The Resounding Soul Samuel Kimbriel, Eric Austin Lee, 2016-09-29 It is surely not coincidental that the term soul should mean not only the centre of a creature's life and consciousness but also a thing or action characterised by intense vivacity that bike's got soul It also seems far from coincidental that the same contemporary academic discussions that have largely cast aside the language of soul in their quest to define the character of human mental life should themselves be so bloodless or so lacking in soul The Resounding Soul arises from the opposite premise that the task of understanding human nature is bound up with the more critical task of learning to be fully human The papers collected here are derived from a conference in Oxford sponsored by the Centre of Theology and Philosophy and explore the often surprising landscape that emerges when human consciousness is approached from this angle Drawing upon literary philosophical theological historical and musical modes of analysis these essays remind the reader of the power of the ancient language of soul over against contemporary impulses to reduce fragment and overly determine human selfhood
