## **Mystical Sources Of German Romantic Philosophy:**

The Mystical Sources of German Romantic Philosophy Ernst Benz, 1983-01-01 Pittsburgh Theological Monograph New Series General Editor Dikran Y Hadidian      **Friedrich Schlegel and the Emergence of Romantic Philosophy** Elizabeth Millán, 2012-02-01 This book addresses the philosophical reception of early German Romanticism and offers the first in depth study in English of the movement's most important philosopher Friedrich Schlegel presenting his philosophy against the background of the controversies that shaped its emergence Elizabeth Millán Zaibert begins by distinguishing early German Romanticism from classical German Idealism under which it has all too often been subsumed and then explores Schlegel's romantic philosophy and his rejection of first principles by showing how he responded to three central figures of the post-Kantian period in Germany Jacobi Reinhold and Fichte as well as to Kant himself She concludes with a comprehensive critique of the aesthetic and epistemological consequences of Schlegel's thought with special attention paid to his use of irony      **The Religious and Romantic Origins of Psychoanalysis** Suzanne R. Kirschner, 1996-02-23 In this book Suzanne Kirschner traces the origins of contemporary psychoanalysis back to the foundations of Judaeo-Christian culture and challenges the prevailing view that modern theories of the self mark a radical break with religious and cultural tradition Instead she argues they offer an account of human development which has its beginnings in biblical theology and neoplatonic mysticism Drawing on a wide range of religious literary philosophical and anthropological sources Dr Kirschner demonstrates that current Anglo-American psychoanalytic theories are but the latest version of a narrative that has been progressively secularized over the course of nearly two millennia She displays a deep understanding of psychoanalytic theories while at the same time raising provocative questions about their status as knowledge and as science      **The Devil's Redemption : 2 Volumes** Michael J. McClymond, 2018-06-05 2018 Book Award Winner The Gospel Coalition Academic Theology A Choice Outstanding Academic Title for 2019 Will all evil finally turn to good or does some evil remain stubbornly opposed to God and God's goodness Will even the devil be redeemed Addressing a theological issue of perennial interest this comprehensive book in two volumes surveys the history of Christian universalism from the second to the twenty-first century and offers an interpretation of how and why universalist belief arose The author explores what the church has taught about universal salvation and hell and critiques universalism from a biblical philosophical and theological standpoint He shows that the effort to extend grace to everyone undermines the principle of grace for anyone      Encyclopedia of the Romantic Era, 1760-1850 Christopher John Murray, 2013-05-13 In 850 analytical articles this two-volume set explores the developments that influenced the profound changes in thought and sensibility during the second half of the eighteenth century and the first half of the nineteenth century The Encyclopedia provides readers with a clear detailed and accurate reference source on the literature thought music and art of the period demonstrating the rich interplay of international influences and cross currents at work and to explore the many issues raised by the very concepts of Romantic and Romanticism      *Gender in Mystical and*

Daoist Phenomenology Jay Goulding, 2025-05-01 Jay Goulding's *Daoist Phenomenology* represents a lifelong project of interpolating the works of Martin Heidegger with the interweavings of Daoism and Zen. Illustrating styles of reading complex texts from Europe and East Asia, Goulding moves away from horizontal reading of simple comparisons on a single plain to vertical reading as a deep dive of ideas into ancient worlds. Vertical Reading is a hermeneutic strategy that captures the depth of connection between phenomenology and Daoism, especially Heidegger and classical Daoists Laozi and Zhuangzi. His method reveals Daoist implications of Dogen's Zen and draws on writing and ideas from popular culture including Jules Verne, H. P. Lovecraft, Philip K. Dick, George Lucas' Star Wars universe, and martial artist Bruce Lee. Original and wide-ranging, Goulding's interconnected approach to phenomenology and Daoism enhances and promotes further intercultural dialogues between two great traditions in world philosophies.

**Jena Romanticism and Its Appropriation of Jakob Böhme** Paola Mayer, 1999-11-26 These appropriations fall into two main groups: those pertaining to the name Böhme or a life assigned to it, and those involving concepts or images from the mystic's oeuvre. The first group constituted an attempt to co-opt the aura of sanctity attached to portrayals of the poet-prophet in order to invest Romantic Poesie with the sacral standing of religion. The second group, exemplified by Friedrich Schlegel and Friedrich Schelling, involved the borrowing and radical redefinition of a few concepts and images from Böhme's work in the hope of bridging the gap between the abstract first principle of idealism and the personal God that became an emotional necessity for both thinkers. *Jena Romanticism and Its Appropriation of Jakob Böhme* treats the Romantic reception of Böhme as a striking example of how the past is appropriated and rewritten in the service of self-affirmation. Analysing the need and the techniques for this self-affirmation sheds light on the nature of the self to be affirmed and on the content and underlying motivation of the Romantic program.

