**The Person-Centred Counselling and Psychotherapy Handbook: Origins, Developments and Current Applications** Colin Lago, Divine Charura, 2016-04-16

From the origins of Carl Rogers person centred approach to the cutting edge developments of therapy today The Person Centred Counselling and Psychotherapy Handbook charts the journey of an ambitious vision to its successful reality In this book Lago and Charura bring together history theory research and practice to deliver a complete and unique perspective on the person centred approach Key topics include The groundbreaking journey of PCA s early decades spearheaded by Carl Rogers Developments and extensions of the original theory and practice The influence of PCA in developing new therapies and practice The frontier of contemporary PCA and therapists work with client groups of difference and diversity With its broad view that explores the origins variations and applications of PCA The Person Centred Counselling and Psychotherapy Handbook gives a comprehensive overview of the knowledge required and the issues faced by practitioners making it an important resource for the seasoned and training practitioner alike This particularly welcome contribution is distinctive in fostering a contemporary contextualised and transcultural person centred practice edited as it is by two leading UK figures in the field of diversity in counselling and psychotherapy Review in Therapy Today October 2016

**Interdisciplinary Handbook of the Person-Centered Approach** Jeffrey H. D. Cornelius-White, Renate Motschnig-Pitrik, Michael Lux, 2013-06-04 This book examines the scientific contribution and increasing relevance of the Person Centered Approach PCA in psychotherapy The direction taken in the book is to provide readers with a multidisciplinary and multi perspective view as well as practical applications Beyond the more conventional psychotherapy applications client centered experimental emotion focused child centered motivational interviewing existential filial etc others have evolved including peace and conflict resolution work encounter and T groups nonviolent communication parent effectiveness training person centered planning for people with disabilities relationship enhancement methods learner centered education technology enhanced learning environments human relations leadership training etc Simultaneously scientific disciplines were influenced by this perspective in less obvious ways Hence the major contribution of this book is to identify and characterize the key bridges so far only partly recognized between the PCA and several other disciplines Based on the results of the bridge building endeavor the editors will propose an initial formulation of the PCA as a meta theory It is intended as a generic framework to solve complex social problems and to stimulate further research and development concerning the human species in relationship to its environment

**Time Limited Therapy in Primary Care** Richard Bryant-Jefferies, 2017-11-22 Many counsellors who work in primary care find it difficult to explain to colleagues in the primary care team what they actually do with clients behind the closed door of their room In this book the author brings to life in a gripping way what really does go on when a counsellor sees a patient in the primary healthcare setting It s good to read for once a book that describes so realistically and movingly the minute by minute account of what actually happens not a book describing clever therapists

getting it right all the time The book should be required reading for newly appointed non clinical managers of counselling services and for primary healthcare staff about to start working with a counsellor as a member of their team Graham Curtis Jenkins in his Foreword

*The Person-Centred Approach to Therapeutic Change* Michael McMillan, 2004-02-06 From the Foreword It is an honour to be asked to write a foreword for this new book by Michael McMillan I have been excited about this book ever since I read early drafts of its first two chapters some time ago at the birth of the project At different times thereafter I have read other parts and my consistent impression has been that this is an author who has both a sophisticated academic understanding of the material and a great skill in communicating that widely Those two qualities do not often go together The book is about change After a first chapter in which the author introduces us to the person centred concept of the person chapter two is devoted to the change process within the client including a very accessible description of Rogers process model Chapter three goes on to explore why and how change occurs in the human being while chapter four introduces the most up to date person centred theory in relation to the nature of the self concept and its changing process Chapters five and six explore why change occurs in therapy and the conditions that facilitate that change while chapter seven looks beyond the core conditions to focus on the particular quality of presence begging the question as to whether this is a transpersonal transcendental quality or an intense experiencing of the core conditions themselves This is an intensely modern book particularly in its postmodern emphasis Rogers is sometimes characterised as coming from modernist times but he can also be seen as one of the early post modernists in his emphasis on process more than outcome and relationship more than personal striving The modern nature of the book is also emphasised by a superb analysis of the relationship between focussing and person centred therapy in Chapter five linking also with Polanyi s notion of indwelling in this and other chapters In suggesting that in both focussing and person centred therapy the therapist is inviting the client to indwell himself or herself the author provides a framework for considering many modern perceptions of the approach including notions such as presence and relational depth Also the link with focussing is modern in the sense that the present World Association for the approach covers a fairly broad family including traditional person centred therapists experiential therapists focussing oriented therapists and process guiding therapists Important in this development is the kind of dialogue encouraged by the present book Dave Mearns Strathclyde University The belief that change occurs during the therapeutic process is central to all counselling and psychotherapy The Person Centred Approach to Therapeutic Change examines how change can be facilitated by the counsellor offering empathy unconditional positive regard and congruence The Person Centred Approach to Therapeutic Change outlines the main theoretical cornerstones of the person centred approach and then applying these describes why change occurs as a result of a person centred therapeutic encounter The author explores the counselling relationship as an environment in which clients can open themselves up to experiences they have previously found difficult to acknowledge and to move forward Integral to the person centred approach is Carl Rogers radical view that change should be

