareferential Turn in Contemporary Arts and Media Werner Wolf, 2011-01-01 One possible description of the contemporary medial landscape in Western culture is that it has gone meta to an unprecedented extent so that a remarkable meta culture has emerged Indeed metareference i e self reflexive comments on or references to various kinds of media related aspects of a given medial artefact or performance specific media and arts or the media in general is omnipresent and can nowadays be encountered in high art and literature as frequently as in their popular counterparts in the traditional media as well as in new media From the Simpsons pop music children s literature computer games and pornography to the contemporary visual arts feature film postmodern fiction drama and even architecture everywhere one can find metareferential explorations comments on or criticism of representation medial conventions or modes of production and reception and related issues Within individual media and genres notably in research on postmodernist metafiction this outspoken tendency towards metaization is known well enough and various reasons have been given for it Yet never has there been an attempt to account for what one may aptly term the current metareferential turn on a larger transmedial scale This is what *The Metareferential Turn in Contemporary Arts and Media* Forms Functions Attempts at Explanation undertakes to do as a sequel to its predecessor the volume *Metareference across Media* vol 4 in the series *Studies in Intermediality* which was dedicated to theoretical issues and transhistorical case studies Coming from diverse disciplinary and methodological backgrounds the contributors to the present volume propose explanations of impressive subtlety breadth and depth for the current situation in addition to exploring individual forms and functions of metareference which may be linked with particular explanations As expected there is no monocausal reason to be found for the situation under scrutiny yet the proposals made have in their combination a remarkable explanatory power which

contributes to a better understanding of an important facet of current media production and reception The essays assembled in the volume which also contains an introduction with a detailed survey over the possibilities of accounting for the metareferential turn will be relevant to students and scholars from a wide variety of fields cultural history at large intermediality and media studies as well as more particularly literary studies music film and art history The British Journal of Photography William Crookes,T.
