The Sexual Paradox Susan Pinker, 2010-01-11 After four decades of eradicating gender barriers at work and in public life why do men still dominate business politics and the most highly paid jobs Why do high achieving women opt out of successful careers Psychologist Susan Pinker explores the illuminating answers to these questions in her groundbreaking first book In The Sexual Paradox Susan Pinker takes a hard look at how fundamental sex differences continue to play out in the workplace By comparing the lives of fragile boys and promising girls Pinker turns several assumptions upside down that the sexes are biologically equivalent that smarts are all it takes to succeed that men and women have identical goals If most children with problems are boys then why do many of them as adults overcome early obstacles while rafts of competent even gifted women choose jobs that pay less or decide to opt out at pivotal moments in their careers Weaving interviews with men and women into the most recent discoveries in psychology neuroscience and economics Pinker walks the reader through these minefields Are men the more fragile sex Which sex is the happiest at work What does neuroscience tell us about ambition Why do some male school drop outs earn more than the bright motivated girls who sat beside them in third grade Pinker argues that men and women are not clones and that gender discrimination is just one part of the persistent gender gap A work world that is satisfying to us all will recognize sex differences not ignore them or insist that we all be the same

Peace by Peaceful Means Johan Galtung,1996-04-28 Johan Galtung one of the founders of modern peace studies provides a wide ranging panorama of the ideas theories and assumptions on which the study of peace is based The book is organized in four parts each examining the one of the four major theoretical approaches to peace The first part covers peace theory exploring the epistemological assumptions of peace In Part Two conflict theory is examined with an exploration of nonviolent and creative handling of conflict Developmental theory is discussed in Part Three exploring structural violence particularly in the economic field together with a consideration of the ways of overcoming that violence The fourth part is devoted to civilization theory This involves an **Peaceful Neighbor** Michael Long,2015-03-13 Fred Rogers was one of the most radical pacifists of contemporary history We do not usually think of him as radical partly because he wore colorful soft sweaters made by his mother Nor do we usually imagine him as a pacifist that adjective seems way too political to describe the host of a children's program known for its focus on feelings We have restricted Fred Rogers to the realm of entertainment children and feelings and we've ripped him out of his political and religious context Rogers was an ordained Presbyterian minister and although he rarely shared his religious convictions on his program he fervently believed in a God who accepts us as we are and who desires a world marked by peace and wholeness With this progressive spirituality as his inspiration Rogers used his children's program as a platform for sharing countercultural beliefs about caring nonviolently for one another animals and the earth To critics who dared call him namby pamby Rogers said Only people who take the time to see our work can begin to understand the depth of it This is the invitation of Peaceful Neighbor to see and understand Rogers's convictions and their expression through his program Mister Rogers Neighborhood it turns out is far from sappy sentimental and shallow it's a sharp political response to a civil and political society poised to kill Chronicle of the Horse ,1977-10 **Speaking and Being** Kübra Gümüşay,2022-05-05 A SPECTATOR BOOK OF THE YEAR I can't stop talking

Connolly, 2014-08-25 Many people characterize urban renewal projects and the power of eminent domain as two of the most widely despised and often racist tools for reshaping American cities in the postwar period In A World More Concrete N D B Connolly uses the history of South Florida to unearth an older and far more complex story Connolly captures nearly eighty years of political and land transactions to reveal how real estate and redevelopment created and preserved metropolitan

growth and racial peace under white supremacy Using a materialist approach he offers a long view of capitalism and the color line following much of the money that made land taking and Jim Crow segregation profitable and preferred approaches to governing cities throughout the twentieth century A World More Concrete argues that black and white landlords entrepreneurs and even liberal community leaders used tenements and repeated land dispossession to take advantage of the poor and generate remarkable wealth Through a political culture built on real estate South Florida's landlords and homeowners advanced property rights and white property rights especially at the expense of more inclusive visions of equality For black people and many of their white allies uses of eminent domain helped to harden class and color lines Yet for many reformers confiscating certain kinds of real estate through eminent domain also promised to help improve housing conditions to undermine the neighborhood influence of powerful slumlords and to open new opportunities for suburban life for black Floridians Concerned more with winners and losers than with heroes and villains A World More Concrete offers a sober assessment of money and power in Jim Crow America It shows how negotiations between powerful real estate interests on both sides of the color line gave racial segregation a remarkable capacity to evolve revealing property owners power to reshape American cities in ways that can still be seen and felt today

Schooling for Peaceful Development in Post-Conflict Societies Clive Harber, 2019-05-02 This book explores how and if formal education affects peacebuilding in post conflict societies As schooling is often negatively implicated in violent conflict the author highlights the widely expressed need to build back better and transform schooling by changing both its structures and processes and its curriculum Drawing upon research from a wide range of post conflict developing societies including Cambodia Colombia and Kenya the author examines whether there is any empirical support for the idea that schooling can be transformed so it can contribute to more peaceful and democratic societies In doing so the author reveals how the myth of building back better is perpetuated by academics and international organisations and explains why formal education in post conflict developing societies is so impervious to radical change This important volume will appeal to students and scholars of education in post conflict societies