seen as an ongoing process rather than an alteration from one fixed state to another In Rogers view psychological health is best achieved by the person who is able to remain in a state of continual change Such a person is open to all experiences and is therefore able to assimilate and adapt to new experiences whether good or bad By focusing explicitly on how change is theorized and facilitated in counselling this book goes to the heart of person centred theory and practice making it essential reading for trainees and practitioners alike

**Toxic Shame in the Church** Brenda Hopkins,2025-06-30 Grounded in an autoethnographic approach this book draws from the author s personal experiences as a gay woman and former priest who faced institutional shaming Drawing on practical theologies of shame and the work of Christian anthropology it challenges traditional theological perspectives on sin and human nature proposing a person centred model that emphasizes unconditional love and positive self regard By exposing and addressing the Church s role in constructing shame the book proposes a pathway towards healing and self acceptance for those marginalized by faith based shaming

*Integrating Traditional Healing Practices Into Counseling and Psychotherapy* Roy Moodley,William West,2005-04-20 This book seeks to define redefine and identify indigenous and traditional healing in the context of North American and Western European health care particularly in counseling psychology and psychotherapy

**Humanising Psychiatry and Mental Health Care** Rachel Freeth,2017-11-22 This book explores in depth the link between modern psychiatric practice and the person centred approach It promotes an open dialogue between traditional rivals counsellors and psychiatrists within the NHS to assist greater understanding and improve practice Easy to read and comprehend it explains complex issues in a clear and accessible manner The author is a full time psychiatrist and qualified counsellor who offers a unique perspective drawing on personal experience Humanising Psychiatry and Mental Health Care will be of significant interest and help to all mental health professionals including psychiatrists and psychiatric nurses social care workers occupational therapists psychologists person centred counsellors and therapists Health and social care policy makers and shapers including patient groups will also find it helpful and informative

**Oxford Textbook of Spirituality in Healthcare** Mark Cobb,Christina Puchalski,Bruce Rumbold,2012-08-09 The relationship between spirituality and healthcare is historical intellectual and practical and it has now emerged as a significant field in health research healthcare policy and clinical practice and training Understanding health and wellbeing requires addressing spiritual and existential issues and healthcare is therefore challenged to respond to the ways spirituality is experienced and expressed in illness suffering healing and loss If healthcare has compassionate regard for the humanity of those it serves it is faced with questions about how it understands and interprets spirituality what resources it should make available and how these are organised and the ways in which spirituality shapes and informs the purpose and practice of healthcare These questions are the basis for this resource which presents a coherent field of enquiry discussion and debate that is interdisciplinary international and vibrant There is a growing corpus of articles in medical and healthcare journals on spirituality in addition to a wide range of literature but there has been no

attempt so far to publish a standard text on this subject Spirituality in Healthcare is an authoritative reference on the subject providing unequalled coverage critical depth and an integrated source of key topics Divided into six sections including practice research policy and training the project brings together international contributions from scholars in the field to provide a unique and stimulating resource DVD Counseling and Psychotherapy Theories in Context and Practice John Sommers-Flanagan,Rita Sommers-Flanagan,2011-01-20 Learn the various counseling theories through authentic examples led by actual practitioners working with real clients This comprehensive two DVD set promotes student learning by illustrating each of the counseling theories covered in the textbook Counseling and Psychotherapy Theories in Context and Practice Second Edition by John and Rita Sommers Flanagan However the DVDs can be used in conjunction with this text or as a stand alone teaching tool in any course covering psychotherapy theories and techniques Unique in its presentation of real clinicians from a variety of work settings including school and college counselors working with actual clients the DVDs Feature practitioners and clients who represent ethnic gender age and religious diversity Model how to develop a positive therapeutic relationship from any theoretical perspective Help students not only understand the differences between theories but also the difference between theory and technique Offer commentary by the authors on how the counselor in the session made decisions from a theoretical perspective as well as why a particular counseling theory was appropriate for the client s situation Exploring Psychoanalytic Adlerian Existential Person Centered Gestalt Behavioral Cognitive Behavioral Reality Feminist Solution Focused and Family Systems theories these two DVDs shed light on these theories in real practice with clients