An Introduction to Jacob Boehme Ariel Hessayon, Sarah Apetrei, 2013-08-29 This volume brings together for the first time some of the world's leading authorities on the German mystic Jacob Boehme to illuminate his thought and its reception over four centuries for the benefit of students and advanced scholars alike. Boehme's theosophical works have influenced Western culture in profound ways since their dissemination in the early 17th Century, and these interdisciplinary essays trace the social and cultural networks as well as the intellectual pathways involved in Boehme's enduring impact. The chapters range from situating Boehme in the 16th Century Radical Reformation to discussions of his significance in modern theology. They explore the major contexts for Boehme's reception, including the Pietist movement, Russian religious thought, and Western esotericism, as well as focusing more closely on important readers: the religious radicals of the English Civil Wars and the later English Behmenists; literary figures such as Goethe and Blake; and great philosophers of the modern age, among them Schelling and Hegel. Together, the chapters illustrate the depth and variety of Boehme's influence, and a concluding chapter addresses directly an underlying theme of the volume: asking why Boehme matters today and how readers

in the present might be enriched by a fresh engagement with his apparently opaque and complex writings      **The Poetization of Metaphors in the Work of Novalis** Veronica Freeman, 2006 The poet Friedrich von Hardenberg Novalis 1772 1801 exemplifies romantic ideals in his nostalgic yearning for spiritual fulfillment and in doing so invokes the language of authentic mystics While romantics and mystics believe in the common goal of original union the path toward wholeness has led them down separate roads which it may be argued have converged only linguistically This book therefore emphasizes the importance of examining metaphors in their respective traditions      *Spirituality and the Occult* Brian Gibbons, 2013-07-04 Spirituality and the Occult argues against the widely held view that occult spiritualities are marginal to Western culture Showing that the esoteric tradition is unfairly neglected in Western culture and that much of what we take to be modern derives at least in part from this tradition it casts a fresh intriguing and persuasive perspective on intellectual and cultural history in the West Brian Gibbons identifies the influence and continued presence of esoteric mystical movements in disciplines such as medicine science philosophy Freudian and Jungian psychology radical political movements imaginative literature      *Nature, Speculation and the Return to Schelling* Tyler Tritten, Daniel Whistler, 2018-12-07 Two decades ago Schelling first resurfaced in i ek s Indivisible Remainder and the same argumentative move of redeploying Schellingian themes for contemporary ends has continued to play a significant role in critical theory since Markus Gabriel Iain Hamilton Grant Jean Luc Nancy All the articles in this volume attempt to take seriously the idea of Schelling as a contemporary philosopher Schelling is read in dialogue with key figures in the canon of European philosophy and critical theory Alain Badiou milie du Ch telet Gilles Deleuze Paul de Man Quentin Meillassoux Maurice Merleau Ponty Gilbert Simondon Slavoj i ek as well as in light of recent trends in analytic philosophy Brandomian pragmatism powers based metaphysics and semantic naturalism and such readings are not meant merely to highlight Schellingian influences or resonances in contemporary thinking but rather to challenge and interrogate current orthodoxies by insisting upon the contemporaneity of Schellingian speculation That is the aim is both to evaluate and constructively build upon this repeated return to Schelling to probe to diagnose and to experiment on the latent Schellingianisms of the present and the future This book was originally published as a special issue of Angelaki Journal of the Theoretical Humanities      Heidegger and the Quest for the Sacred F. Schalow, 2013-06-29 Although there are various religious traces in Heidegger s philosophy little effort has been made to show the systematic import which his thinking has for outlining a full range of religious and theological questions Precisely because his thought is opposed to the construction of any dogma his vast writings provide clues to what meaning s the Sacred and the Divine may have in a postmodern age where the very possibility of faith hangs in the balance By showing how Heidegger s own thinking can be interpreted as a struggle to come to terms with religious questions this book undertakes a postmodern investigation of the Sacred which both draws upon and transcends various world religions and denominations A postmodern non sectarian vision of the Sacred thereby becomes possible which is open to the plurality

