Mysticism, Freudianism and Scientific Psychology Knight Dunlap, 1920 **Mysticism, Freudianism and scientific psychology** Knight Dunlap, 1920 *Mysticism, Freudianism and Scientific Psychology* Knight Dunlap, 1926 The past decade has witnessed a remarkable revival of popular interest in philosophical mysticism and in spiritualism Along with this revival has gone a spread of the so called newer psychology of Freud and his satellites which beginning in the medical field now claims the whole arena of human activities The spiritualistic developments have been by various authors attributed to the war and perhaps the war with its profound mental and spiritual upheavals may have contributed to them The simultaneous developments in the hoary cult of philosophical mysticism and the newer cult of Freudianism nevertheless indicate that the movements have derived their impetus only in small part from the events of the last few years but are the expressions of forces which have been much longer in their releasing and depend on deeply implanted principles of human nature To show that it is no mere curious accident which leads booksellers to shelve together books on these three topics is in part the purpose of the present volume The fact that patrons who look over the stock on one of these subjects are apt to be interested in the others has its foundation in the real unity of the three which runs through their diversities And all three involve an assault on the very life of the biological sciences an assault which scientific psychology alone is capable of warding off In implicit recognition of this fact each makes its immediate attack on the methods and results of scientific psychology Hence it is the duty of the psychologist to enlighten the public concerning the real nature of this siren trinity I had projected the inclusion in this volume of a study of spiritualism along with that of mysticism and psychoanalysis But the adequate treatment of spiritualism really requires a volume to itself and is not essential to the discussion of Freudianism although it illuminates the latter Moreover spiritualism makes its maximal appeal to a part of the public which differs from that to which psychoanalysis is most attractive its antagonism to science is more open and undisguised Psychoanalysis which attempts to creep in wearing the uniform of science and to strangle it from the inside is the more immediate danger and spiritualism may be allowed to wait Preface PsycINFO Database Record c 2005 APA all rights reserved Freud and Augustine in Dialogue William B. Parsons, 2013-11-15 It is arguably the case writes William Parsons that no two figures have had more influence on the course of Western introspective thought than Freud and Augustine Yet it is commonly assumed that Freud and Augustine would have nothing to say to each other with regard to spirituality or mysticism given the former's alleged antipathy to religion and the latter's not usually being considered a mystic Adopting an interdisciplinary dialogical and transformational framework for interpreting Augustine's spiritual journey in his Confessions Parsons places a mystical theology at the heart of Augustine's narrative and argues that his mysticism has been misunderstood partly because of the limited nature of the psychological models applied to it At the same time he expands Freud's therapeutic legacy to incorporate the contemporary findings of physiology and neuroscience that have been influenced in part by modern spirituality Parsons develops a new

psychological hermeneutic to account for Augustine's mysticism that will capture the imagination of contemporary readers who are both psychologically informed and interested in spirituality. The author intends this interpretive model not only to engage modern introspective concerns about developmental conflict and the power of the unconscious but also to reach a more nuanced level of insight into the origins and the nature of the self.

Mysticism, Freudianism and Scientific Psychology Knight Dunlap, 2015-06-24 Excerpt from *Mysticism, Freudianism and Scientific Psychology* The past decade has witnessed a remarkable revival of popular interest in philosophical mysticism and in spiritualism. Along with this revival has gone a spread of the so-called new psychology of Freud and his satellites which beginning in the medical field now claims the whole arena of human activities. The spiritualistic developments have been by various authors attributed to the war and perhaps the war with its profound mental and spiritual upheavals may have contributed to them. The simultaneous developments in the hoary cult of philosophical mysticism and the newer cult of Freudianism nevertheless indicate that the movements have derived their impetus only in small part from the events of the last few years but are the expressions of forces which have been much longer in their releasing and depend on deeply implanted principles of human nature. To show that it is no mere curious accident which leads booksellers to shelve together books on these three topics is in part the purpose of the present volume.
