politically conscious reader's library as his already significant profile grows exponentially around the world. The prime minister explores the lives of eight outstanding twentieth century figures to uncover why some men and women make difficult decisions and do the right thing when easier and far less dangerous alternatives are open to them. Those profiled range from icons such as Martin Luther King Jr and Robert F Kennedy to lesser known figures such as Edith Cavell who nursed the wounded of World War I in Belgium and helped Allied soldiers escape and pastor Dietrich Bonhoeffer who returned to Nazi Germany from New York to lead the Christian opposition against Hitler's regime. Bringing his personal reflections to these intimate portraits, Brown illuminates a common thread of inspiring courage in every one of these eight heroes and in doing so introduces us to his own inspiring values. *Courageous Leadership* Sumeet Kumar, 2017-12-15

Courageous Leadership: The Missing Link to Creating a Lean Culture of Excellence is one of the firsts of its kind to wade through the confusion among leaders on selecting the type of change approach that will get the best results in their organization. It educates the senior executive leaders and organizational excellence practitioners on the different characteristics of change and answers why the approach to incremental and transitional change cannot deliver the results expected from a transformational change. The author shares his experiences from leading several small and large scale organization transformations in multiple industries across different countries on how to establish a robust foundation for an excellence journey and integrate strategy into daily operations. This book elaborates on the types of courage and what it means to be a courageous leader while leading change in difficult situations and what leaders do differently for putting the organization on a path to excellence and culture transformation. This book shares an innovative design, a methodology and an approach that combines best practices and principles from Malcolm Baldrige, Shingo, Lean, Six Sigma, Balanced Scorecard, accreditation, change management, patient and family centered care, the Competing Values Framework, the LEADS framework and the project management body of knowledge. The implementation of this model at a hospital in Canada propelled the organization further ahead on their transformational journey compared to other organizations that started much earlier. Sensei in Japanese means Teacher and Gyaan in Sanskrit means Knowledge. Brief sections on Sensei Gyaan have been interspersed throughout the book to provide valuable tips to the readers based on author's experiential learnings over the past two decades. This book serves as a practical guide for senior executive leaders and organizational excellence practitioners who wish to embark or are in various stages of their organizational excellence and culture transformation journey. Readers will be guided through 26 elements necessary for establishing a robust foundation and an additional set of 22 Management System elements required to create and sustain a culture of quality across the organization. For leaders in healthcare, the book provides a framework, guiding principles and associated practices that support the implementation of the 4 core concepts of patient and family centered care, namely dignity and respect, information sharing, participation and collaboration. Included in the book are several examples with creative visuals, ready to use templates and standard works.

Cancer: 100 Ways to Fight John Roberts, 2010-03-29 Cancer 100 Ways to Fight Your own attitude is your brightest guiding star Some of success is doing what you like to do But more of it is doing the things you don't like to do but must It is too easy to make an excuse and not do it and fail John Roberts As this book goes to press early in 2010 I am 75 and into my fifth year with incurable metastatic prostate cancer which had already spread to the bones before cancer was diagnosed and the prostate removed The statistical prognosis for the current treatments of choice is that one half of these patients will die within three years 75% within five This usually happens after the standard treatments and chemotherapy fail and must be discontinued due to harmful side effects or weakening effectiveness resumed cancer growth and the failure of bones or key organs I am still feeling fine no pain living a normal life and I have completed eight months of chemotherapy with a 63% drop in my PSA prostate cancer blood test without major side effects or rising PSA I have fought this cancer and its personal consequences in more than a hundred ways as described here Above all a lifetime of fitness and my current excellent physical and mental condition supplemented by great medical care and everything else I can learn or think of is partially responsible for my success in living beyond the average life span for my particular fatal disease We cannot know which weapon or how much each one contributes to the extension of life so we must use them all The doctors all say that cancer survival is very unpredictable and I figured that many of the positive outcomes must depend on how comprehensively and how hard the individual fights So I immediately started this book and organized my fight I was extremely unfortunate most prostate cancer either is so slow growing or eliminated by removal that survivors live for many years In my case it had already spread or metastasized to the bones prior to the operation and that cancer is inoperable and incurable But some people in that condition die very early while others like me live much longer This is highly unpredictable in individual cases due to variation in patient condition treatment effectiveness and other unknowns More than half of all people newly diagnosed with cancer will be cured or given extended remission They will die of something else Of the other half a large number have treatable cancer and they still have many years to live The remainder probably including me have learned that they have incurable cancer that has grown too strong or spread and taken root in such places that it cannot be