of religious experiences on the one hand and yet affirms on the other Heidegger's emphasis in *Beiträge zur Philosophie* on the last god as the displacing of all sectarian visions of god This book will have special appeal to Heidegger scholars as well as students interested in the overlap between phenomenology and philosophical theology Romanticism & Esoteric Tradition Paul Davies, 1998 Spiritual quest is at the very heart of poetry but in our materialistic climate as we begin the twenty first century this has been largely forgotten even by those who claim to be experts in interpreting literature How does the worldview common to the main esoteric traditions of East and West correspond to the aims of Romantic poets such as Shelley Keats Blake Coleridge and Wordsworth In *Romanticism and Esoteric Tradition* Paul Davies maintains that the intended meaning of the poetry and thinking of the Romantics can be understood only in the light of the spiritual teachings of those traditions This is one of the few books that connects the creative nature of poetry to the core teachings of the esoteric tradition It reveals the true meaning of several Romantic writers whose works have been trivialized by a culture that has marginalized the spiritual and bound itself only to material historical and social concerns The author also shows that the Romantics were the first Western poets to imagine the relationship of the self to the environment as personal encounter In this sense the Romantics recalled a long held secret of the esoteric human sciences rather than inventing a new one This book brings the deepest interests of the Romantics directly into contact with issues closest to present day students of the spiritual traditions and holistic perspectives Creative Destruction Lewis Owens, 2003 Owens religious studies Canterbury Christ Church U College seeks to clarify the philosophical and religious views of playwright journalist and novelist Kazantzakis 1883-1957 arguing that his religious philosophy led him to transcend both communism and nihilism enroute to a union with god Annotation c Book News Inc Portland OR bookn *Kierkegaard's Instant* David J. Kangas, 2007-05-31 In *Kierkegaard's Instant* David J Kangas reads Kierkegaard to reveal his radical thinking about temporality For Kierkegaard the instant of becoming in which everything changes in the blink of an eye eludes recollection and anticipation It constitutes a beginning always already at work As Kangas shows Kierkegaard's retrieval of the sudden quality of temporality allows him to stage a deep critique of the idealist projects of Fichte Schelling and Hegel By linking Kierkegaard's thought to the tradition of Meister Eckhart Kangas formulates the central problem of these early texts and puts them into contemporary light can thinking hold itself open to the challenges of temporality **Jacob Boehme and the Spiritual Roots of Psychotherapy** Glenn J. McCullough, 2025-04-14 Jacob Boehme 1574-1624 was a wildly creative mystical writer whose extraordinary revelations of God the soul and the universe have been consigned to obscurity In this original book Glenn J McCullough argues that Boehme is the ultimate source of a key modern movement psychotherapy Bringing clarity to Boehme's revelations McCullough shows how he anticipates the pioneering concepts of Sigmund Freud and C G Jung including their ideas of the unconscious mind and its remarkable potentials At the centre of Boehme's thought is the figure of Sophia divine Wisdom and her seven drives which guide the soul on a journey of expanded awareness and rebirth While Boehme has been

dismissed as an esoteric outsider McCullough situates him in the mainstream Western tradition of Augustine and Luther while highlighting his unique approach to the ecstatic dream world of Wisdom      **Apocalypse of Truth** Jean

Vioulac, 2021-05-03 We inhabit a time of crisis totalitarianism environmental collapse and the unquestioned rule of neoliberal capitalism Philosopher Jean Vioulac is invested in and worried by all of this but his main concern lies with how these phenomena all represent a crisis within and a threat to thinking itself In his first book to be translated into English Vioulac radicalizes Heidegger's understanding of truth as disclosure through the notion of truth as apocalypse This apocalypse of truth works as an unveiling that reveals both the finitude and mystery of truth allowing a full confrontation with truth as absence Engaging with Heidegger Marx and St Paul as well as contemporary figures including Giorgio Agamben Alain Badiou and Slavoj Žižek Vioulac's book presents a subtle masterful exposition of his analysis before culminating in a powerful vision of the abyss of the deity Here Vioulac articulates a portrait of Christianity as a religion of mourning waiting for a god who has already passed by a form of ever present eschatology whose end has always already taken place With a preface by Jean-Luc Marion *Apocalypse of Truth* presents a major contemporary French thinker to English speaking audiences for the first time      *Hegel* Kipton E. Jensen, 2012-03-15 This manuscript provides a revisionist reading of Hegel's 1802 essay Faith and Knowledge in which he critiques the various reconciliations of faith and reason proposed by his immediate predecessors and contemporary faith philosophers namely Kant Jacobi Schleiermacher and Fichte Hegel's agonistic interpretation of these reflective philosophers of subjectivity who he reads as settling for a form of reason that is no longer worthy of the name and a version of faith that no longer seems worth the bother not only demonstrates his growing facility with the dialectical method for which he is best known but it also anticipates his own speculative reconciliation of faith and reason To view Hegel's reading of his predecessors as a series of misreadings which is not uncommon among scholars of 19th century German philosophy misses the most instructive aspect of this early but formative essay Hegel who was viewed by others if not also by himself as a philosophical latecomer appropriated the thought of his precursors with an eye toward overcoming them      *The*

*Metaphysics of Race* Amit Varshizky, 2024-11-04 This book seeks to reframe debates on the conflicting scientific and spiritual traditions that underpinned the Nazi worldview showing how despite the multitude of tensions and rivals among its adherents it provided a coherent conceptual grid and possessed its own philosophical consistency Drawing on a large variety of works the volume offers insights into the intellectual climate that allowed the radical ideology of National Socialism to take hold It examines the emergence of nuanced conceptions of race in interwar Germany and the pursuit of a new ethical and existential fulcrum in biology Accordingly the volume calls for a re-examination of the place of genetics in Nazi racial thought drawing attention to the multi-register voices within the framework of interwar racial theory Varshizky explores the ways in which these ideas provided new justifications for the Nazi revolutionary enterprise and blurred the distinction between fact and value knowledge and faith the secular and the sacred and how they allowed Nazi thinkers to bounce across these

epistemological divisions This volume will be of interest to scholars of Nazi Germany and World War II intellectual and cultural history the history of science and the philosophy of religion