killed or removed and death is likely in the next few months or years Nevertheless normally incurable cancer and conventional predictability sometimes fail and others may prolong life by fighting with strong mental and physical effort As the disease progresses and is treated and science advances sometimes in great leaps we are rarely sure of which group we are in That uncertainty that hope and the dreadful power of cancer call for great strength of character and effort in both patients and those around them This book is about that The animal instinct to survive is in humans alone expanded in our unique cortex to something much greater the intelligent understanding of self awareness and an intense desire to prolong the experience growth and emotion of life The human spirit beyond the mere motivation of existence is largely responsible for all that our species has conquered and achieved It is an essential quality to be trained treasured and put to use and one of the finest ways is to survive continue and improve our exceptional life through our collective and individual intellect In the last century medical science the visibility of living in distant years and the recognition that we are and can be responsible for increasing our own longevity have ad

Military Ethics and Virtues Peter Olsthoorn, 2010-09-21 This book examines the role of military virtues in today's armed forces Although long established military virtues such as honor courage and loyalty are what most armed forces today still use as guiding principles in an effort to enhance the moral behavior of soldiers much depends on whether the military virtues adhered to by these militaries suit a particular mission or military operation Clearly the beneficiaries of these military virtues are the soldiers themselves fellow soldiers and military organizations yet there is little that regulates the behavior of soldiers towards civilian populations As a result troops trained for combat in today's missions sometimes experience difficulty in adjusting to the less aggressive ways of working needed to win the hearts and minds of local populations after major combat is over It can be argued that today's missions call for virtues that are more inclusive than the traditional ones which are mainly about enhancing military effectiveness but a convincing case can be made that a lot can already be won by interpreting these traditional virtues in different ways This volume offers an integrated approach to the main traditional virtues exploring their possible relevance and proposing new ways of interpretation that are more in line with the military tasks of the 21st century The book will be of much interest to students of military ethics philosophy and war and conflict in general

Developing Leadership Character Mary Crossan, Gerard Seijts, Jeffrey Gandz, 2015-12-22 This book focuses on the element of leadership that has largely been neglected in the literature character Often thought to be a subjective construct the book demonstrates the concrete behaviors associated with different character dimensions in order to illustrate how these behaviors can be developed and character strengthened Based on research involving over 300 senior leaders from different industries sectors and countries Crossan Seijts and Gandz developed a model for leadership character that focuses on eleven dimensions The book begins by setting the context for the focus on character in business asking what character is and whether it can be learned developed molded or changed Next the book focuses on each dimension of leadership character in turn exploring its elements and the ways in which it can be applied in a business

setting The book concludes with a summary of the key insights an exploration of the interactions between the character dimensions and a call to the reader to reflect on how to develop one s own and others leadership character Bridging theory and management practice Developing Leadership Character will interest students and practitioners alike Readers will benefit not only from a new robust theoretical framework for leadership character but will also learn how character can be developed further

Glocal Theological Education Bård Norheim,Shantelle Weber,2024-06-14 This book presents a vision for Glocal Theological Education an invitation to rethink and reshape theological training in times of crisis The aim is to train theological judicium the ability to exercise sound judgment and practice discernment in the face of the different crises in the world of today like the climate crisis the changed role of the church and the challenge of youth citizenship It explores what has been learned from developing shared global learning within the framework of local learning communities in Norway South Africa and beyond The book also discusses key practices such as the combination of coteaching online and learning in local contexts and best practice research on other educational activities Contributors also reflect more theoretically on where how and what we can learn from crisis and how these theoretical insights can help us shape theological leaders for the future who can read the times

Honor James Bowman,2007 From the earliest records of human civilization until the dawn of the twentieth century and in widely separated cultures throughout the world the story of honor was inseparable from the story of mankind Today an acquaintance with the concept of honor is indispensable to understanding the culture of the Islamic world and its sense of grievance against the West where honor has been disregarded or actively despised for three quarters of a century James Bowman draws from an wealth of sources across many centuries to illuminate honor s curious history in our own culture and he discovers that Western honor was always different from that found elsewhere Its idiosyncratic qualities derived partly from the classical tradition but mainly from the Judeo Christian heritage whose emphases on individual morality and more recently on sincerity and authenticity in private and personal life have acted as continual challenges to the traditional notion of honor as it is still maintained in other parts of the world These challenges to honor and the accommodations with it that they ultimately produced are a fundamental theme in our own culture s distinctive history and the eventual collapse of the honor culture in the West is the background against which the War on Terror and the Clash of Civilizations ought to be seen Jacket
